American Philosophical Association

Universals An Opinionated Introduction Focus Series:

Universals D. M. Armstrong, 2018-05-04 In this short text a distinguished philosopher turns his attention to one of the oldest and most fundamental philosophical problems of all How it is that we are able to sort and classify different things as being of the same natural class Professor Armstrong carefully sets out six major theories ancient modern and contemporary and assesses the strengths and weaknesses of each Recognizing that there are no final victories or defeats in metaphysics Armstrong nonetheless defends a traditional account of universals as the most satisfactory theory we have This study is written for advanced students but as Armstrong goes considerably beyond his earlier work on this topic it will interest professional scholars as well Carefully plotted and clearly written *Universals* is both a paradigm of exposition and a case study on the value of careful analysis of fundamental issues in philosophy

The Routledge Handbook of Modality Otávio Bueno, Scott A. Shalkowski, 2020-12-29 Modality the question of what is possible and what is necessary is a fundamental area of philosophy and philosophical research The Routledge Handbook of Modality is an outstanding reference source to the key topics problems and debates in this exciting subject and is the first collection of its kind Comprising thirty five chapters by a team of international contributors the Handbook is divided into seven clear parts worlds and modality essentialism ontological dependence and modality modal anti realism epistemology of modality modality in science modality in logic and mathematics modality in the history of philosophy Within these sections the central issues debates and problems are examined including possible worlds essentialism counterfactuals ontological dependence modal fictionalism deflationism the integration challenge conceivability a priori knowledge laws of nature natural kinds and logical necessity The Routledge Handbook of Modality is essential reading for students and researchers in epistemology metaphysics and philosophy of language It will also be very useful for those in related fields in philosophy such as philosophy of mathematics logic and philosophy of science

Formal Ontology in Information Systems Brandon Bennett, Christiane Fellbaum, 2006 Aims to provide a forum for genuine interdisciplinary exchange in the spirit of a unified effort towards solving the problems of ontology with an eye to both theoretical issues and concrete applications This book contains a range of areas all of which are important to the development of formal ontologies

Luciano Floridi's Philosophy of Technology Hilmi Demir, 2012-06-15 Information and communication technologies of the 20th century have had a significant impact on our daily lives They have brought new opportunities as well as new challenges for human development The Philosopher Luciano Floridi claims that these new technologies have led to a revolutionary shift in our understanding of humanity's nature and its role in the universe Floridi's philosophical analysis of new technologies leads to a novel metaphysical framework in which our understanding of the ultimate nature of reality shifts from a materialist one to an informational one In this world all entities be they natural or artificial are analyzed as informational entities This book provides critical reflection to this idea in four different areas Information Ethics and The Method of Levels of Abstraction The Information Revolution and Alternative

American Philosophical Association,1990 List of members in v 1 *The Divine Lawmaker* John

Foster,2004-01-15 John Foster presents a clear and powerful discussion of a range of topics relating to our understanding of the universe induction laws of nature and the existence of God He begins by developing a solution to the problem of induction a solution whose key idea is that the regularities in the workings of nature that have held in our experience hitherto are to be explained by appeal to the controlling influence of laws as forms of natural necessity His second line of argument focuses on the issue of what we should take such necessitational laws to be and whether we can even make sense of them at all Having considered and rejected various alternatives Foster puts forward his own proposal the obtaining of a law consists in the causal imposing of a regularity on the universe as a regularity With this causal account of laws in place he is now equipped to offer an argument for theism His claim is that natural regularities call for explanation and that whatever explanatory role we may initially assign to laws the only plausible ultimate explanation is in terms of the agency of God Finally he argues that once we accept the existence of God we need to think of him as creating the universe by a method which imposes regularities on it in the relevant law yielding way In this new perspective the original nomological explanatory solution to the problem of induction becomes a theological explanatory solution The Divine Lawmaker is bold and original in its approach and rich in argument The issues on which it focuses are among the most important in the whole epistemological and metaphysical spectrum *Ontology and the Ambitions of Metaphysics* Thomas Hofweber,2016-08-11 Many significant problems in metaphysics are tied to ontological questions but ontology and its relation to larger questions in metaphysics give rise to a series of puzzles that suggest that we don't fully understand what ontology is supposed to do nor what ambitions metaphysics can have for finding out about what reality is like Thomas Hofweber aims to solve these puzzles about ontology and consequently to make progress on four central metaphysical problems the philosophy of arithmetic the metaphysics of ordinary objects the problem of universals and the question of whether the reality is independent of us Crucial parts of the proposed solution involve considerations about quantification and its relationship to ontology the place of reference in natural languages the possibility of ineffable facts the extent of empirical evidence in metaphysics and whether metaphysics can be properly esoteric Overall Hofweber defends a rationalist account of arithmetic an empiricist picture in the philosophy of ordinary objects a restricted form of nominalism and realism about reality understood as all there is but idealism about reality understood as all that is the case He defends metaphysics as having some questions of fact that are distinctly its own with a limited form of autonomy from other parts of inquiry but rejects several metaphysical projects and approaches as being based on a mistake *Oxford Studies in Ancient Philosophy, Volume 52* Victor Caston,2017-07-27

Oxford Studies in Ancient Philosophy is a volume of original articles on all aspects of ancient philosophy The articles may be

of substantial length and include critical notices of major books OSAP is now published twice yearly in both hardback and paperback Have you seen the latest OSAP is what scholars of ancient philosophy say to each other when they meet in corridors or on coffee breaks Whether you work on Plato or Aristotle on Presocratics or sophists on Stoics Epicureans or Sceptics on Roman philosophers or Greek Neoplatonists you are liable to find OSAP articles now dominant in the bibliography of much serious published work in your particular subject not safe to miss Malcolm Schofield Cambridge University OSAP was founded to provide a place for long pieces on major issues in ancient philosophy In the years since it has fulfilled this role with great success over and over again publishing groundbreaking papers on what seemed to be familiar topics and others surveying new ground to break It represents brilliantly the vigour and the increasingly broad scope of scholarship in ancient philosophy and shows us all how the subject should flourish M M McCabe King s College London

Oxford Studies in Metaphysics Dean W. Zimmerman, 2006 This series is dedicated to the timely publication of new work in this highly fertile field of philosophy The subject is broadly construed taken to include not only perennially central topics modality ontology and mereology metaphysical theories of causation laws of nature persistence through time and time itself and realism and anti realism in the many senses of these terms but also the rich clusters of metaphysical questions that open up within other subfields such as philosophy of mind and philosophy of science questions about supervenience and materialism the nature of qualia mental causation metaphysical implications of relativity and quantum physics mereological theories of biological species and so on Besides independent essays volumes are likely to contain a critical essay on a recent book or a symposium that allows participants to respond to one another s criticisms and questions Encyclopaedia

Metropolitana; Or, Universal Dictionary of Knowledge on an Original Plan Comprising the Twofold Advantage of a Philosophical and an Alphabetical Arrangement, with Appropriate Engravings Edited by Edward Smedley, Hugh James Rose, Henry John Rose , 1845

The Idea of International Human Rights Law Steven Wheatley, 2019-01-17 International human rights law has emerged as an academic subject in its own right separate from but still related to international law This book explains the distinctive nature of this discipline by examining the influence of the idea of human rights on general international law Rather than make use of a particular moral philosophy or political theory it explains human rights by examining the way the term is deployed in legal practice on the understanding that words are given meaning through their use Relying on complexity theory to make sense of the legal practice of the United Nations the core human rights treaties and customary international law the work demonstrates the emergence of the moral concept of human rights as a fact of the social world It reveals the dynamic nature of this concept and the influence of the idea on the legal practice a fact that explains the fragmentation of international law and special nature of international human rights law **US Hegemony and**

the Project of Universal Human Rights T. Evans, 1996-03-18 Human rights is often claimed as the idea of our time However although considerable time energy and resources have been invested in the idea and extravagant claims are often

made about progress in providing machinery for the protection of human rights there are few signs that violations are any less common than in the past This book argues that while the USA was instrumental in establishing the idea of human rights as a dominant theme in the day to day rhetoric of international relations powerful economic and political interests succeeded in ensuring that a strong international regime for the protection of human rights did not emerge *The Bloomsbury Companion to Metaphysics* Neil A. Manson, Robert W. Barnard, 2014-12-18 Bridging the gap between the familiar figures of the history of philosophy and the technical approaches favoured by contemporary philosophers The Bloomsbury Companion to Metaphysics introduces the key ideas and debates needed to understand analytic metaphysics Presenting an effective syllabus for an introductory course in contemporary metaphysics this companion brings together a team of leading metaphysicians It begins with a comprehensive introduction to methodological problems and methods before tackling the perennial metaphysical questions surrounding core topics such as Modality Universals and Abstract Objects Naturalism and Physicalism Mind Free Will God **The Cyclopædia, Or, Universal Dictionary of Arts, Sciences, and Literature** Abraham Rees, 1819 A Universal Child? Roger Smith, 2009-10-23 Addressing questions about the cultural specificity of childhood the complementary value of psychological biological and social understandings of children and the impact of policy and law on how children are dealt with and perceived this will be a core text for many courses related to childhood studies Mind, 1901 A quarterly review of philosophy *Universal Free Health Care in Canada, 1947-77* Gordon H. Hatcher, 1981 **The Cyclopædia; Or, Universal Dictionary of Arts, Sciences, and Literature. By Abraham Rees, ... with the Assistance of Eminent Professional Gentlemen. Illustrated with Numerous Engravings, by the Most Distinguished Artists. In Thirthy-nine Volumes. Vol. 1 [- 39] ,1819** **Encyclopaedia Metropolitana, Or, Universal Dictionary of Knowledge: Mixed sciences** Edward Smedley, Hugh James Rose, Henry John Rose, 1845
