Uncertainties Of Knowledge Politics History And Social Chan:

The Uncertainties of Knowledge Immanuel Maurice Wallerstein, 2004 The *Uncertainties of Knowledge* extends Immanuel Wallerstein's decade long work of elucidating the crisis of knowledge in current intellectual thought. He argues that the disciplinary divisions of academia have trapped us in a paradigm that assumes knowledge is a certainty and that it can help us explain the social world. This is wrong, he suggests. Instead, Wallerstein offers a new conception of the social sciences, one whose methodology allows for uncertainties. Author note: Immanuel Wallerstein is Director of the Fernand Braudel Center, Binghamton University and Senior Research Scholar at Yale University.

The Uncertainties of Knowledge Immanuel Maurice Wallerstein, 2004 In *The Uncertainties of Knowledge*, Immanuel Wallerstein extends his work over the last decade of elucidating the crisis of knowledge in current intellectual thought. Arguing that the current disciplinary divisions of academia, produced by a previous crisis of knowledge, have left us trapped in a paradigm that assumes knowledge is a certainty that can help us explain the social world, Wallerstein offers us a new way of imagining the social sciences, one which allows for uncertainties and for methods of studying our world and its historical place.

Mediating Climate Change Dr Julie Doyle, 2013-01-28 Climate change has been a significant area of scientific concern since the late 1970s but has only recently entered mainstream culture and politics. However, as media coverage of climate change increases in the twenty-first century, the gap between our understanding of climate change and climate action appears to widen. In this timely book, Julie Doyle explores how practices of mediation and visualisation shape how we think about, address, and act upon climate change. Through historical and contemporary case studies drawn from science, media, politics, and culture, *Mediating Climate Change* identifies the representational problems climate change poses for public and political debate. It offers ways forward by exploring how climate change can be made more meaningful through, for example, innovative forms of climate activism, the reframing of meat and dairy consumption, media engagement with climate events and science, and artistic experimentation. Doyle argues that cultural discourses have problematically situated nature and the environment as objects externalised from humans and culture. *Mediating Climate Change* calls for a more nuanced understanding of human environmental relations in order for us to be able to more fully imagine and address the challenges climate change poses for us all.
