Ute Reference Grammar Culture And Language Use:

Ute Reference Grammar Talmy Givón, 2011-01-01 Ute is a Uto Aztecan language of the northernmost Numic branch currently spoken on three reservations in western Colorado and eastern Utah Like many other native languages of Northern America Ute is severely endangered This book is part of the effort toward its preservation Typologically Ute offers a cluster of intriguing features best viewed from the perspective of diachronic change and grammaticalization The book presents a comprehensive synchronic description of grammatical structures and their communicative functions as well as a diachronic account of a grammar in the midst of change The book is the first of a 3 volume series which also includes a collection of oral texts and a dictionary Ute speakers and tribal members may find in the present volume a step by step description of how words are combined into meaningful communication Linguists may find a detailed account of one language an account that is unabashedly informed by universals of grammar communication and change

Typology of Pluractional Constructions in the Languages of the World Simone Mattioli, 2019-04-24 The aim of this book is to give the first large scale typological investigation of pluractionality in the languages of the world Pluractionality is defined as the morphological modification of the verb to express a plurality of situations that can additionally involve a plurality of participants and or spaces Based on a 246 language sample the main characteristics of pluractionality are described and discussed throughout the book Firstly a description of the functions that pluractional markers cross linguistically express is presented and the relationships occurring among them are explained through the semantic map model Then the marking strategies that languages display to express such functions are illustrated and some issues concerning the formal identification are briefly discussed as well The typological generalizations are corroborated showing how pluractional markers work in three specific languages Akawaio Beja Maa In conclusion the theoretical conceptualization of pluractionality is discussed referring to the Radical Construction Grammar approach

The Persistence of Language Shannon T. Bischoff, Deborah Cole, Amy V. Fountain, Mizuki Miyashita, 2013-05-28 This edited collection presents two sets of interdisciplinary conversations connecting theoretical methodological and ideological issues in the study of language In the first section Approaches to the study of the indigenous languages of the Americas the authors connect historical theoretical and documentary linguistics to examine the crucial role of endangered language data for the development of biopsychological theory and to highlight how methodological decisions impact language revitalization efforts Section two Approaches to the study of voices and ideologies connects anthropological and documentary linguistics to examine how discourses of language contact endangerment linguistic purism and racism shape scholarly practice and language policy and to underscore the need for linguists and laypersons alike to acquire the analytical tools to deconstruct discourses of inequality Together these chapters pay homage to the scholarship of Jane H Hill demonstrating how a critical interdisciplinary linguistics narrows the gap between disparate fields of analysis to treat the ecology of language in its entirety

The Languages and Linguistics of Mexico and Northern Central America Søren

Wichmann,2024-12-16 The handbook provides a thorough survey of the languages pertaining to the Mesoamerican culture region including a wealth of new research on synchronic structures and historical linguistics of lesser known languages also including sign languages The volume moreover features overviews of recent research on topics such as language acquisition and the expression of spatial orientation across languages of the region

Finiteness and Nominalization Claudine Chamoreau,Zarina Estrada-Fernández,2016-06-23 This volume addresses the relation between finiteness and nominalization which is far more complex than the simple opposition finite nonfinite The contributions analyze finiteness cross linguistically from both synchronic and diachronic perspectives focusing on a number of topics that has not been thoroughly explored in the literature First the correlation between finiteness and nominalization is also affected by a third factor information structure Second there is a correlation between the continuum of finiteness and the scale from main independent clauses to dependent clauses Given that of nominalized constructions occur not only in dependent clauses but also in independent clauses it is possible to grade according to degree of nominalization which can then be related to the scale of finiteness Finally each of these scales can also be seen as a product the diachronic process of re finitization and of finitization

Formal Studies in Slovenian Syntax Franc Lanko Marušič,Rok Žaucer,2016-12-15 Although in the early days of generative linguistics Slovenian was rarely called on in the development of theoretical models the attention it gets has subsequently grown so that by now it has contributed to generative linguistics a fair share of theoretically important data With 13 chapters that all build on Slovenian data this book sets a new milestone The topics discussed in the volume range from Slovenian clitics which are called on to shed new light on the intriguing Person Case Constraint and to provide part of the evidence for a new generalization relating the presence of the definite article and Wackernagel clitics to functional elements such as the future auxiliary and possibility modals the latter of which are discussed also from the perspective of language change Even within the relatively well researched topics like wh movement new findings are presented both in relation to the structure of the left periphery and to the syntax of relative clauses

Typological Hierarchies in Synchrony and Diachrony Sonia Cristofaro,Fernando Zúñiga,2018-07-15 Typological hierarchies are widely perceived as one of the most important results of research on language universals and linguistic

diversity Explanations for typological hierarchies however are usually based on the synchronic properties of the patterns described by individual hierarchies not the actual diachronic processes that give rise to these patterns cross linguistically This book aims to explore in what ways the investigation of such processes can further our understanding of typological hierarchies To this end diachronic evidence about the origins of several phenomena described by typological hierarchies is discussed for several languages by a number of leading scholars in typology historical linguistics and language documentation This evidence suggests a rethinking of possible explanations for typological hierarchies as well as the very notion of typological universals in general For this reason the book will be of interest not only to the broad typological community but also historical linguists cognitive linguists and psycholinguists

Highly complex syllable structure: A typological and diachronic study Shelece Easterday, 2019-11-13 The syllable is a natural unit of organization in spoken language whose strongest cross linguistic patterns are often explained in terms of a universal preference for the CV structure Syllable patterns involving long sequences of consonants are both typologically rare and theoretically marginalized with few approaches treating these as natural or unproblematic structures This book is an investigation of the properties of languages with highly complex syllable patterns The two aims are i to establish whether these languages share other linguistic features in common such that they constitute a distinct linguistic type and ii to identify possible diachronic paths and natural mechanisms by which these patterns come about in the history of a language These issues are investigated in a diversified sample of 100 languages 25 of which have highly complex syllable patterns Languages with highly complex syllable structure are characterized by a number of phonetic phonological and morphological features which serve to set them apart from languages with simpler syllable patterns These include specific segmental and suprasegmental properties a higher prevalence of vowel reduction processes with extreme outcomes and higher average morpheme word ratios The results suggest that highly complex syllable structure is a linguistic type distinct from but sharing some characteristics with other proposed holistic phonological types including stress timed and consonantal languages The results point to word stress and specific patterns of gestural organization as playing important roles in the diachronic development of these patterns out of simpler syllable structures

Social Structure, Space and Possession in Tongan Culture and Language Svenja Völkel, 2010 This interdisciplinary study investigates the relationship between culture language and cognition based on the aspects of social structure space and possession in Tonga Polynesia Grounded on extensive field research Völkel explores the subject from an anthropological as well as from a linguistic perspective The book provides new insights into the language of respect an honorific system which is deeply anchored in the societal hierarchy spatial descriptions that are determined by socio cultural and geocentric parameters kinship terminology and possessive categories that perfectly express the system of social status inequalities among relatives These examples impressively show that language is deeply anchored in its cultural context Moreover the linguistic structures reflect the underlying cognitive frame of its speakers Just as several cultural

practices sitting order access to land and gift exchange processes the linguistic means are not only expressions of stratified social networks but also tools to maintain or negotiate the underlying socio cultural system *Ute Dictionary* T.

Givón,2016-03-31 This third volume of our Ute language collection contains the Ute dictionary It opens with several introductory chapters that link the dictionary to our Ute Reference Grammar 2011 and explain the structure and use of the dictionary The bulk of the information on the meaning and usage of Ute words is then given in the Ute English part The English Ute part next serves primarily as a search and reference tool A short section on traditional semantic cultural fields follows Ute is a Northern Uto Aztecan language of the Numic sub family Together with its northern dialects Southern Paiute Uintah White River it should be considered a single language N uchi of the people or N u apaghapi the people s speech While our work was done primarily in the southern dialects Southern Ute Ute Mountain Uncompaghre we have included as many words as could be safely extracted from Powel s and Smith s work on the northern dialects as well as some from Sapir s work 1931 on Northern Ute adjusting them to Southern dialect pronunciation This brings the work as close as one could hope at this time to a comprehensive all Ute dictionary a task that yet remains to be done We have tried to emphasize in the Ute English entries the historical and derivational connectivity of Ute vocabulary and its gradual growth and expansion This is also underscored in the introductory chapter on word derivation While this work remains incomplete we hope it can be some day expanded into an all inclusive Ute dictionary and will help the people N uchiu preserve their language and culture

separately from traditional person or number marking In the 50 years since William Jacobsen's coinage of the term switch reference has evolved from an exotic phenomenon found in a handful of lesser known languages to a widespread feature found in geographically and linguistically unconnected parts of the world The growing body of information on the topic raises new theoretical and empirical questions about the development functions and nature of switch reference as well as the internal variation between different switch reference systems The contributions to this volume discuss these and other questions for a wide variety of languages from all over the world and endeavour to demonstrate the full functional and morphosyntactic range of the phenomenon

Accessing Noun-Phrase Antecedents (RLE Linguistics B: Grammar) Mira Ariel, 2014-02-03 Accessing Noun Phrase Antecedents offers a radical shift in the analysis of discourse anaphora from a purely pragmatic account to a cognitive account in terms of processing procedures Mira Ariel defines referring expressions as markers signalling the degree of Accessibility in memory of the antecedent The notion of Accessibility is explicitly defined the crucial factors being the Salience of the antecedent and the Unity between the antecedent and the anaphor This analysis

yields an astonishing array of new results The precise distribution of referring expressions in actual discourse is directly predicted Several universals of anaphoric relations are stated Thus although not all languages necessarily have the same markers and nor do they assign them precisely the same function Ariel shows that they all obey the same Accessibility marking hierarchy This book will be compulsory reading for anyone with an interest in the semantics and pragmatics of referring expressions in the interaction of semantics and pragmatics and more generally in the interaction between peripheral and central cognitive systems

New Perspectives on Endangered Languages José Antonio Flores Farfán, Fernando F. Ramallo, 2010 Understanding sociolinguistics as a theoretical and methodological framework hopefully could attempt to promote change and social development in human communities Yet it still presents important political epistemological methodological and theoretical challenges A sociolinguistics of development in which the revitalization of linguistic communities is the priority opens new perspectives for the emerging field of linguistic documentation in which the societal aspects of research stressed by sociolinguistics have frequently been marginal The need to focus on the documentation of linguistic communities to contribute to the revitalization of these communities requires an in depth revision of a number of different perspectives Especially regarding the links between commonly separated fields of enquiry such as sociolinguistics documentation and revitalization Instead of creating mere museum pieces of academic contemplation for the future as has been the major trend up to now in language documentation and even sociolinguistics there is a growing concern to join forces to revitalize the actual use of endangered languages in order to place languages as a main focus of a community s development which constitutes a major challenge for both scholars civil society and speakers alike
