Prose Fiction: An Introduction to the Semiotics of Narrative Ignasi Ribó, 2019-12-13 This concise and highly accessible textbook outlines the principles and techniques of storytelling. It is intended as a high school and college level introduction to the central concepts of narrative theory concepts that will aid students in developing their competence not only in analysing and interpreting short stories and novels but also in writing them. This textbook prioritises clarity over intricacy of theory equipping its readers with the necessary tools to embark on further study of literature literary theory and creative writing. Building on a semiotic model of narrative it is structured around the key elements of narratological theory with chapters on plot setting characterisation and narration as well as on language and theme elements which are underrepresented in existing textbooks on narrative theory. The chapter on language constitutes essential reading for those students unfamiliar with rhetoric while the chapter on theme draws together significant perspectives from contemporary critical theory including feminism and postcolonialism. This textbook is engaging and easily navigable with key concepts highlighted and clearly explained both in the text and in a full glossary located at the end of the book. Throughout the textbook the reader is aided by diagrams images quotes from prominent theorists and instructive examples from classical and popular short stories and novels such as Jane Austen's *Pride and Prejudice* Franz Kafka's *The Metamorphosis* J K Rowling's *Harry Potter* or Dostoyevsky's *The Brothers Karamazov* amongst many others. **Prose Fiction: An Introduction to the Semiotics of Narrative** can either be incorporated as the main textbook into a wider syllabus on narrative theory and creative writing or it can be used as a supplementary reference book for readers interested in narrative fiction. The textbook is a must read for beginning students of narratology especially those with no or limited prior experience in this area. It is of especial relevance to English and Humanities major students in Asia for whom it was conceived and written.

The Value of James Joyce Margot Norris, 2016-03-21 Margot Norris *The Value of James Joyce* explores the writings of James Joyce from his early poetry and short stories to his final avant garde work *Finnegans Wake*. His works include some of the most difficult and challenging texts in the English literary canon without diminishing his impressive popularity beyond the scope of academia. A democratic impulse may be counted as an important feature of this paradox that Joyce's stylistic and linguistic experiments never lose their focus on a world of characters whose everyday activities comprise the stories of life in Ireland in the late nineteenth and early twentieth century even as some of the most famous texts are given structures derived from Ancient Greek literature. *The Value of James Joyce* examines not only the significance of the ostensibly ordinary but the function of natural and urban spaces classical and popular culture and the moods voice and language that give Joyce's works their widespread appeal.

The Humanities and Everyday Life Michael Levenson, 2017-11-08 *The Literary Agenda* is a series of short polemical monographs about the importance of literature and of reading in the wider world and about the state of literary education inside schools and universities. The category of the literary has always been contentious. What is clear

however is how increasingly it is dismissed or is unrecognised as a way of thinking or an arena for thought It is sceptically challenged from within for example by the sometimes rival claims of cultural history contextualized explanation or media studies It is shaken from without by even greater pressures by economic exigency and the severe social attitudes that can follow from it by technological change that may leave the traditional forms of serious human communication looking merely antiquated For just these reasons this is the right time for renewal to start reinvigorated work into the meaning and value of literary reading We think of the humanities as a cluster of specialized academic activities So they are But they also belong to the ordinary world the world where students and faculty make connections and careers where they eat and drink and fret where they move through new buildings and old seminar rooms In *The Humanities and Everyday Life* Michael Levenson places academic humanities within this field of daily life where abstract thought stands alongside material need The humanities also live outside the university in activities that have been overlooked or undervalued in book clubs in historical re enactments in visits to museums and libraries in private collections in contributions to Wikipedia and in amateur genealogy These activities belong to the humanities quite as much as research published in specialty journals *The Humanities and Everyday Life* addresses both the university and the world beyond to see where they meet and fail to meet and to argue that the walls between them should lower At the centre of the book is an account of experts and expertise a controversial topic that poses questions about professionals versus amateurs and what constitutes expertise Drawing on the recent rejection of political elite expertise as seen in the Brexit referendum and the American election campaign as well as examples from science and medicine the volume reveals the unsteady boundary between specialized knowledge and public curiosity *The Humanities and Everyday Life* asks us to accept that the humanities are as enduring as religion are indeed both rival and complement to religion and to acknowledge that despite imperfections they give an image of many dimensioned life The humanities are worth improving on their own terms but also because just often enough they constitute an exemplary micro society one that will illuminate still more widely when academic thought meets the light of the everyday

[Text Genetics in Literary Modernism and other Essays](#) Hans Walter Gabler, 2018-02-20 This collection of essays from world renowned scholar Hans Walter Gabler contains writings from a decade and a half of retirement spent exploring textual criticism genetic criticism and literary criticism In these sixteen stimulating contributions he develops theories of textual criticism and editing that are inflected by our advance into the digital era structurally analyses arts of composition in literature and music and traces the cultural implications discernible in book design and in the canonisation of works of literature and their authors Distinctive and ambitious these essays move beyond the concerns of the community of critics and scholars Gabler responds innovatively to the issues involved and often endeavours to re think their urgencies by bringing together the orthodox tenets of different schools of textual criticism He moves between a variety of topics ranging from fresh genetic approaches to the work of James Joyce and Virginia Woolf to significant contributions to the theorisation of scholarly

Minimal writing Stephens writes can be beguilingly simple on the surface but can also offer iterative reading experiences on multiple levels from the fleeting to the ponderous absence of clutter for example the entire text of a poem by Robert Grenier is both expressive and self descriptive Stephens first sets out a theoretical framework for reading and viewing minimal writing and then offers close readings of works of minimal writing by Saroyan Grenier Norman Pritchard Natalie Czech and others He reverse engineers recent works by Jen Bervin Craig Dworkin and Christian B k that draw on molecular biology and explores print on demand books by Holly Melgard code poetry by Nick Montfort Twitter based work by Allison Parrish and the use of Instagram by Hans Ulrich Obrist and Saroyan Text it seems is becoming ever more prevalent in visual art meanwhile poems are getting shorter When reading has become scanning a screen and writing tapping out a text absence of clutter invites us to reflect on how we read see and pay attention

Being Possible Stephen Dozeman,2020-12-16 In April 2019 Canadian psychologist Jordan B Peterson sat down with Slovenian philosopher and psychoanalyst Slavoj i ek for a debate that would collect higher ticket prices than the local Toronto Maple Leafs game The debate was considered by many to be something of a dud with both figures largely appearing to talk past each other but to ignore it would be a mistake

Instead the fact that a major public event put the Communist vs Capitalist question back into play speaks to larger cultural trends that are occurring an old consensus seems to be bursting at the seams and it s unclear if the center will hold or be moved Taking on the existentialism of Martin Heidegger as their starting point Stephen Dozeman argues that understanding this debate means starting with the individual subject and understanding its increasingly confused and precarious place in a disenchanted world Wandering in between philosophical theory history popular culture and back to philosophy again this book tries to explore why so many feel compelled to call ancient wisdom into question and what it might mean to take responsibility for our lives
