This four-volume set, edited by a leading expert in the field, brings together in one collection a series of papers that have been fundamental to the development of renewable energy as a defined discipline. Some of the papers were first published many years ago, but they remain classics in their fields and retain their relevance to the understanding of current issues. The papers have been selected with the assistance of an eminent international editorial board. The set includes a general introduction, and each volume is introduced by a new overview essay placing the selected papers in context. The range of subject matter is considerable, including coverage of all the main renewable technologies, the fundamental principles by which they function, and the issues around their deployment, such as planning, integration, and socio-economic assessment. Overall, the set provides students, teachers, and researchers confronted with thousands of journal articles, book chapters, and grey literature, stretching back decades, with a ready-made selection of, and commentary on, the most important key writings in renewable energy. It will be an essential reference for libraries concerned with energy technology and the environment. *More Light* Jonathan Strong, 2011. Fiction. LGBT Studies. MORE LIGHT is a musical fantasia in major and minor keys of the generations at a crossroads, and how the stories within our stories weave about us as we grow and change, and remember. Iva Sturtevant, a soprano of some repute in provincial European opera houses, has returned to her childhood home to tend her ailing parents. Iva's brother, Leo Sturtevant, who has never left Josephine, Illinois, has recently been dismissed from his social service job, suspected of inappropriate behavior. Now, awaiting the inevitable disappearance of the oldest generation, Iva entertains Leo with tales from her obscure romantic operas, and Leo entices his big sister to read an old 1960s paperback about the world's last heterosexual, a novel dear to him for its mirror image of his own plight in a tiny rural town. This old novel even inspires Leo to write something himself, in secret, a mystery story about twin boys, one of them accused of a violent crime. *Materials and the Environment* Michael F.
