Uk Gaap Manual Accounting 2015:

Manual of Accounting New UK GAAP Iain Selfridge, PricewaterhouseCoopers LLP, PwC, Helen McCann, Helen Beeby, 2015-06-17 Manual of Accounting New UK GAAP forms part of the PwC Manual of Accounting series and addresses what is generally expected to be the last significant change in structure in UK Financial Reporting. In the first quarter of 2013 the Financial Reporting Council after years of debate in the accountancy profession issued Financial Reporting Standards 100 102 which will largely replace the existing set of UK Financial Reporting Standards 29 Standards in force plus one for smaller companies. Companies are free to adopt these standards now but the likelihood is that most will wait until the mandatory adoption date of 1st January 2015. Manual of Accounting New UK GAAP addresses the requirements of FRS 102 which is the new UK GAAP and will be adopted by all companies not wanting to move to IFRS and who are too large to implement the Financial Reporting Standard for Smaller Entities which in 2015 can be applied by companies with a turnover of 6 500 000 per year and a balance sheet of 3 260 000 per year. While the requirements of FRS 102 are in some ways less onerous than the existing UK set of standards there will still be a large onus on companies and their advisors to plan properly as they make the transition to adopting the new standard. There are a number of factors accountants need to consider in adopting the new standard such as the way in which a number of areas will be accounted for e.g. subsequent expenditure on fixed assets, leases and employee benefits. Also the terminology of the new standard will be unfamiliar to many and there will be some changes to the format of the financial statements. Readers will benefit from the usual well structured and practical nature of the commentary. Worked examples are prevalent and as new editions are published examples from real life companies will be added. The book focusses on each area of the financial statement in turn and explains how they are treated by FRS 102 as opposed to the existing UK GAAP. There are chapters covering various specialist sectors such as agriculture, financial institutions, oil and gas, insurance and public benefit entities. The final chapter gives some guidance on the processes that need to be considered as businesses make the transition from the existing set of standards to FRS 102. Taxation of Derivatives and Cryptoassets Oktavia Weidmann, 2024-06-10 Derivatives stand at the forefront of financial innovation continually evolving to accommodate new asset classes and risk categories. In the past decade the growing popularity of cryptoassets and ESG investments has sparked the development of a variety of innovative investment strategies and risk management tools including crypto and ESG derivatives and related structured products. This new edition has similarly evolved. Using illustrative examples it provides a comprehensive analysis of the key tax issues associated with derivatives and cryptoassets in domestic and cross border transactions and presents approaches that tax legislators could adopt to solve them. The new edition also comments on recent trends in global tax policy such as the OECD Base Erosion and Profit Shifting BEPS 1.0 and 2.0 projects. Throughout the book specific references are made to UK, German and Swiss tax law. The updated edition addresses the following topics: economic and financial properties of derivatives and cryptoassets; definition of

derivatives for tax purposes and its application to crypto derivatives and ESG derivatives among others accounting treatment of derivatives and cryptoassets under IFRS UK German and US GAAP current tax legislation and policy alternatives to the taxation of derivatives and cryptoassets characterisation of derivatives gains and losses as income or capital and equity or debt accounting and taxation treatment of hedging transactions involving derivatives or cryptoassets accounting and taxation rules applying to structured products and hybrid instruments including crypto and ESG linked structured products withholding taxes on derivatives and the concept of beneficial ownership in domestic and cross border transactions and anti avoidance legislation applying to derivatives and cryptoassets including the domestic law implementation of BEPS Action 2 the EU Anti Tax Avoidance Directives ATAD I and II the tax transparency rules for cryptoassets DAC8 and Pillar Two This comprehensive book analyses recent developments in three intertwined areas of expertise financial products accounting and tax law It will be a valuable resource to tax professionals in their daily practice of advising companies banks and investment funds It will also be of interest to government officials and researchers engaged in the taxation of derivatives cryptoassets and ESG investment products
