Familiarity and Conviction in the Criminal Justice System Joanna Pozzulo, Emily Pica, Chelsea Sheahan, 2019-11-01

Eyewitness research has focused mainly on stranger identification but identification is also critical for the familiar stranger. Understanding how variability in an eyewitness's familiarity with the perpetrator may influence recall and recognition accuracy will facilitate swifter and more just resolutions to crime. Familiarity and Conviction in the Criminal Justice System explores the concept of familiarity ranging from complete unfamiliarity as with a total stranger to very familiar other friends and family.

Adolescence, Privacy, and the Law Roger J. R. Levesque, 2017. Adolescence Privacy and the Law provides a foundation for understanding privacy rights and how they relate to adolescents. Roger Levesque argues that because privacy is actually an inherently social phenomenon the ways in which adolescents' privacy needs and rights are shaped are essential to society's broader privacy interests. A close look at empirical understandings of privacy, how it shapes development, and how privacy itself can be shaped provides important lessons for addressing the critical juncture facing privacy rights and privacy itself. Adolescence Privacy and the Law provides an overview of the three major strands of privacy rights: decisional, spatial, and informational, and extends current understandings of these strands and how the legal system addresses adolescents and their legal status. Levesque presents comprehensive and specific analyses of the place of privacy in adolescent development and its outcomes, the influences that shape adolescents' expectations and experiences of privacy, and ways to effectively shape adolescents' use of privacy. He explains why privacy law must move in new directions to address privacy needs and pinpoints the legal foundation for moving in new directions. The book charts broad proposals to guide the development of sociolegal responses to changing social environments related to the privacy of adolescents and challenges jurisprudential analyses claiming that developmental sciences do not offer important and useful tools to guide responses to adolescents' privacy. Lastly, Levesque responds to likely criticisms that may hamper the development of sociolegal stances more consistent with adolescents' needs for privacy as well as with societal concerns about privacy.

Handbook of Forensic Mental Health Services Ronald Roesch, Alana N. Cook, 2017-05-18. Handbook of Forensic Mental Health Services focuses on assessment, treatment, and policy issues regarding juveniles and adults in the criminal and civil systems. Uniquely, this volume is designed for professionals who deliver mental health services rather than researchers. Just like its parent series, its goal revolves around improving the quality of mental health care services in forensic settings. It achieves this by integrating the findings related to clinical practice, administration, and policy from trends and best practice internationally that mental health professionals can implement.
