

– in case of wedging under other vehicles or protective barriers (for example under a truck or guard rail), the air bag is not triggered as it offers no additional protection compared with the seat belts, consequently it would be pointless.

Therefore, failure to come into action in the above circumstance does not mean that the system is not working properly.

Do not apply stickers or other objects to the steering wheel or to the air bag cover on the passenger's side or on the side roof lining. Never put objects on the dashboard on passenger side since they could interfere with proper air bag inflation.

The driver and passenger front airbags have been designed and calibrated to protect a person wearing seat belts.

At their maximum inflation, their volume fills most of the space between the steering wheel and the driver and between the dashboard and the passenger.

In minor crashes (for which the restraining action of the seat belts is sufficient), the air bags are not deployed. Also in this case it is of vital importance to wear the seat belts since in case of front crash they guarantee proper positioning of the occupant.

User Guide Fiat Doblo:

A Practical Guide to Delivering Personalisation Jaimee Lewis, Helen Sanderson, 2011-12-15 This is the comprehensive guide to delivering personalisation in health and social care using person centred approaches It covers what personalisation and person centred approaches are the different elements involved and how to carry it out with all those receiving care and support from people with disabilities to people at the end of life Haynes Car Guide 2007 Haynes Publishing, 2007-08-15 This pocket sized illustrated guide covers every significant make and model of car sold in Europe and North America during the 2006 2007 model year from giants like Ford and VW to small scale manufacturers such as Morgan and Noble Each model is pictured in color with a data table providing vital statistics to enable comparisons between models Providing full details for over 700 cars and stretching to 400 pages this is a must have reference source and a useful spotter's guide for all car enthusiasts *The House as a Product* A. Vogler, 2016-03-10 Industrialized housing has been a common phenomenon in the building industry since the industrial revolution the casting of iron components enabled Victorian iron casters to prefabricate entire buildings and to export them to all British colonies It got a second boost from Modernist architects like Ludwig Mies van der Rohe Walter Gropius and Konrad Wachsmann and a third boost in the US when the soldiers came back from the Second World War in 1945 and wanted to buy a ready made house In the later decades of the 20th century composite prototypes were built Timber frame houses are extremely popular in low density areas worldwide For densely populated areas housing is now firmly attached to reinforced concrete The contracting industries have developed efficient building methods for the concrete structures on which separate systems of claddings are fixed to form a house However in the coming decades designers builders and scientists also have to keep the environment in mind working with a minimal amount of materials and for minimizing embodied energy and energy use In the coming age minimal embodied energy and low ecological footprints are renewed values that will be added to energy positive housing and that will have an influence on the building technology of the future This will lead to a reformation of the building vocabulary Other materials will have to be chosen and developed to function in building elements and components **Autocar**, 2005 The Advertising Red Books, 2007-04 **Vietnam Economic Times**, 2003 *Qui touring*, 2010-05 Used Fiat Doblo (2001 - Present) Buyer's Guide, 2004 Fiat 127 Owners Workshop Manual John Harold Haynes, H.
