Understanding Civil War Africa Understanding Civil War Africa:

Understanding Civil War: Africa Paul Collier, Nicholas Sambanis, 2005 This publication is part of a two volume set which builds upon previous World Bank research into the causes and characteristics of civil war onset particularly the model developed by Paul Collier and Anke Hoeffler regarding the relationship between violent political conflict and economic development This volume considers the variables identified in the Collier Hoeffler model and applies them to a set of case studies from a range of African countries and then goes on to trace the process of conflict escalation in order to draw conclusions as to why civil war is likely to occur The publication seeks to advance theoretical and empirical knowledge of civil war in order to help further the objective of developing appropriate policy interventions Another volume with case studies from a range of non African countries is available separately ISBN 0821360493

Understanding Civil War Paul Collier, Nicholas Sambanis, 2005 The two volumes of Understanding Civil War build upon the World Bank's prior research on conflict and violence particularly on the work of Paul Collier and Anke Hoeffler whose model of civil war onset has sparked much discussion on the relationship between conflict and development in what came to be known as the greed versus grievance debate The authors systematically apply the Collier Hoeffler model to 15 countries in 6 different regions of the world using a comparative case study methodology to revise and expand upon economic models of civil war The book concludes that the greed versus grievance debate should be abandoned for a more complex model that considers greed and grievance as inextricably fused motives for civil war

Why are There So Many Civil Wars in Africa? Understanding and Preventing Violent Conflict Nicholas Sambanis, E. Elbadawi, 2007 Contrary to popular belief Africa's civil wars are not due to its ethnic and religious diversity Using recently developed models of the overall incidence of civil wars in 161 countries between 1960 and 1999 we draw lessons with special reference to Africa showing that the relatively higher incidence of war in Africa is not due to the ethno linguistic fragmentation of its countries but rather to high levels of poverty failed political institutions and economic dependence on natural resources We argue that the best and fastest strategy to reduce the incidence of civil war in Africa and prevent future civil wars is to institute democratic reforms that effectively manage the challenges facing Africa's diverse societies To promote inter group cooperation in Africa specially tailored political governance and economic management institutions are needed and we advance some hypotheses on the nature of such institutions We suggest that Africa's ethnic diversity in fact helps rather than impedes the emergence of stable development as it necessitates inter group bargaining processes These processes can be peaceful if ethnic groups feel adequately represented by their national political institutions and if the economy provides opportunity for productive activity

Peace Agreements and Civil Wars in Africa Julius Mutwol, 2009 This book answers two related questions concerning civil war peace agreements First it explains why some peace agreements get signed while others do not get signed and second why do some of those agreements that get signed not hold to ultimately bring an end to protracted civil wars In spite of the fact that most mediated settlements of civil wars are not durable it is still important that we understand why some civil war agreements reach initial steps towards settlement without which full and durable end of conflict is not possible To improve our understanding of the process through which civil war agreements are concluded and why some settlements hold while others do not this study looks at empirical evidence from three mediated sets of peace agreements The focus is first a series of fourteen agreements that finally ended the first civil war in Liberia in 1997 second the 1993 Arusha peace accord that failed to prevent the escalation of conflict into genocide in Rwanda and third a series of three agreements that were signed but did not initially hold to end the conflict in Sierra Leone An excellent and thorough study this book will be a welcome reference for collections in African studies international peace studies and political science

Understanding Civil Wars Edward Newman, 2014-04-24 This volume explores the nature of civil war in the modern world and in historical perspective Civil wars represent the principal form of

armed conflict since the end of the Second World War and certainly in the contemporary era The nature and impact of civil wars suggests that these conflicts reflect and are also a driving force for major societal change In this sense Understanding Civil Wars Continuity and change in intrastate conflict argues that the nature of civil war is not fundamentally changing in nature The book includes a thorough consideration of patterns and types of intrastate conflict and debates relating to the causes impact and changing nature of war A key focus is on the political and social driving forces of such conflict and its societal meanings significance and consequences The author also explores methodological and epistemological challenges related to studying and understanding intrastate war A range of questions and debates are addressed What is the current knowledge regarding the causes and nature of armed intrastate conflict Is it possible to produce general cross national theories on civil war which have broad explanatory relevance Is the concept of civil wars empirically meaningful in an era of globalization and transnational war Has intrastate conflict fundamentally changed in nature Are there historical patterns in different types of intrastate conflict What are the most interesting methodological trends and debates in the study of armed intrastate conflict How are narratives about the causes and nature of civil wars constructed around ideas such as ethnic conflict separatist conflict and resource conflict This book will be of much interest to students of civil wars intrastate conflict security studies and international relations in general
