Madryas, Andrzej Kolonko, Beata Nienartowicz, Arkadiusz Szot, 2017-09-25 Underground infrastructure undoubtedly constitutes one of the most important engineering equipments of urbanized areas. It includes energy distribution, communications and water carry away, sewage transportation systems of goods and people, storage facilities of articles, liquids and gases, and commercial, recreational and research activities and other functions. Underground Infrastructure of Urban Areas 4 is dedicated to the research, design, implementation and maintenance of infrastructure systems as well as communication tunnels and building structures, garages, tanks, etc. in urbanized areas. The book collects contributions from several countries presenting current scientific and technical issues associated with this area of the building industry. Both theoretical issues and cases studies on the design, execution and testing of underground infrastructures at expertise and scientific levels are included in the book. Presenting the state of the art in underground infrastructure of urbanized areas, Underground Infrastructure of Urban Areas 4 aims at academics, designers and builders of structures, producers and suppliers of building materials, equipment and underground structures, and also to those managing and maintaining these structures.

Journal of Urban Planning and Development, 2000 Avery Index to Architectural Periodicals Avery Library, 1997 *Sci-tech News*, 2004 *Modeling the Underground Infrastructure of Urban Environments* Nataliya Pankratova, Hennadii Haiko, Illia Savchenko, 2024-01-03. The book considers the underground development of cities from a systemic point of view. The authors' scientific methodology for planning a system of alternative design configurations in a metropolis including underground infrastructure on the basis of applied system analysis methods is revealed. The book presents a short guide and a number of practical applications of morphological analysis, cognitive modeling and other system analysis methods as tools for solving various urban problems including risk assessment in the transport infrastructure of a city, evaluation and justification of constructing different types of underground objects on a selected site according to its structural, functional and geological factors, construction of scenarios aimed at informed decision making in planning complex underground facilities. The book provides novel and convenient tools for urban development to professionals in urban planning, municipal authorities and investors and researchers in urban studies.
