Universit T Gesellschaft Universitat Aufbruch Jahrhundert:

Vivarium Gerd B. Muller, 2017-10-13 The scientific achievements and forgotten legacy of a major Austrian research institute from its founding in 1902 to its wartime destruction in 1945 The Biologische Versuchsanstalt was founded in Vienna in 1902 with the explicit goal to foster the quantification mathematization and theory formation of the biological sciences Three biologists from affluent Viennese Jewish families Hans Przibram Wilhelm Figdor and Leopold von Portheim founded financed and nurtured the institute overseeing its development into one of the most advanced biological research institutes of the time And yet today its accomplishments are nearly forgotten In 1938 the founders and other members were denied access to the institute by the Nazis and were forced into exile or deported to concentration camps The building itself was destroyed by fire in April 1945 This book rescues the legacy of the Vivarium as the Institute was often called describing both its scientific achievements and its place in history The book covers the Viennese sociocultural context at the time of the Vivarium s founding and the scientific zeitgeist that shaped its investigations It discusses the institute s departments and their research topics and describes two examples that had scientific and international ramifications the early work of Karl von Frisch who in 1973 won the Nobel Prize in Physiology or Medicine and the connection to Cold Spring Harbor Laboratory in New York Contributors Heiner Fangerau Johannes Feichtinger Georg Gaugusch Manfred D Laubichler Cheryl A Logan Gerd B M ller Tania Munz K rin Nickelsen Christian Rei Kate E Sohasky Heiko Stoff Klaus Taschwer Climbing up the Social Ladder? Vlad Popovici, Alice Velková, Martin Klečácký, 2024-10-21 Social mobility is about climbing the societal ladder or switching to a better more promising or rewarding position But how does this work for those already atop or very close to it Climbing up the Social Ladder explores instances of social mobility among different types of positional decisional and status defined elites in East Central Europe during the long 19th century at individual or group level Global Inequality, 2025-08-28 The book contributes to a better understanding of the relationship between globalisation and transnationalisation and the development of social inequality It addresses this challenge in the current transition to a multi centred world The contributions by international experts from different continents and different disciplines bring together current research on global inequality and social classes covering a wide variety of thematic and spatial foci This also includes a comparison of analyses of inequality in a global context By bringing together analyses of inequalities in income wealth education political influence labor conditions and socio ecological inequalities among others the volume provides deeper insights into the ways in which global social inequalities are changing yet being reproduced in many ways in the 21st century It calls for a discussion on the global dimensions of unequal power relations **Reexamining Academic Freedom in Religiously Affiliated Universities** Kenneth Garcia, 2016-12-21 Kenneth Garcia presents an edited collection of papers from the 2015 conference on academic freedom at religiously affiliated universities held at the University of Notre Dame These essays reexamine the secular principle of academic freedom and discuss how a theological understanding might build

on and further develop it The year 2015 marked the 100th anniversary of the founding of the American Association of University Professors AAUP the leading advocate of academic freedom in America In October 2015 the University of Notre Dame convened a group of prominent scholars to consider how the concept and practice of academic freedom might evolve The premise behind the conference was that the current conventional understandings of academic freedom are primarily secular and therefore not yet complete The goal was to consider alternative understandings in light of theological insight Theological insight in this context refers to an awareness that there is a surplus of knowledge and meaning to reality that transcends what can be known through ordinary disciplinary methods of inquiry especially those that are quantitative or empirical Essays in this volume discuss how in light of the fact that findings in many fields hint at connections to a greater whole scholars in any academic field should be free to pursue those connections Moreover there are religious traditions that can help inform those connections *The Writers Directory*, 2013 *Imperial Culture in Germany, 1871-1918* Matthew Jefferies, 2020-10-01 It has often been suggested that artists and writers in Germany's imperial era shunned social engagement preferring instead apolitical introspection However as Matthew Jefferies reveals whether one looks at the painters poets and architects who helped to create an official imperial identity after 1871 the cultural critics and reformers of the later 19th century or the new generation of cultural producers that emerged in the years around 1900 the social political and cultural were never far apart In this attractively illustrated book Jefferies provides a lively introduction to the principal movements in German high culture between 1871 and 1918 in the context of imperial society and politics He not only demonstrates that Germany's Imperial culture was every bit as fascinating as the much better known Weimar culture of the 1920s but argues that much of what came later has origins in the imperial period Filling a significant gap in the current historiography this study will appeal to all those with an interest in the rich and diverse culture of Imperial Germany

Germany Olaf Kühne, Florian Weber, 2022-03-02 This book addresses the highly differentiated spatial social cultural and demographic structures of Germany with a particular focus on the reciprocal relations between different levels of spatial development The historical development of Germany serves as a background in order to provide context for the development of spatially relevant ideas and ideals whether in relation to politics landscape or culture In this regard questions of divergence and convergence become highly salient The book makes the complexity of spatial and social developments in Germany comprehensible The neopragmatic approach adopted here allows bringing together different theoretical strands while providing a basis for independent regional geographic research at the same time Beginning with an overview of the physical structures of Germany which provides the material point of departure for the societal development of Germany key aspects of the German history are discussed Particular attention is paid to the reciprocal influence between material substrate and notions of landscape Here specific German trajectories of aesthetic and normative conceptions of landscape

become clear A common theme throughout the book are questions of divergence and of efforts towards convergence which become evident when considering past and present economic political and demographic developments Efforts to tackle current challenges such as adapting to climate change and mitigating it or securing raw materials also become apparent The complexity of spatial processes in Germany is illustrated in case study regions dealing with the challenges of structural change in traditional industrial regions such as the Ruhr area or e g efforts of Berlin to position and find itself as the capital of a unified Germany Overall the book shows how theory driven regional geographic research can make spatiotemporal complexities tangible and comprehensible University of California Union Catalog of Monographs Cataloged by the Nine Campuses from 1963 Through 1967: Authors & titles University of California (System).
