It includes answers to quiz questions and questions to think about in the book and worked out calculations for many of the problems in the book. It also includes suggestions for teachers on how to present material in the book, an explanation of the structure of the book and supplementary material including references and links available when the fifth edition of the book was published in 2006. The author has not tried to update links other than his own.

Instructor's Manual to Accompany Understanding Fiber Optics, Fifth Edition Jeff Hecht, The Instructor's Manual is a companion to the fifth edition of Understanding Fiber Optics for both instructors teaching a class and learners studying on their own or in a class. It explains the organization of the book and a strategy for using it to learn about fiber optics. It also answers questions that were asked in the book. In addition to giving the answers for multiple choice quizzes, it elaborates on questions to think about and gives worked out answers for problems displaying the calculations so learners can follow the process of getting an answer. This supplements the book's goals of helping readers understand fiber optics and their applications. Publisher of the Instructor Manual: LaserLight Press, Auburndale, Massachusetts.
