Waist High In The World A Life Among The Nondisabled:

Waist-High in the World Nancy Mairs, 2001-01-17 In a blend of intimate memoir and passionate advocacy Nancy Mairs takes on the subject woven through all her writing disability and its effect on life work and spirit [Memoirs of Well-Being](#)

Tanja Reiffenrath, 2016-05-15 As the body politics of life writing in the United States change illness and disability memoirs receive considerable attention Although these narratives are framed by a lack of health they abundantly present health and do so beyond its binary relationship to the pathological This book departs from previous scholarship by bringing into focus the writers representations of cure recovery and healing as well as their reluctance to bring closure to their narratives and align their stories with traditional notions of health These memoirs thus partake in the construction of alternative narratives of illness and disability

Elemental Difference and the Climate of the Body Emily Anne Parker, 2021 In nineteenth century Europe differences among human bodies were understood to be matters of scientific classification At the height of scientific acceptance it was unthinkable that race or sex or diagnosis or indigence were invention Today however differences among human bodies are understood as matters of social construction The philosophy of social construction understands differences among humans to be matters of human imposition Social constructionism s way of understanding the origin of differences among humans is so well established as to have no currently viable alternatives even among new materialists social constructionism s most ardent critics This book argues that new materialists and social constructionists share a distinction between the political and the ecological Emily Anne Parker centers her argument on the philosophical concept of the polis according to which there is one complete human form It is this form that is to blame for our current political and ecological crisis Political hierarchies and ecological crises are often considered to be two different problems for example many speak of parallel problems climate change and racial injustice Parker argues that these are not parallel crises so much as one problem the polis The philosophy of the polis asserts that there is one complete human body and that body is meant to govern all other things In that sense there are not two crises but instead one concern to perceive the ways in which this tradition of the polis constrains the present Elemental difference in the polis is appreciated in the fact that empirical bodily non identity an Aristotelian concept can be called upon to elevate one group of bodies among the rest Parker builds from Sylvia Wynter who argues that the very idea of empirical bodily non identity begins with the modern science of racial anatomy or what Wynter calls biocentrism Parker argues that biocentrism is a feature of the polis according to which the one complete body was defined by its capacity for disembodied thought The sciences of racial anatomy are a more explicit commitment to biocentrism but the ranking of matter with respect to one complete human a body that is the site of supra natural thinking is a practice that has always characterized the polis In this way the polis is responsible for both political and ecological hierarchy It is as responsible for what is euphemistically called climate change as it is for the political hierarchy that constitutes it Elemental Difference and the Climate of the Body ultimately bridges the insights of social constructionism

and new materialisms to create a philosophy of elemental difference Difference rather than needing to be either dismissed based on its social construction or reified in keeping with the hierarchies of the polis is crucial for addressing contemporary crises of the polis Arts and Humanities Brenda Jo Brueggemann,2012-08-02 This volume in The SAGE Reference Series on Disability explores the arts and humanities within the lives of people with disabilities It is one of eight volumes in the cross disciplinary and issues based series which incorporates links from varied fields making up Disability Studies as volumes examine topics central to the lives of individuals with disabilities and their families With a balance of history theory research and application specialists set out the findings and implications of research and practice for others whose current or future work involves the care and or study of those with disabilities as well as for the disabled themselves The presentational style concise and engaging emphasizes accessibility Taken individually each volume sets out the fundamentals of the topic it addresses accompanied by compiled data and statistics recommended further readings a guide to organizations and associations and other annotated resources thus providing the ideal introductory platform and gateway for further study Taken together the series represents both a survey of major disability issues and a guide to new directions and trends and contemporary resources in the field as a whole **Extraordinary Bodies** Rosemarie Garland Thomson,2017-03-07

Extraordinary Bodies is a cornerstone text of disability studies establishing the field upon its publication in 1997 Framing disability as a minority discourse rather than a medical one the book added depth to oppressive narratives and revealed novel liberatory ones Through her incisive readings of such texts as Harriet Beecher Stowe s Uncle Tom s Cabin and Rebecca Harding Davis s Life in the Iron Mills Rosemarie Garland Thomson exposed the social forces driving representations of disability She encouraged new ways of looking at texts and their depiction of the body and stretched the limits of what counted as a text considering freak shows and other pop culture artifacts as reflections of community rites and fears Garland Thomson also elevated the status of African American novels by Toni Morrison and Audre Lorde Extraordinary Bodies laid the groundwork for an appreciation of disability culture and an inclusive new approach to the study of social marginalization

Foundations for Global Health Practice Lori DiPrete Brown,2018-01-02 An essential introduction to global health in the modern world Foundations for Global Health Practice offers a comprehensive introduction to global health with a focus on ethical engagement and participatory approaches With a multi sectoral perspective grounded in Sustainable Development Goals the text prepares students for engagement in health care and public health and goes beyond traditional global health texts to include chapters on mental health agriculture and nutrition water and sanitation and climate change In addition to presenting core concepts the book outlines principles for practice that enable students and faculty to plan and prepare for fieldwork in global health The book also offers perspectives from global health practitioners from a range of disciplinary and geographic perspectives Exercises readings discussion guides and information about global health competencies and careers facilitate personal discernment and enable students to systematically develop their own professional goals and strategies for

enriching respectful and ethical global health engagement Understand the essential concepts systems and principles of global health Engage in up to date discussion of global health challenges and solutions Learn practical skills for engagement in health care and beyond Explore individual values and what it means to be an agent for change Prevention cooperation equity and social justice are the central themes of global health a field that emphasizes the interdisciplinary cross sector and cross boundary nature of health care on a global scale As the world becomes ever smaller and society becomes more and more interconnected the broad view becomes as critical as the granular nature of practice Foundations for Global Health Practice provides a complete and highly relevant introduction to this rich and rewarding field **Imaging and Imagining**

Illness Devan Stahl,2018-01-22 Medical imaging technologies can help diagnose and monitor patients diseases but they do not capture the lived experience of illness In this volume Devan Stahl shares her story of being diagnosed with multiple sclerosis with the aid of magnetic resonance images MRIs Although clinically useful Stahl did not want these images to be the primary way she or anyone else understood her disease or what it is like to live with MS With the help of her printmaker sister Darian Goldin Stahl they were able to reframe these images into works of art The result is an altogether different image of the ill body Now the Stahls open up their project to four additional scholars to help shed light on the meaning of illness and the impact medical imaging can have on our cultural imagination Using their insights from the medical humanities literature visual culture philosophy and theology the scholars in this volume advance the discourse of the ill body adding interpretations and insights from their disciplinary fields The Bedford Reader X.
