Use Of Weapons Culture:

Use of Weapons Iain M. Banks, 2008-12-22 The man known as Cheradenine Zakalwe was one of Special Circumstances' foremost agents changing the destiny of planets to suit the Culture through intrigue, dirty tricks and military action. The woman known as Diziet Sma had plucked him from obscurity and pushed him towards his present eminence, but despite all their dealings she did not know him as well as she thought. The drone known as Skaaffen Amtiskaw knew both of these people. It had once saved the woman's life by massacring her attackers in a particularly bloody manner. It believed the man to be a lost cause. But not even its machine could see the horrors in his past. Ferociously intelligent, both witty and horrific, *Use of Weapons* is a masterpiece of science fiction. The Culture Series. Consider Phlebas. The Player of Games. *Use of Weapons*. The State of the Art. Excession. Inversions. Look to Windward. Matter Surface. Detail. Understanding America's Gun Culture Lisa Fisher, Craig Hovey, 2021-08-20 *Understanding America's Gun Culture* focuses on building understanding of some of the issues associated with U.S. gun culture and the contemporary debate about the availability and use of guns. This edited volume is unique in that it draws on a wide variety of disciplines and presents perspectives on both sides of the debate. Contributors hail from the academic disciplines of history, social work, criminal justice, sociology, religion, and theological ethics, as well as policy agencies. Some chapters examine the issues socially and psychologically to help readers better understand dynamics within the debate. Others pose important ethical and philosophical questions about gun culture. Still others address practical policy solutions for enhancing gun safety and minimizing gun violence, even bringing in international perspectives. This second edition includes literature published in the last two years and two new chapters: one focusing on gender within gun culture and another that features a conversation between the editors and an ethnographic researcher with broad expertise in gun culture and research and policy trends. Together, the chapters create a thought-provoking compilation that offers insightful findings, considers theoretical and practical implications, and invites further exploration of the topic.

Weapons, Culture and the Anthropology Museum Tom Crowley, Andrew Mills, 2018-04-18 Largely due to the tastes of nineteenth-century Western collectors and curators, weaponry abounds in ethnographic museums. However, the relative absence of Asian, African, Native American, and Oceanic arms and armour from contemporary gallery displays neither reflects this fact nor accords these important artefacts the attention they deserve. Weapons are often those objects in museums which most strongly record traumatic histories of colonial conquest. Around the world, showcase societies' most complex technologies and encode a wealth of historical information relating to violent conflict, cultural identities, and indigenous masculinities. This volume brings together an international collective of museum professionals, indigenous cultural historians, anthropologists, and material culture specialists to address the historical role of weapon collections in ethnographic museums and to reconsider the value of studying arms for the purposes of writing richer cultural histories. From Australia to the Amazon, from Uttar Pradesh to

ancient Ulster the essays in this book endeavour to return ethnographic weapons to the centre of material culture studies In doing so they offer a blueprint for a more sophisticated future treatment of world weaponry **Understanding Police Culture** John P. The Culture of War Richard A. Gabriel, 1990-04-23 Although war has been analyzed from many perspectives no scholar has satisfactorily explained why the human race fights and how we came to create a degree of military sophistication capable of destroying the entire species Gabriel addresses these questions in his study of the origins and development of warfare He looks particularly at the relationship between the evolution of the social institution of war and the development of the military institutions tactical sciences and technology

required for organized conflict Beginning with a discussion of the biological and evolutionary history of man Gabriel investigates the proposition that the human race is genetically predisposed to warlike behavior He next reviews the archaeological record to test the common assumption that war has existed from the earliest times He traces the evolution of the social institutions and technology of war in a succession of ancient cultures beginning with the Bronze Age The development of armies tactics logistics and weapons is examined together with the psychological and social implications of mankind's choice to use them The work concludes with a discussion demonstrating how the practice of war in modern times relates to the perpetuation of values and institutional forms created by earlier societies especially those of classical Greece and Rome The first study to integrate the findings of cultural anthropology with the concerns of military analysis this work will be of interest to students and academics in these and related fields
