al-Qaeda Joshua A. Geltzer, 2009-09-10 This book examines the communicative aspects and implications of US counter terrorist policies towards al Qaeda Recent US counter terrorist strategy has been largely based upon projecting certain perceptions of America as an actor to those drawn to al Qaeda and this book investigates in what ways and to what extent US officials believed that the signals sent by what America did and said could influence the behaviour of the terrorist and would be terrorist The study then draws on a growing understanding of that audience to analyse how those drawn to al Qaeda were and indeed still are likely to be influenced by the perceptions of America that Washington's policies generated The study's central argument is that given al Qaeda's unconventional strategy and the particularities of the world view characterising those drawn to the group America's counter terrorist signalling proved largely counter productive to America's objective of undermining al Qaeda's strategic narrative instead serving in many ways to validate it Firstly this book seeks to reveal the significant and largely unexplored role that signalling has played in US counter terrorist policy towards al Qaeda Second it tries to capture the objectives strategy tactics ideology and other defining features of the world view characterising those drawn to al Qaeda Third it strives to combine those two lines of inquiry by applying the al Qaeda world view to a critical analysis of the signals sent by US policies Finally the book aims to offer broad policy implications that demonstrate how an informed understanding of the world view of those drawn to al Qaeda can be employed to revise and refine American counter terrorist signalling This book will be of much interest to students of US foreign policy and public diplomacy counter terrorism strategy and international security Joshua Alexander Geltzer has a PhD in War Studies from Kings College London and is currently a juris doctoral student at Yale Law School

Will Terrorists Go Nuclear? Brian Michael Jenkins, 2009-12-02 For more than 30 years Jenkins has been advising the military government and prestigious think tanks on the dangers of nuclear proliferation Now he goes beyond what the experts know to examine how terrorists themselves think about such weapons

A Strategic Planning Approach Lynn E. Davis, Melanie W. Sisson, 2014-05-20 While the United States government has historically undertaken strategic reviews and produced numerous strategy documents these have provided only very general directions for U S policymakers This paper defines an approach to strategic planning and illustrates its application using the example of the critical national security topic of counterterrorism

The Science of Fear Daniel Gardner, 2008-07-17 An invaluable resource for anyone who aspires to think clearly The Guardian from the New York Times bestselling author of Superforecasting and Future Babble From terror attacks to collapsing economies from painkiller epidemics to mass gun violence and poisonous toys from China our list of fears seems to be exploding Yet we are the safest and healthiest humans in history Why are we so worried The Science of Fear is an introduction to the new brain science of risk dissecting the fears that misguide and manipulate us every day Award winning journalist Dan Gardner demonstrates how irrational fear springs from the ways humans miscalculate risks based on our hunter gatherer brains With the exclusive

cooperation of risk science pioneer Paul Slovic and other leading experts Gardner reveals how our gut reactions lead us astray Understanding our irrational fears frees us from political and corporate manipulation and makes our choices better Ultimately The Science of Fear will make you brave Excellent Analyzes everything from the media's predilection for irrational scare stories to the cynical use of fear by politicians A cheery corrective to modern paranoia The Economist An entertaining often jolting account of why trivial risks terrify us even as we engage in wildly dangerous activities with hardly a qualm Kirkus starred review Elegantly weaves academic research and everyday experience exposing the secrets of emotion and reason and the essential roles they play on our lives An excellent book Dan Ariely New York Times bestselling author of Predictably Irrational

Risk Dan Gardner, 2009-02-24 In the tradition of Malcolm Gladwell Gardner explores a new way of thinking about the decisions we make We are the safest and healthiest human beings who ever lived and yet irrational fear is growing with deadly consequences such as the 1 595 Americans killed when they made the mistake of switching from planes to cars after September 11 In part this irrationality is caused by those politicians activists and the media who promote fear for their own gain Culture also matters But a more fundamental cause is human psychology Working with risk science pioneer Paul Slovic author Dan Gardner sets out to explain in a compulsively readable fashion just what that statement above means as to how we make decisions and run our lives We learn that the brain has not one but two systems to analyze risk One is primitive unconscious and intuitive The other is conscious and rational The two systems often agree but occasionally they come to very different conclusions When that happens we can find ourselves worrying about what the statistics tell us is a trivial threat terrorism child abduction cancer caused by chemical pollution or shrugging off serious risks like obesity and smoking Gladwell told us about the black box of our brains Gardner takes us inside helping us to understand how to deconstruct the information we're bombarded with and respond more logically and adaptively to our world Risk is cutting edge reading

Chasing Ghosts John E. Mueller, Mark G. Stewart, 2016 Chasing Ghosts exposes the ill founded paranoia that has allowed the national security state to both feed at the public trough and undermine America's civil liberties tradition

The Cultural Imaginary of Terrorism in Public Discourse, Literature, and Film Michael Frank, 2017-06-14 This study investigates the overlaps between political discourse and literary and cinematic fiction arguing that both are informed by and contribute to the cultural imaginary of terrorism Whenever mass mediated acts of terrorism occur they tend to trigger a proliferation of threat scenarios not only in the realm of literature and film but also in the statements of policymakers security experts and journalists In the process the discursive boundary between the factual and the speculative can become difficult to discern To elucidate this phenomenon this book proposes that terror is a halfway house between the real and the imaginary For what characterizes terrorism is less the single act of violence than it is the fact that this act is perceived to be the beginning or part of a potential series and that further acts are expected to occur As turn of the century writers such as Stevenson and Conrad were the first to point out this gives terror a fantastical dimension a fact reinforced by the clandestine

nature of both terrorist and counter terrorist operations Supported by contextual readings of selected texts and films from The Dynamiter and The Secret Agent through late Victorian science fiction to post 9 11 novels and cinema this study explores the complex interplay between actual incidents of political violence the surrounding discourse and fictional engagement with the issue to show how terrorism becomes an object of fantasy Drawing on research from a variety of disciplines The Cultural Imaginary of Terrorism will be a valuable resource for those with interests in the areas of Literature and Film Terrorism Studies Peace and Conflict Studies Trauma Studies and Cultural Studies
