Pfannstiel, Christoph Rasche, 2016-12-16 This book demonstrates how to successfully manage and lead healthcare institutions by employing the logic of business model innovation to gain competitive advantages Since clerk like routines in professional organizations tend to overlook patient and service centered healthcare solutions it challenges the view that competition and collaboration in the healthcare sector should not only incorporate single end services therapies or diagnosis related groups Moreover the authors focus on holistic business models which place greater emphasis on customer needs and put customers and patients first The holistic business models approach addresses topics such as business operations competitiveness strategic business objectives opportunities and threats critical success factors and key performance indicators The contributions cover various aspects of service business innovation such as reconfiguring the

hospital business model in healthcare delivery essential characteristics of service business model innovation in healthcare guided business modeling and analysis for business professionals patient driven service delivery models in healthcare and continuous and co creative business model creation All of the contributions introduce business models and strategies process innovations and toolkits that can be applied at the managerial level ensuring the book will be of interest to healthcare professionals hospital managers and consultants as well as scholars whose focus is on improving value generating and competitive business architectures in the healthcare sector

Capturing Social and Behavioral Domains and Measures in Electronic Health Records Institute of Medicine, Board on Population Health and Public Health Practice, Committee on the Recommended Social and Behavioral Domains and Measures for Electronic Health Records, 2015-01-08 Determinants of health like physical activity levels and living conditions have traditionally been the concern of public health and have not been linked closely to clinical practice However if standardized social and behavioral data can be incorporated into patient electronic health records EHRs those data can provide crucial information about factors that influence health and the effectiveness of treatment Such information is useful for diagnosis treatment choices policy health care system design and innovations to improve health outcomes and reduce health care costs Capturing Social and Behavioral Domains and Measures in Electronic Health Records Phase 2 identifies domains and measures that capture the social determinants of health to inform the development of recommendations for the meaningful use of EHRs This report is the second part of a two part study The Phase 1 report identified 17 domains for inclusion in EHRs This report pinpoints 12 measures related to 11 of the initial domains and considers the implications of incorporating them into all EHRs This book includes three chapters from the Phase 1 report in addition to the new Phase 2 material Standardized use of EHRs that include social and behavioral domains could provide better patient care improve population health and enable more informative research The recommendations of Capturing Social and Behavioral Domains and Measures in Electronic Health Records Phase 2 will provide valuable information on which to base problem identification clinical diagnoses patient treatment outcomes assessment and population health measurement

Security and Privacy for Mobile Healthcare Networks Kuan Zhang, Xuemin (Sherman) Shen, 2015-11-09 This book examines state of art research on designing healthcare applications with the consideration of security and privacy It explains the Mobile Healthcare Network MHN architecture and its diverse applications and reviews the existing works on security and privacy for MHNs Critical future challenges and research problems are also identified Using a Quality of Protection perspective the authors provide valuable insights on security and privacy preservation for MHNs Some promising solutions are proposed to accommodate the issues of secure health data transmission misbehavior detection health data processing with privacy preservation and access control in MHNs Specifically the secure health data aggregation explores social spots to help forward health data and enable users to select the optimal relay according to their social ties and health data priority The secure aggregation achieves the desirable delivery ratio with

reasonable communication costs and lower delay for the data in different priorities A proposed misbehavior detection scheme distinguishes Sybil attackers from normal users by comparing their mobile contacts and pseudonym changing behaviors The detection accuracy is high enough to resist various Sybil attacks including forgery In addition the health data processing scheme can analyze the encrypted health data and preserve user s privacy at the same time Attribute based access control can achieve fine grained access control with user defined access policy in MHNs Security and Privacy for Mobile Healthcare Networks is designed for researchers and advanced level students interested in healthcare security and secure data transmission
