Kapoor, 2017-11-13 This handbook is filled with over 50 illustrations and descriptions of approximately 250 plants which are used for herbal medicine It includes information on medicinal plants ranging from *Abies spectabilis* to *Zizyphus vulgaris* The purpose of this handbook is to make available a reference for easy accurate identification of these herbs Derived from India Ayurveda is the foundation stone of their ancient medical science Approximately 80 percent of the population of India and other countries in the East continue to utilize this system of medicinal treatment It is believed that the key to successful medication is the use of the correct herb This is an indispensable resource for all physicians pharmacists drug collectors and those interested in the healing arts *Nitrogen Use Efficiency in Plants* Vanitha Jain, 2011-01-01 Nitrogen fertilizers are necessary to enhance agricultural production and to sustain food security However their inefficient use accrues from inherent limitations of the crop plants as well as the manner in which N fertilizers are formulated applied and managed The main aim of the book is to assess the various aspects of the fate of fertilizer N in context of the overall N inputs to agricultural systems with a view to enhance the efficiency of nitrogen use and reduce the negative impacts on environment The cross cutting issues relate to improvement in nitrogen use by emerging technologies genetic enhancement QTL mapping meeting N needs by understanding its interactions with other nutrients and mitigation of nitrogen losses caused by environmental factors and management practices Nitrogen Use Efficiency in Plants develops links between basic and applied research and practical crop production by addressing a wide range of topics relating to nitrogen use efficiency and to plant and crop responses to applications of nitrogen via fertilizers including nitrogen acquisition and reduction molecular approaches nitrate induction and signaling and nitrogen use under abiotic stresses Nitrogen Use Efficiency in Plants is an invaluable classroom aid for academics working in plant physiology biochemistry biotechnology molecular breeding and agronomy and an essential professional resource for researchers working in plant and crop systems as it provides a comprehensive interdisciplinary description of problems related to the efficient use of nitrogen in agriculture Handbook of Spices in India: 75 Years of Research and Development P N Ravindran, K Sivaraman, S Devasahayam, K Nirmal Babu, 2024-06-24 This compendium presents comprehensive information on more than 25 important spice crops commercially grown in India and traded globally apart from over 40 spices that have the potential to be popularized In 70 chapters the book covers the achievements in research and development made in India for the past 75 years in various organizations including research institutes agricultural universities and private sector laboratories Spices are natural products of plant origin used primarily for flavouring and seasoning or for adding pungency and flavour to foods and beverages The flavour and fragrance of Indian spices had a magic spell on human culture since very ancient days The importance of spices in Indian life and its contribution to the economy are substantial India as the world's

leading producer of spices is also a significant stakeholder in spices export trade globally Indian spices being sources of many high value compounds are also gaining much importance for other diversified uses especially for their pharmaceutical and nutraceutical properties A wide variety of 52 spices are grown in India including black pepper chillies cardamom ginger turmeric cinnamon nutmeg garlic onion cumin coriander saffron and vanilla This book compiles a comprehensive holistic review on the subject written by the best experts in the field in India representing diverse agencies This book is a single point reference book for all those involved in the research study teaching and use of spices in India and abroad Handbook of Plant and Crop Stress, Fourth Edition Mohammad Pessarakli, 2019-08-06 Since the publication of the third edition of the Handbook of Plant and Crop Stress continuous discoveries in the fields of plant and crop environmental stresses and their effects on plants and crops have resulted in the compilation of a large volume of the latest discoveries Following its predecessors this fourth edition offers a unique and comprehensive collection of topics in the fields of plant and crop stress This new edition contains more than 80% new material and the remaining 20% has been updated and revised substantially This volume presents 10 comprehensive sections that include information on soil salinity and sodicity problems tolerance mechanisms and stressful conditions plant crop responses plant crop responses under pollution and heavy metal plant crop responses under biotic stress genetic factors and plant crop genomics under stress conditions plant crop breeding under stress conditions empirical investigations improving tolerance and beneficial aspects of stressors Features Provides exhaustive coverage written by an international panel of experts in the field of agriculture particularly in plant crop stress areas Contains 40 new chapters and 10 extensively revised and expanded chapters Includes three new sections on plant breeding stress exerted to weeds by plants and beneficial aspects of stress on plants crops Numerous case studies With contributions from 100 scientists and experts from 20 countries this Handbook provides a comprehensive resource for research and for university courses covering soil salinity sodicity issues and plant crop physiological responses under environmental stress conditions ranging from cellular aspects to whole plants The content can be used to plan implement and evaluate strategies to mitigate plant crop stress problems This new edition includes numerous tables figures and illustrations to facilitate comprehension of the material as well as thousands of index words to further increase accessibility to the desired information *Plant Micronutrient Use Efficiency* Mohammad Anwar Hossain, Takehiro Kamiya, David Burritt, Lam-Son Phan Tran, Toru Fujiwara, 2018-03-23 Plant Micronutrient Use Efficiency Molecular and Genomic Perspectives in Crop Plants presents information on the complex mechanisms regulating micronutrient use efficiency in plants Understanding this science is essential for the development of new varieties of crop plants that are more resilient to micronutrient stress as well as plants with increased bioavailable concentrations of essential micronutrients This book explores the discovery of novel genes and key metabolic pathways associated with micronutrient use efficiency in plants gives an analyses of the gene expression patterns in plants in response to low and or high nutrient levels and investigates the potential functions of these

genes and their products Strategies to enhance micronutrient use efficiency and stress tolerance to develop bio fortified crop and to improve the sustainable utilization of natural resources are critically evaluated The book contains both fundamental and advanced information as well as critical commentaries that are useful for those involved in the various fields that make up the plant sciences Presents in depth information on mineral nutrition including coverage of all the major micronutrients Explores the molecular and genetic aspects of micronutrient use efficiency in crop plants Provides information and critical discussion of the latest developments in the micronutrient biofortification of crop plants with an aim to prevent micronutrient deficiencies in humans Includes contributions from experts in plant micronutrient use efficiency and crop biofortification

Medicinal Plants and Their Bioactives in Human Diseases Kamil Kuca,Jiri Patocka,Vikas Kumar,Rajni Dhalaria,2025-09-26 Medicinal plants offer a promising alternative or complement to conventional therapies due to their natural origin wide availability and potential to provide a broad spectrum of pharmacological effects Bioactive compounds derived from these plants such as alkaloids flavonoids terpenoids and phenolics have shown diverse therapeutic activities including antioxidant anti inflammatory neuroprotective and anti cancer effects The use of medicinal plants could provide safer more holistic approaches to managing chronic and neurodegenerative diseases reducing side effects and improving patient outcomes By focusing on the applications of medicinal plants and their bioactive compounds this book aims to explore the untapped potential of natural products in combating some of the most challenging diseases affecting human health today It will serve as a comprehensive reference for researchers healthcare professionals and students interested in the therapeutic use of plant based compounds and contribute to the advancement of integrative medicine *Socio-economic and Eco-biological Dimensions in Resource use and Conservation* Niranjana Roy,Shubhadeep Roychoudhury,Sunil Nautiyal,Sunil K.

Agarwal,Sangeeta Bakshi,2020-01-27 This book presents the outcomes of the 2017 national workshop and international conference organized by CEENR of ISEC Bengaluru and Assam University Silchar Addressing the threats to biodiversity and sustainable development resulting from the impacts of human induced pressures on ecosystems and global warming driven climate change is a major challenge It requires increased knowledge and an enhanced information base in order to devise local policies to improve the adaptive capacity of vulnerable socio ecological systems in developing countries In this context the book presents research that has the potential to benefit the environment and empower communities It appeals to researchers investigating diverse aspects of socio ecological biological systems to create strategies for resource use conservation and management to ensure sustainability

Hazardous and Trace Materials in Soil and Plants M. Naeem,Tariq Aftab,Abid Ali Ansari,Sarvajeet Singh Gill,Anca Macovei,2022-08-13 Hazardous and Trace Materials in Soil and Plants Sources Effects and Management explores the latest advancements in reducing avoiding and eliminating soil contaminants that challenge the health and safety of agricultural plants With a focus on minimizing the production of those hazardous substances controlling their distribution and ensuring safe utilization the book explores each contributing area

and provides insights toward improved sustainable and secure production This is an excellent reference resource on both current research and future directions from laboratory research to field applications The combined impacts of climate change and industrialization have led to increased and diversified threats to the health of the soil in which our food crops are grown as well as in the plants themselves This dual hazard scenario is increasingly recognized as a threat to not just the environment but to global food security as agricultural soils contaminated with pollutants alter plant metabolism thus resulting in reduced crop quality and production quantity Addresses the challenges of mitigating toxic substances in plants including agricultural crops Presents current status and future prospects for managing biotic and abiotic environmental stress factors through plant stress tolerance mechanisms Includes chapters that address both biotic and abiotic stresses agricultural and environmental science toxicology biotechnology nanotechnology and molecular studies Integrates insights and developments between environmental and plant science Basic and Applied Aspects of Biopesticides K.

Sahayaraj,2014-07-10 Currently the major challenge of humanity is focused on population growth through agricultural production in order to meet the demand for food The food crunch is mainly due to pest and disease Traditional methods synthetic insecticides and microbicides cause health hazards to human beings domestic animals and also affect our immediate environments Serious concerns were implemented by both developing and developed countries as Integrated Pest Management IPM and Bio intensive Integrated Pest Management BIPM systems where biopesticides play an important role worldwide The available books are limited to particular aspects of biopesticides Hence it is imperative to bring out a holistic documentation which will provide the reader information on all aspects of biopesticides The book consists of five sections namely microbials botanicals natural enemies semio chemicals and biotechnology and equipments bioinformatics tools and IPM In Section I microbial deals with utilization of Bacillus in control of phytonematodes biological control of pest and diseases with fluorescent pseudomonads entomopathogenic fungus and entomopathogenic nematodes in pest management microbial viral insecticides and microbial elicitors to induce immunity for plant disease control in chilli and tomato Importance of plant essential oils botanicals in endocrine disruption relevance of botanicals and use of plant volatile on pest management has been discussed in Section II Importance and role of reduviidae weaver ants ground beetles Odonatas spiders in biological control has been discussed in Section III In addition genetic improvement of biocontrol agents for sustainable pest management has also been highlighted In Section IV classical practices and pheromone kairomonal enhancement to natural enemies and use of transgenic plants in insect control are highlighted Equipment and their application methodologies for application of biopesticides relevance of bioinformatics in biopesticides management pest management of soybean bio fouling and eco friendly antifoulants have been highlighted in Section V Each chapter has objectives and conclusion along with recommendations **Gender and Agricultural Development** Helen Kreider

Henderson,2022-03-29 Agricultural planning and development are crucial to human survival but they usually proceed

without any consideration of the importance of gender issues at the production level. Although women have long been prime movers in agriculture, their contribution to the world's food supply has been largely ignored and consequently their stake in development has been undermined. This book is both a resource guide and a review of major issues in gender and agriculture which demonstrates that recognizing the contribution of women to agricultural production is a necessary step in development planning. It presents relevant information and research literature regarding women's roles in agriculture in a consolidated and accessible format offering insights into how the inclusion or exclusion of appropriate information at the planning stage can have an impact during implementation. It also provides guidelines for locating information on gender-related agricultural issues and incorporating it into development planning, research and training. The literature reviewed not only calls attention to the work women do in order to improve their access to technology and training but also challenges existing development paradigms. The issues discussed present women's experiences and local knowledge and allude to gender and class inequities that farming women face. Each chapter is intended to help the reader address major gender issues in a specific subject in order to access relevant information and thereby better design and implement appropriate agricultural planning and policies. By synthesizing twenty years of international research, *Gender and Agricultural Development* provides an effective tool for development practitioners to use in training programs or surveys in order to ensure the appropriate collection of gender disaggregated data and for educators to integrate gender issues into courses dealing with social aspects of agricultural systems. Its findings are presented in such a way as to allow them to be easily incorporated into innovative planning for more sustainable and equitable agricultural policies.

Production Technology of Stone Fruits Mohammad Maqbool Mir, Umar Iqbal, Shabir Ahmad Mir, 2021-01-04 Globally stone fruits are emerging in the market due to the increased consumer's desire for health promoting foods. Stone fruits attract research attention mainly due to the cultural and commercial aspects of the array of varieties that are grown. Being grown in a wide range of environments it is very important to understand what factors influence the production and quality attributes of stone fruits. There is a lack of systematic scientific information on strategic approach for production technologies of such fruits. This book will be first of its kind focusing on technological aspects of stone fruits especially on latest developments in present day horticulture. It will be an essential reference for professionals including academicians, scholars, researchers and industries working in the said area. We hope that readers will find this book a useful resource for their research or studies and it will be helpful in the development of high quality stone fruits in future which will improve the economic and social life of people. Besides this book fulfills the needs of a number of horticultural courses of Universities and will serve as a pomological manual for all occasions.

Advances in Nano-Fertilizers and Nano-Pesticides in Agriculture Sudisha Jogaiah, Harikesh Bahadur Singh, Leonardo Fernandes Fraceto, Renata De Lima, 2020-11-26 Advances in Nano fertilizers and Nano pesticides in Agriculture. A Smart Delivery System for Crop Improvement explores the use of nanotechnology for the controlled delivery of

pesticides herbicides and fertilizers that improve the safety of products while also increasing the efficiency of food production and decreased environmental pollution The development of nanodevices such as smart delivery systems to target specific sites as well as nanocarriers for chemical controlled release are currently important aspects in novel agriculture and require a strong foundation of understanding not only the technology but also the resulting impacts Fills key knowledge gaps of bio nanotechnology how they interact with plant cells and their biological consequences Focuses on agro nanotechnology which can be utilized for developing healthy seeds Explores the possibilities of macronutrient nano based fertilizers
