Understanding Environmental Policy Processes Cases From Africa By James Keeley 2003 04 01:

Negotiating Territoriality Allan Charles Dawson, Laura Zanotti, Ismael Vaccaro, 2014-07-11 This edited collection disrupts dominant narratives about space states and borders bringing comparative ethnographic and geographic scholarship in conversation with one another to illuminate the varied ways in which space becomes socialized via political economic and cognitive appropriation Societies must first and foremost do more than wrangle over ownership and land rights they must dwell in space Yet historically the interactions between the state's territorial imperative with previous forms of landscape management have unfolded in a variety of ways including top down imposition resistance and negotiation between local and external actors These interactions have resulted in hybrid forms of territoriality and are often fraught with fundamentally different perceptions of landscape This book foregrounds these experiences and draws attention to situations in which different social constructions of space and territory coincide collide or overlap Each ethnographic case in this volume presents forms of territoriality that are contingent upon contested histories politics landscape the presence or absence of local heterogeneity and the involvement of multiple external actors with differing motivations ultimately all resulting in the potential for conflict or collaboration and divergent implications for conceptions of community autochthony and identity

The SAGE Handbook of Research Management Robert Dingwall, Mary Byrne McDonnell, 2015-08-17 The Handbook of Research Management is a unique tool for the newly promoted research leader Larger scale projects are becoming more common throughout the social sciences and humanities housed in centres institutes and programmes Talented researchers find themselves faced with new challenges to act as managers and leaders rather than as individual scholars They are responsible for the careers and professional development of others and for managing interactions with university administrations and external stakeholders Although many scientific and technological disciplines have long been organized in this way few resources have been created to help new leaders understand their roles and responsibilities and to reflect on their practice This Handbook has been created by the combined experience of a leading social scientist and a chief executive of a major international research development institution and funder The editors have recruited a truly global team of contributors to write about the challenges they have encountered in the course of their careers and to provoke readers to think about how they might respond within their own contexts This book will be a standard work of reference for new research leaders in any discipline or country looking for help and inspiration The editorial commentaries extend its potential use in support of training events or workshops where groups of new leaders can come together and explore the issues that are confronting them

Global Matters for Non-Governmental Public Action J. Howell, 2012-09-24 Jude Howell brings together eight in depth studies of the politics of global non governmental public action Covering detailed empirical research around the themes of environmentalism security children's rights and more the contributors explore the complex politics amongst non governmental public actors acting transnationally

International Handbook of Urban Policy: Contentious

global issues H. S. Geyer, 2007-01-01 This first Handbook in a series of three original reference works looks at globally contentious urban policy issues from a wide variety of different angles and perspectives Matters related to urban densification population mobility urban inequality and sustainability are analysed in a manner that will not only interest the advanced student but also the novice Urban policy covers a vast field This first volume combines chapters covering three broad themes policy issues pertaining to the spatial aspects of the city social and mobility issues and issues of urban governance The spotlight initially falls on urban structure urban densification the disappearing urban rural divide the urban economic landscape and the transformation of socialist economies The Handbook then goes on to focus on migration social mobility crime terrorism and social inequality Finally urban sustainability and urban governance come under the spotlight Integration of the planning process flexibilities in infrastructure and areas of neglect in environmental management feature strongly in this section of the Handbook Books of this nature are often slanted in one particular direction however this Handbook's approach is different Not only has the editor avoided shying away from politically sensitive issues but contributions have also been included that reflect distinct differences of opinion on politically sensitive issues hence the volume's subtitle of contentious global issues As a Handbook the chapters have been written not only for the advanced student and academics but also with undergraduate students in mind The Handbook will appeal to scholars and researchers of geography and urban and development planning demography and social science and environmental scientists for the focus on urban sustainability issues *American Book Publishing Record*, 2003 **Sharing Power** Grazia Borrini-Feyerabend, M. Taghi Farvar, Yves Renard, Michel Pimbert, Ashish Kothari, Yves Renard with Hanna Jaireth, Marshall Murphree, Vicki Pattemore, Ricardo Ramírez, Patrizio Warren, 2013-09-13 The collaborative orco management of natural resources whether between states and local communities or amongst and within communities themselves is a process of collective understanding and actions to bring about negotiated agreements on roles rights and responsibilities for decentralized governance of natural resources At heart co management is about sharing power one of the most difficult but rewarding experiences in personal and social life The book is designed for professionals and people involved in practical co management processes and distils a wealth of experience and innovative approaches learned by doing It begins by offering a variety of vistas from historical analyses to a clear grasp of key concepts Illustrated in detail is the understanding accumulated in recent decades on starting points for co management conditions and methods for successful negotiations ideas to manage conflicts and types of agreements and co management institutions emerging from the negotiation tables Simple tools such as checklists distilled from different situations and contexts are offered throughout Examples and insights from experience highlight the importance of participatory democracy the enabling contexts where sharing power is ultimately possible and successful Published with IIED and IUCN *Beyond the Gatekeeper State* Sara Rich Dorman, 2020-11-25 *Beyond the Gatekeeper State* explores the dynamic changes occurring within and between African states

and the international system since the turn of the century Frederick Cooper's model of gatekeeper states shaped as much by their international links as by their domestic practices provides the basis for the contributors thinking about international relations in Africa and the wider international system The chapters explore the political implications of Africa's new relations with the old super powers former colonial powers and the emerging powers from the South These new relationships reflect and affect changing technology infrastructure and resource flows within and between African states Drawing on both rich empirical cases and theoretical approaches the book interrogates the implications of these changes on how we think about states and state systems Exploring the impact of changing technology finance and resources on African politics Beyond the Gatekeeper State will be of great interest to scholars of African Politics and International Relations IR as well as African Studies IR and the politics of the Global South more broadly This book was originally published as a special issue of Third World Thematics

The Biotech Developmental State? James Keeley, 2003 The paper looks at how and why China has so vigorously pursued his biotech path looking in particular at the role of science policy networks in promoting a biotechnology discourse It also looks at the particular challenges associated with developing a domestic biotech industry while managing multinationals such as Monsanto
