International Handbook of Historical Archaeology Teresita Majewski,David Gaimster,2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from

the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology. The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world. This key reference work captures the energy and diversity of this global discipline today.

New Life for Archaeological Collections Rebecca Allen, Ben Ford, 2019-05-01 New Life for Archaeological Collections explores solutions to what archaeologists are calling the curation crisis that is too much stuff with too little research analysis and public interpretation. This volume demonstrates how archaeologists are taking both large and small steps toward not only solving the dilemma of storage but recognizing the value of these collections through inventorying and cataloging curation rehousing artifact conservation volunteer and student efforts and public exhibits. Essays in this volume highlight new questions and innovative uses for existing archaeological collections. Rebecca Allen and Ben Ford advance ways to make the evaluation and documentation of these collections more accessible to those inside and outside of the scholarly discipline of archaeology. Contributors to New Life for Archaeological Collections introduce readers to their research while opening new perspectives for scientists and students alike to explore the world of archaeology. These essays illuminate new connections between cultural studies and the general availability of archaeological research and information. Drawing from the experience of university professors government agency professionals and cultural resource managers this volume represents a unique commentary on education research and the archaeological community.

The Story of Food in the Human Past Robyn E. Cutright, 2021-01-26 A sweeping overview of how and what humans have eaten in their long history as a species. The Story of Food in the Human Past How What We Ate Made Us Who We Are uses case studies from recent archaeological research to tell the story of food in human prehistory. Beginning with the earliest members of our genus Robyn E Cutright investigates the role of food in shaping who we are as humans during the emergence of modern Homo sapiens and through major transitions in human prehistory such as the development of agriculture and the emergence

of complex societies This fascinating study begins with a discussion of how food shaped humans in evolutionary terms by examining what makes human eating unique the use of fire to cook and the origins of cuisine as culture and adaptation through the example of Neandertals The second part of the book describes how cuisine was reshaped when humans domesticated plants and animals and examines how food expressed ancient social structures and identities such as gender class and ethnicity Cutright shows how food took on special meaning in feasts and religious rituals and also pays attention to the daily preparation and consumption of food as central to human society Cutright synthesizes recent paleoanthropological and archaeological research on ancient diet and cuisine and complements her research on daily diet culinary practice and special purpose mortuary and celebratory meals in the Andes with comparative case studies from around the world to offer readers a holistic view of what humans ate in the past and what that reveals about who we are **America, History and Life**, 1996 Article abstracts and citations of reviews and dissertations covering the United States and Canada

Potter,1993 When Captain John Smith explored the Potomac River in 1608 it was a frontier between two of the most politically complex Indian cultures in the Middle Atlantic region the Conoy chiefdom of southern Maryland and the Powhatan chiefdom of eastern Virginia Some of these diverse Algonquian speaking peoples acknowledged the overlordship of the Piscataways the largest group of the Conoys others acknowledged the authority of the paramount chief Powhatan and still others like the Patawomekes acknowledged no ruler greater than their own The rise and fall of these polities is the subject of *Commoners Tribute and Chiefs* Using an innovative combination of archaeology anthropology and ethno history Stephen Potter traces the rise of one Indian group the Chicacoans whose domain on the south shore of the Potomac straddled the boundary between the Powhatans and the Conoys By presenting a case study of the Chicacoans from A D 200 to the early seventeenth century Potter offers readers a window onto the development of Algonquian culture in the Chesapeake and illuminates the responses of its constituent societies to the invading Europeans He examines the stratification of individual chiefdoms into elites and masses of tribute paying commoners and he demonstrates the progressive consolidation of Algonquian peoples in the century preceding the European influx While most previous scholarship on the Indians of the Potomac has centered on the historic accounts of Captain John Smith and his contemporaries Potter draws extensively on a wealth of materials encountered during his years of research His fascinating narrative succeeds both as a detailed archaeological and ethnohistorical study of the Chicacoans and as a comprehensive interpretation of Algonquian culture

Identity in the Shadow of Slavery Paul E. Lovejoy,2000 *Identity in the Shadow of Slavery* addresses issues relating to the gender ethnic and cultural factors through which enslaved Africans and their descendants interpreted their lives under slavery thereby creating communities with a shared sense of identity The focus of the book is on the ways in which identities were formulated under slavery and the ways in which the struggle to escape slavery and its legacy continued to affect the lives of descendants of slaves The introductory essay explores an approach to the study of the African diaspora that looks outward from Africa and places the following chapters written by leading authorities from Europe and North and South America in the context of the theoretical literature
