Emch, R. Sridharan, M. D. Srinivas, 2005-10-15 This volume consists of a collection of articles based on lectures given by scholars from India Europe and USA at the sessions on History of Indian Mathematics at the AMS India mathematics conference in Bangalore during December 2003 These articles cover a wide spectrum of themes in Indian mathematics They begin with the mathematics of the ancient period dealing with Vedic Prosody and Buddhist Logic move on to the work of Brahmagupta of Bhaskara and that of the mathematicians of the Kerala school of the classical and medieval period and end with the work of Ramanujan and Indian contributions to Quantum Statistics during the modern era The volume should be of value to those interested in the history of mathematics **White Noise Analysis And Quantum Information** Luigi Accardi, Louis Hsiao Yun Chen, Takeyuki Hida, Masanori Ohya, Si Si, Noboru Watanabe, 2017-08-29 This volume is to pique the interest of many researchers in the fields of infinite dimensional analysis and quantum probability These fields have undergone increasingly significant developments and have found many new applications in particular to classical probability and to different branches of physics These fields are rather wide and are of a strongly interdisciplinary nature For such a purpose we strove to bridge among these interdisciplinary fields in our Workshop on IDAQP and their Applications that was held at the Institute for Mathematical Sciences National University of Singapore from 3 7 March 2014 Readers will find that this volume contains all the exciting contributions by well known researchers in search of new directions in these fields **Infinite Dimensional Stochastic Analysis** Hui-Hsiung Kuo, Ambar N. Sengupta, Padmanabhan Sundar, 2008 This volume contains current work at the frontiers of research in infinite dimensional stochastic analysis It presents a carefully chosen collection of articles by experts to highlight the latest developments in white noise theory infinite dimensional transforms quantum probability stochastic partial differential equations and applications to mathematical finance Included in this volume are expository papers which will help increase communication between researchers working in these areas The tools and techniques presented here will be of great value to research mathematicians graduate students and applied mathematicians *Commonwealth Universities Yearbook*, 1926 *Estimates and Asymptotics for Discrete Spectra of Integral and Differential Equations* M. Sh Birman, 1991 The Leningrad Seminar on mathematical physics begun in 1947 by V I Smirnov and now run by O A Ladyzhenskaya is sponsored by Leningrad University and the Leningrad Branch of the Steklov Mathematical Institute of the Academy of Sciences of the USSR The main topics of the seminar center on the theory of

boundary value problems and related questions of analysis and mathematical physics This volume contains adaptations of lectures presented at the seminar during the academic year 1989-1990 For the most part the papers are devoted to investigations of the spectrum of the Schrodinger operator or its generalizations perturbed by some relatively compact operator The book studies the discrete spectrum that emerges in the spectral gaps of the nonperturbed operator and considers the corresponding estimates and asymptotic formulas for spectrum distribution functions in the large coupling constant limit The starting point here is the opening paper which is devoted to the important case of a semi infinite gap The book also covers the case of inner gaps related questions in the theory of functions and an integral equation with difference kernel on a finite interval The collection concludes with a paper focusing on the classical problem of constructing scattering theory for the Schrodinger operator with potential decreasing faster than the Coulomb potential Dirac and Feynman

Ministry of Statistics and Programme Implementation, 2004 **Mathematical Reviews**, 2006 **Analysis, Geometry and Probability** Rajendra Bhatia, 1996 This book is a collection of expository articles by well known mathematicians Some of them introduce the reader to a major topic while others provide a glimpse into an active field of research All articles are accessible to graduate students The articles were invited in honour of K R Parthasarathy a mathematician teacher and expositor of renown Some of the articles by his coworkers are related to his work on probability quantum probability and group representations Others are on diverse topics in analysis geometry and number theory **Zeitschrift für Naturforschung**, 1980 **Journal of physical sciences**, 1980 Canadian Journal of Physics, 1986 Journal of Operator Theory, 1995 Noncommutative Harmonic Analysis with Applications to Probability Marek Bożejko, 2007
