UMass Rising Katharine Greider, 2013 In 1863 just a year after Congress enacted the Land Grant Colleges Act Massachusetts Agricultural College embarked on its mission to offer instruction to the state's citizens in the agricultural mechanical and military arts The school boasted a faculty of 4 and a student body of 56 As UMass Amherst celebrates its sesquicentennial in 2013 its full time faculty numbers nearly 1 200 and the combined undergraduate graduate student population is close to 28 000 The principles that undergirded Mass Aggie's founding continue to form the basis for UMass Amherst's mission of preparing young people to make their way in life by stretching boundaries in all disciplines from the physical and social sciences to the liberal arts UMass Rising looks at the school over the course of its first 150 years and mines that history to reveal not only how these principles have been fostered but also the whys and whos The engaging text is enhanced by features on all aspects of life at this unique university The reader encounters a cavalcade of notable people as well as many little known anecdotes from the humorous to the touching All are anchored by a gathering of contemporary and archival images some published here for the first time Distributed for the University of Massachusetts Amherst by University of Massachusetts Press *Cultural Competence in Applied Psychology* Craig L. Jeffrey Peterson draws a comprehensive picture of how storms and rising seas will change the coast Peterson offers a clear eyed assessment of how governments can work with the private sector and citizens to be better prepared for the coming coastal inundation Drawing on four decades of experience at the Environmental Protection Agency and the United States Senate Peterson presents the science behind predictions for coastal impacts He explains how current policies fall short of what is needed to effectively prepare for these changes and how the Trump Administration has significantly weakened these efforts While describing how and why the current policies exist he builds a strong case for a bold new approach tackling difficult topics including how to revise flood insurance and disaster assistance programs when to step back from the coast rather than build protection structures how to steer new development away from at risk areas and how to finance the transition to a new coast Key challenges including how to protect critical infrastructure ecosystems and disadvantaged populations are examined Ultimately Peterson offers hope in the form of a framework of new national policies and programs to support local and state governments He calls for engagement from the private sector and local and national leaders in a campaign for a new coast A New Coast is a compelling assessment of the dramatic changes that are coming to America s coast Peterson offers insights and strategies for policymakers planners and business leaders preparing for the intensifying impacts of climate change along the coast

The Handbook of Civil Society in Africa Ebenezer Obadare, 2013-09-21 This volume brings together the most up to date analyses of civil society in Africa from the best scholars and researchers working on the subject Being the first of its kind it casts a panoramic look at the African continent drawing out persisting if often under communicated variations in regional discourses In a majority of notionally global studies Africa has received marginal attention a marginality often highlighted by the usual token chapter Filling a critical hiatus the Handbook of Civil Society in Africa takes Africa African developments and African perspectives very seriously and worthy of academic interrogation in their own right It offers a critical clear sighted perspective on civil society in Africa and positions African discourses within the framework of important regional and global debates It promises to be an invaluable reference work for researchers and practitioners working in the fields of civil society nonprofit studies development studies volunteerism civic service and African studies Endorsements This volume signposts a critical turning point in the renewed engagement with the theory and practice of civil society in Africa Moving from traditional concerns with disquisitions on the appropriateness and possibility of the existence and vibrancy of the idea of civil society on the continent the volume approaches the forms contents and features of the actually existing civil society in Africa from thematic regional and national angles It demonstrates clearly the extent to which core intellectual work on civil society in Africa has largely moved from concerns with cultural reductionism to a nuanced examination of the complexities of formal non formal organizational non organizational traditional newer usual unusual engagements detailing the extent to which over time civil society as a concept has been indigenized appropriated and

adapted in the terrains of politics society economy culture and new technologies on the continent In all this the book accomplishes the near impossible Without sacrificing the vigour rigor and freshness of the often unpredictable fruits of up to date research into regional and national differences that crop up in the documentation of Africa s multiple realities and discourses the volume weaves together a rich tapestry of the historical theoretical and practical dimensions of an expanding civil society sector and accompanying growth in popular discourse advocacy and academic literature in such a diverse continent as Africa into a meaningful whole of insightful themes Written and edited by a very distinguished cross continental and multi disciplinary collection of researchers research students practitioners and activists the volume provides cutting edge evidence and makes a definitive case for a new lease of life for civil society research in Africa Adigun Agbaje Professor of Political Science University of Ibadan Nigeria Throughout Africa forms of civic engagement and political participation have seen dynamic change in recent decades yet conceptions of civil society have rarely accounted for this evolution This volume is an essential source of new thinking about political association and collective action in Africa The authors offer a wealth of analysis on changing organizations and social movements new forms of interaction and communication emerging strategies and issues diverse social foundations and the theoretical implications of a shifting associational landscape The contributors provide an invaluable addition to the comparative literature on political change democratic development and social movements in Africa Peter Lewis Johns Hopkins University School of Advanced international Studies Principles and Practice of Sport Management Lisa Pike Masteralexis, Carol A. Mercille, 2014-08-27 The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent it has failed to revive economies The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light even if the latter s aim has been to shift the burden of adjustment onto citizens This book explains how and why using a critical political economic perspective and focusing on the case of Ireland Throughout Ireland is compared with contemporary and historical examples to contextualise the arguments made The book covers the housing bubble that led to the crash the rescue of financial institutions by the state the role of the European institutions and the International Monetary Fund austerity and the possibility of leaving the eurozone for Europe s peripheral countries Through a systematic analysis of Ireland s main newspapers it is argued that the media reflect elite views and
