Unappreciated Enough Of No Love:

Undervalued Self Elaine N. Aron, 2025-05-01 Elaine Aron follows up her bestsellers on the highly sensitive person with a groundbreaking new book on the undervalued self. She explains that self-esteem results from having a healthy balance of love and power in our lives. Readers will learn to incorporate love into situations that seem to require power and deal with power struggles that mask themselves as issues of love. From the bedroom to the boardroom, her strategies will enable us to escape feelings of shame, defeat, and depression, dissolve relationship hostility, and become our best selves. With Aron's clear, empathetic writing and extraordinary scientific and human insight, *The Undervalued Self* is a simple and effective guide to developing healthy, fulfilling relationships and finding true self-worth.

When Love Is Not Enough Donna Piazza, PHD, 2014-05-22 *When Love Is Not Enough* relates how a multitude of factors—the competence of staff, the safety, nurturing, and protective elements of the emotional, physical, and political setting, and all overt and covert organizational dynamics—determine whether or not a treatment setting accomplishes its therapeutic aims. Authors in *When Love Is Not Enough* continue the emphasis on the group as a whole. Group Relation model of organizational and group processes begun with Wilfred Bion's work at the Tavistock Clinic in London in the 1940s. This model helps those providing services to children and adolescents evaluate their treatment programs and make the necessary changes toward improvement. Chapters in *When Love Is Not Enough* are dedicated to improving the psychological treatment of children and adolescents in postmodern society, a society in which life in interdependent communities is becoming increasingly important for the health and survival of all persons. Topics covered include the Tavistock approach to understanding group and organizational behavior; the emphasis on group as a whole in problem solving and treatment design; narrowing the gap between plan and outcome; the dynamics involved in the psychiatric treatment of children; issues of staff selection, training, and development in programs designed to treat children; countertransference responses in the treatment of children and adolescents; revitalizing organizations; the subjective experience of school life. *When Love Is Not Enough* helps organizations realize the ways in which they may inadvertently undermine the emotional and cognitive functioning of the staff or the identified patients and set serious limits on the growth of members of the organization, staff and patients alike. It urges organizations to conduct an ongoing self-scrutiny concerning their rational and irrational processes, as this self-examination is crucial to the health and vitality of the treatment offered to others. The book also promotes thinking of the conscious and unconscious dynamics of the group as a whole to more completely inform organizational decisions concerning changes that may enhance the treatment of children and adolescents. *When Love Is Not Enough* serves as an invaluable guide for mental health professionals who treat children and adolescents: group therapists, hospital and clinic administrators, psychoanalysts, nurses, social workers, psychologists, and psychiatrists.

All You Need Is Love & Other Lies About Marriage John W. Jacobs, 2024-06-11 Why is it so difficult to remain married in the twenty first century and what can you do about it We all know that half of today s marriages end in divorce but we tend to believe that our own marriages are safe As psychiatrist John Jacobs explains in this fresh and impassioned book marriages today are incredibly fragile and unless a couple understands what is making contemporary marriage so vulnerable to dissolution the marriage is at risk Part of the problem is that people refuse to see how social and historical forces have changed the very meaning of marriage causing serious interpersonal unhappiness Because of increased longevity married people live together longer than at any time in history There s been an erosion of the social and cultural forces that traditionally kept marriages together Confusion over gender role responsibilities increased expectations of sexual satisfaction and intense time pressures on couples to work and be successful all create marital stress And yet most people don t acknowledge the problems in their marriage until it is too late We tend to believe in the lies of marriage such concepts as soul mates unconditional love that children improve a relationship that the sexual revolution has made marital sex more pleasurable or that egalitarian marriage offers couples easy solutions and forget to engage in the constant hardwork required to keep our marriages alive Dr Jacobs believes that most marriages have significant problems at some time but until we recognize the new realities of marriage and develop the skills required to sustain a loving intimate relationship marriages are at risk Of course marriage is about love But that s just the beginning
