Wall House 2 John Hedjuk:

The Complexities of John Hedjuk's Work J. Kevin Story, 2020-06-09 This book traces the development of John Hedjuk's architectural career using the idea of exorcism to uncover his thought process when examining architectural designs His work encouraged profound questioning on what why and how we build which allowed for more open discourse and enhance the phenomenology found in architectural experiences Three distinct eras in his architectural career are applied to analogies of outlines apparitions and angels throughout the book across seven chapters Using these thematic examples the author investigates the progression of thought and depth inside the architect's imagination by studying key projects such as the Texas houses Wall House Architectural Masques and his final works Featuring comments by Gloria Fiorentino Hedjuk Stanley Tigerman Steven Holl Zaha Hadid Charles Jencks Phyllis Lambert Juhani Pallasmaa Toshiko Mori and others this book brings to life the intricacies in the mind of John Hedjuk and would be beneficial for those interested in architecture and design in the 20th century Passage, 2017 *Envisioning Architecture* Matilda McQuaid, 2002-06-25 The first in a series of books that will showcase works from The Museum of Modern Art's superlative holdings in the fields of architecture and design this text features a range of drawings by great architects such as Frank Lloyd Wright and Alvar Aalto **The Great Great Wall** Ian Volner, 2019-06-11 Timely and highly readable provides a valuable backdrop to Donald Trump's insistence on a barrier across America's southern border Robert Dallek presidential historian During his campaign for the presidency one of Donald Trump's signature promises was that he would build a great great wall on the border between the US and Mexico and Mexico was going to pay for it Now with only a few prototype segments erected the wall is the 2 000 mile multibillion dollar elephant in the room of contemporary American life In *The Great Great Wall* architectural historian and critic Ian Volner takes a fascinating look at the barriers that we have built over millennia Traveling far afield to China the Middle East Europe and along the U S Mexico border Volner examines famous contentious and illuminating structures and explores key questions Why do we build walls What do they reveal about human history What happens after they go up With special attention to Trump's wall and the walls that exist along the US border already this is an absorbing smart and timely book on an incredibly contentious and newsworthy topic A work of literary alchemy that transmutes the wall a simple architectural structure and of late political metaphor into a prism through which to view the panorama of human history this book will amaze delight and enchant even the most jaded nonfiction aficionado William J Bernstein award winning author of *The Delusions of Crowds* A global journey to some of history's most significant walls China Berlin and even Jericho weaving together a fascinating account of their foundational myths and current realities Carrie Gibson author of *El Norte* **The Architecture of the Facade** Randall Korman, 2022-12-30 *The Architecture of the Facade* provides a comprehensive study of the facade as both a physical and cultural artifact highlighting its significance as a critical component of the civic realm and arguing for the restoration of the art of the facade as both a subject of study within academia and an aspiration within the

profession at large As the principal surface of mediation contextualization and representation the facade carries the lion s share of responsibility for containing the internal environment and confronting the outer world And yet in recent decades the very question of what exactly a facade is has been raised by the dramatic changes in building technology advances of parametric design and the ubiquity of autonomous buildings The Architecture of the Facade addresses these and other related issues The book is organized into 12 chapters with each chapter focusing on a particular aspect of the phenomenon of the facade such as those of wall the frame transparency and the role of the facade in civic space Korman also discusses proportional systems the language of composition the role of precedent the importance of context and much more Over 350 photos and diagrams provide readers with a variety of examples of artful facades throughout history Online teaching resources that accompany this book include a course syllabus a glossary and a Pinterest tack board of facades This book will be of great interest to students in architecture studios as well as instructors and professional architects interested in facade design

Architectural Drawings as Investigating Devices Marianna Charitonidou,2023-07-10 Architectural Drawings as Investigating Devices explores how the changing modes of representation in architecture and urbanism relate to the transformation of how the addressees of architecture and urbanism are conceived The book diagnoses the dominant epistemological debates in architecture and urbanism during the 20th and 21st centuries It traces their transformations paying special attention to Le Corbusier and Ludwig Mies van der Rohe s preference for perspective representation to the diagrams of Team 10 architects to the critiques of functionalism and the upgrade of the artefactual value of architectural drawings in Aldo Rossi John Hejduk Peter Eisenman and Oswald Mathias Ungers and finally to the reinvention of architectural programme through the event in Bernard Tschumi and the Office for Metropolitan Architecture OMA Particular emphasis is placed on the spirit of truth and clarity in modernist architecture the relationship between the individual and the community in post war era architecture the decodification of design process as syntactic analogy and the paradigm of autonomy in the 1970s and 1980s architecture the concern about the dynamic character of urban conditions and the potentialities hidden in architectural programme in the post autonomy era This book is based on extensive archival research in Canada the USA and Europe and will be of interest to architects artists researchers and students in architecture architectural history theory cultural theory philosophy and aesthetics

□□□□□,2010 **Encyclopedia of Twentieth Century Architecture** R. Stephen Sennott,2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclope dia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century s vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries **Trajectories in**

Architecture Michael Jasper, 2023-04-21 *Trajectories in Architecture* Plan Sensation Temporality presents a compelling examination of underlying issues in late twentieth century architecture Three formal preoccupations and conceptual orientations are used as guiding threads or trajectories These three trajectories the plan as conceptual device a logic of sensation and temporalities serve to organise individual chapters in the central sections of the book and provide a new lens to the study of period work revealing architectural conditions and consequent spatial effects little explored to date *Trajectories in Architecture* adds to scholarship and expands our understanding of the role of conceptual and formal criteria in the analysis and creation of works of architecture The book provides potentially transformative new interpretations of influential architects and key projects from the last half of the twentieth century to reveal new alignments and potentialities in architecture's recent past as a contribution to identifying future possibilities In so doing the book argues for the still latent potential in modern architecture's traditions and design principles and their future expression *Trajectories in Architecture* includes analysis of significant projects of Le Corbusier Peter Eisenman Zaha Hadid John Hejduk Louis I Kahn and I M Pei

Lateness Peter Eisenman, Elisa Iturbe, 2020-07-07 A provocative case for historical ambiguity in architecture by one of the field's leading theorists Conceptions of modernity in architecture are often expressed in the idea of the zeitgeist or spirit of the age an attitude toward architectural form that is embedded in a belief in progressive time *Lateness* explores how architecture can work against these linear currents in startling and compelling ways In this incisive book internationally renowned architect Peter Eisenman with Elisa Iturbe proposes a different perspective on form and time in architecture one that circumvents the temporal constraints on style that require it to be of the times *lateness* He focuses on three twentieth century architects who exhibited the qualities of *lateness* in their designs Adolf Loos Aldo Rossi and John Hejduk Drawing on the critical theory of Theodor Adorno and his study of Beethoven's final works Eisenman shows how the architecture of these canonical figures was temporally out of sync with conventions and expectations and how *lateness* can serve as a form of release from the restraints of the moment Bringing together architecture music and philosophy and drawing on illuminating examples from the Renaissance and Baroque periods *Lateness* demonstrates how today's architecture can use the concept of *lateness* to break free of stylistic limitations expand architecture's critical capacity and provide a new mode of analysis

Architectural Record , 2006 *Drawing Parallels* Ray Lucas, 2019-04-29 *Drawing Parallels* expands your understanding of the workings of architects by looking at their work from an alternative perspective The book focuses on parallel projections such as axonometric isometric and oblique drawings Ray Lucas argues that by retracing the marks made by architects we can begin to engage more directly with their practice as it is only by redrawing the work that hidden aspects are revealed The practice of drawing offers significantly different insights not easily accessible through discourse analysis critical theory or observation Using James Stirling JJP Oud Peter Eisenman John Hejduk and Cedric Price as case studies Lucas highlights each architect's creative practices which he analyses with reference to Bergson's concepts of temporality

and creativity discussing the manner in which creative problems are explored and solved. The book also draws on a range of anthropological ideas including skilled practice and enchantment in order to explore why axonometrics are important to architecture and questions the degree to which the drawing convention influences the forms produced by architects. With 60 black and white images to illustrate design development, this book would be an essential read for academics and students of architecture with a particular interest in further understanding the inner workings of the architectural creative process.

The Language of Architecture Andrea Simitch, Val Warke, 2014-06. Learning a new discipline is similar to learning a new language in order to master the foundation of architecture you must first master the basic building blocks of its language: the definitions, function and usage. *Language of Architecture* provides students and professional architects with the basic elements of architectural design divided into twenty-six easy-to-comprehend chapters. This visual reference includes an introductory historical view of the elements as well as an overview of how these elements can and have been used across multiple design disciplines. Whether you're new to the field or have been an architect for years, you'll want to flip through the pages of this book throughout your career and use it as the go-to reference for inspiration, ideas and reminders of how a strong knowledge of the basics allows for meaningful, memorable and beautiful fashions that extend beyond trends. This comprehensive learning tool is the one book you'll want as a staple in your library.

Binding Space: The Book as Spatial Practice Marian Macken, 2018-04-17. Books orient, intrigue, provoke and direct the reader while editing, interpreting, encapsulating, constructing and revealing architectural representation. *Binding Space: The Book as Spatial Practice* explores the role of the book form within the realm of architectural representation. It proposes the book itself as another three-dimensional, complementary architectural representation with a generational and propositional role within the design process. Artists' books, in particular, that is a book made as an original work of art with an artist, designer or architect as author, have certain qualities and characteristics quite different from the conventional presentation and documentation of architecture. Paginal sequentiality, the structure and objecthood of the book and the act of reading create possibilities for the book as a site for architectural imagining and discourse. In this way, the form of the book affects how the architectural work is conceived, constructed and read. In five main sections, *Binding Space* examines the relationships between the drawing, the building and the book. It proposes thinking through the book as a form of spatial practice, one in which the book is cast as object, outcome, process and tool. Through the book, we read spatial practice anew.

The Changing of the Avant-garde Terence Riley, Museum of Modern Art (New York, N.Y.), 2002. Featuring 165 expertly reproduced visionary architectural drawings from The Museum of Modern Art's Howard Gilman Archive, this collection brings together a selection of idealized, fantastic and utopian architectural drawings.

Experiments with Life Itself Francisco Gonzalez de Canales, 2013-01-15. Every book relating the history of modern architecture features a large number of pages dedicated to avant-garde designs and the formation of the modern movement in the interwar years and a similar number

devoted to reconstruction and expansion after the Second World War. Meanwhile, as if owing to lack of understanding or convenient silence, there is a void of dark years of wars, exile and misfortune about which little can be said. However, it was in these dark times as in so many other revealing moments in the history of culture that experimental and profoundly invigorating experiences were taking place. Architects and artists voluntarily or forcibly driven to the margins of social importance began to react to a culturally unsustainable situation of which we know very little even today. In *Experiments with Life Itself*, Francisco Gonzalez de Canales studies a series of unrelated cases from the late 1930s to the late 1950s that he refers to as domestic self experimentation.

Drawing Sir Peter Cook, 2014-05-28

The Motive Force of Architecture

Focusing on the creative and inventive significance of drawing for architecture, this book by one of its greatest proponents, Peter Cook, is an established classic. It exudes Cook's delight and his wide-ranging catholic tastes for the architectural. Readers are provided with perceptive insights at every turn. The book features some of the greatest and most intriguing drawings by architects ranging from Frank Lloyd Wright, William Heath Robinson, Le Corbusier and Otto Wagner to Frank Gehry, Zaha Hadid, Coop Himmelblau, Arata Isozaki, Eric Owen Moss, Bernard Tschumi and Lebbeus Woods, as well as key works by Cook and other members of the original Archigram group. For this new edition, Cook provides a substantial new chapter that charts the speed at which the trajectory of drawing is moving. It reflects the increasing sophistication of available software and also the ways in which hand drawing and the digital are being eclipsed by new hybrids injecting drawing with a fresh momentum. These crossovers provide a whole new territory as attempts are made to release drawing from the boundaries of a solitary moment, a single viewing position or a single referential language. Featuring the likes of Toyo Ito, Perry Kulper, Izaskun Chinchilla, Kenny Kinugasa, Tsui Ali, Rahim John, Berglund and Lor ne Faure, it leads to fascinating insights into the effect that medium has upon intention and definition of an idea or a place. Is a pencil drawing more attuned to a certain architecture than an ink drawing or is a particular colour evocative of a certain atmosphere? In a world where a Maya drawing is creatively contributing something different from a Rhinoceros drawing, there is much to demand of future techniques.
