Phenomenological-Hermeneutical Approach to Borderline Personality Disorder Cristóbal Pacheco, Pablo Fossa, 2025-11-17 Phenomenological Hermeneutical Approach to Borderline Personality Disorder explores the subjective experience of individuals living with borderline personality disorder BPD through phenomenological and hermeneutic lenses

Understanding Education Research Gary Shank, Janice Pringle, Launcelot Brown, 2015-10-23 Understanding Education

Research is designed to help students learn to read educational research articles carefully systematically and critically. Students learn to categorize titles, decode abstracts, find research questions, characterize research arguments, break down methods and procedures, explore references, apply analysis strategies, and interpret findings. The book allows them to easily develop the skills they need to be research literate. It offers simple guidelines for qualitative, quantitative, and statistical approaches that help students master the basics behind these often complex and confusing methodologies. The book is accessible for future researchers or for students who simply need to understand research clearly. It is written in a clear and engaging style with ample concrete examples of each stage, offering exercises for student practice. Teaching Reading and

Teacher Beliefs Xinyu Mo, 2020-09-30. This book explores language teacher beliefs in English as a Foreign Language (EFL) reading instruction in the context of Chinese university English instructors. Since the 1990s, there has been a renewed interest in teacher beliefs in the domain of language teacher cognition. However, most studies in this area aim at investigating the relationship between particular aspects of teacher beliefs and classroom practices, largely ignoring the complexity of teacher beliefs. This study explores the issue from an alternative perspective by conceptualizing teacher beliefs as a complex, dynamic, and multi-faceted system. By adopting five rounds of interview and four classroom observations, the year-long study reveals seven key features of the belief system shared among six participants. It calls for the holistic, complex, and insider view to examine teacher beliefs in relation to the sociocultural and historical contexts where the teachers work and live. **Global Perspectives on Quality Assurance and Accreditation in Higher Education Institutions** Magd,

Hesham, Kunjumuhammed, Siraj Kariyilaparambu, 2021-09-17. Quality accreditation in higher education institutions (HEIs) is currently a buzzword. The need to maintain high quality education standards is a critical requirement for HEIs to remain competitive in the market and for government and regulatory bodies to ensure the quality standards of programs offered. From being an implicit requirement that is internally addressed, quality assurance activities become an explicit requirement that is regularly audited and appraised by national and international accreditation agencies. HEIs are voluntarily integrating quality management systems (QMS) institutional and program specific in response to the political and competitive environment in which it exists. Through its higher education department or by creating non-profitable accreditation bodies, many governments have implemented a quality framework for licensing HEIs and invigilate its adherence based on which accreditation statuses are granted for HEIs. **Global Perspectives on Quality Assurance and Accreditation in Higher Education Institutions** provides a comprehensive framework for HEIs to address quality assurance and quality accreditation requirements and serves as a practical tool to develop and deploy well-defined quality management systems in higher education. The book focuses on the critical aspects of quality assurance: the need to develop a concise and agile vision, mission, values, and graduate attributes and to develop a system that effectively aligns the various activities of the HEI to the attainment of the strategic priorities listed in the institutional plans. The chapters each cover the various facets of the quality

assurance framework and accreditation agencies requirements with practical examples of each This book is useful for HEI administrators quality assurance specialists in HEIs heads of academic departments internal auditors external auditors and other practitioners of quality along with stakeholders researchers academicians and students interested in quality assurance and accreditation in higher education **Research Paradigm Considerations for Emerging Scholars** Anja

Pabel, Josephine Pryce, Allison Anderson, 2021-05-12 This book provides insights into the lived experiences of researchers as they negotiate the undulating terrain of the world of paradigms and seek to find their niche Each chapter presents the journeys of postgraduate candidates early career researchers and established scholars starting with an overview of their paradigm the application of the paradigm to their specific research context and concluding with the authors reflecting on their identification with and use of the paradigm The volume acknowledges that determining the paradigm that best aligns with a scholar's personal ideologies and the underlying assumptions of the research can be rather daunting challenging and perplexing to scholars who are starting their research journey It offers an accessible exploration of research paradigms and will be a valuable resource for postgraduate researchers emerging scholars and PhD supervisors
