Understanding Solvency II What Is Different After June 2013:

Regulation in the European Electricity Sector Maciej Sokołowski, 2016-02-22 Since the very beginning of European integration electricity has been within the legal sphere of the EU Much of this is found within the binding European acts making up the framework of the Energy Packages The established legal institutions have had a significant impact on the shape of the energy market in Europe Nevertheless the European energy market still seems to be developing as demonstrated by the current lively discussion about the state of the Energy Union Regulation in the European Electricity Sector delves into European energy law and reflects on some of the primary issues related to the public legal impact on the European energy sector The book offers a brief explanation of the background operation of the electricity sector as well as liberalisation within the area and traces the evolution of the EU's approach towards the issue of public law regulation within the electricity sector Finally the book presents an analysis of European and national laws considering their interpretation and explores the future of public law regulation Aimed at giving the reader a deep insight into a nature of the state's presence in the power sector this book will be of great interest to students and scholars of EU energy law and policy Macroprudential Supervision in Insurance J. Monkiewicz, M. Malecki, Marian Małecki, 2014-11-04 Macroprudential policies tools and supervision have become important since the last financial crisis This book addresses general and methodological issues and provides a framework for the analysis of macroprudential policies and supervision in insurance It focuses on policy related issues and global level aspects of macroprudential in insurance *House of Commons - Environmental Audit Committee: Green Finance - HC 191* Great Britain: Parliament: House of Commons: Environmental Audit Committee, Joan Walley, 2014-03-06 The Environmental Audit Committee points out that there is a large green finance gap Investments are currently running at less than half of the 200 billion needed in energy infrastructure alone by 2020 to deliver national and international emissions reduction targets And stock markets could be inflating a carbon bubble by over valuing companies with fossil fuel assets that will have to be left unburned in order to limit climate change The Bank of England's Financial Policy Committee should seek advice from the independent Committee on Climate Change to help it monitor the systemic risk to financial stability associated with a carbon bubble To address the green finance gap the Government must provide a joined up stable and certain policy framework that maintains investor confidence and helps markets price in the cost of carbon The Green Investment Bank has made a good start but does not currently have the power to borrow in order to leverage and enlarge its investments limiting its potential to fill the green finance gap Take up of the Green Deal has been poor and the Government must make it simpler and more attractive to households The European Commission's EC proposed new rules for State Aid in the energy sector could limit the finance available to support community owned energy schemes The Government must play a central role in agreeing ambitious and binding international commitments on climate change both in the EU and in the run up to the UN climate talks in Paris 2015 *European Financial Regulation* Veerle

Colaert,Danny Busch,Thomas Incalza,2019-12-26 Mirroring the long established structure of the financial industry EU financial regulation as we know it today approaches banking insurance and investment services separately and often divergently In recent decades however the clear separation between financial sectors has gradually evaporated as business lines have converged across sectors and FinTech solutions have emerged which do not fit traditional sector boundaries As the contours of the traditional tripartition in the financial industry have faded the diverging regulatory and supervisory treatment of these sectors has become increasingly at odds with economic reality This book brings together insights developed by distinguished researchers and industry professionals in a series of articles analysing the main areas of EU financial regulation from a cross sectoral perspective For each specific research theme including prudential regulation corporate governance and conduct of business rules the similarities as well as gaps overlaps and unjustifiable differences between banking securities and insurance regulation are clearly presented and discussed This innovative research approach is aimed at informing lawmakers and policymakers on potential improvements to EU financial regulation whilst also supporting legal and compliance professionals applying the current framework or looking to streamline compliance processes

EU Pensions Law Philip Bennett,Hans van Meerten,2024-12-09 This judicious Commentary identifies how EU law directly and indirectly affects pension rights and provides a detailed article by article analysis of the IORP II Directive in comparison to the relevant articles of the IORP I Directive It also considers the extent to which EU pensions law has been retained in the UK post Brexit and the effect of the UK Retained EU Law Revocation and Reform Act 2023

European Insolvency Proceedings Patryk Filipiak,Anna Hrycaj,2021-10-13 In the European Union the effectiveness of judicial protection granted to a business or consumer in crisis depends on the extent and manner in which court rulings in bankruptcy and restructuring cases are recognised in all Member States This article by article commentary on Regulation EU 2015 848 provides expert guidance through the entire course of insolvency proceedings clearly showing how to solve specific problems that arise in insolvency cases with a cross border element including aspects such as jurisdiction applicable law recognition and enforceability of judgments and coordination of group of companies insolvencies For any party instituting an insolvency proceeding in an EU Member State the commentary provides such detailed guidance as the following identifying the appropriate internationally competent court for filing terms pursuant to which a judgment can be recognised duties of an insolvency practitioner IP IP s authority in the territory of another state IP s obligations towards creditors in another state rights of foreign creditors admissibility of conducting secondary insolvency proceedings conducting simultaneous insolvency proceedings against the same debtor permissible forms of contact and cooperation between judges and parties to the proceedings and conducting proceedings involving a group of companies An important feature of the commentary highlights the standpoints of lawyers from Central and Eastern Europe where the commercial judiciary operates in a distinctly different way from that in countries with a well established market economy system Interpretation of provisions of the Regulation by

lawyers from this part of Europe enhances the scope of legal argument both in the economic sphere and in the sphere of justice With its detailed and in depth description of international jurisdiction recognition and universal and territorial effects of insolvency proceedings this practical book will be welcomed by counsel to business persons conducting international activity trustees in bankruptcy tax advisers court enforcement officers academics dealing with insolvency law banks dealing with the collection of receivables and debt collection companies In addition as a contribution to the debate on the optimal model for the international consequences of insolvency proceedings its discussion of issues related to national jurisdiction bankruptcy and restructuring of groups of companies and international judicial cooperation will be particularly valuable for researchers

Corporate Governance and Investment Management Roger M. Barker,Iris H.-Y. Chiu,2017-12-29

Shareholder engagement with publicly listed companies is often seen as a key means to monitor corporate malpractices In this book the authors examine the corporate governance roles of key institutional investors in UK corporate equity including pension funds insurance companies collective investment funds hedge and private equity funds and sovereign wealth funds They argue that institutions corporate governance roles are an instrument ultimately shaped by private interests and market forces as well as law and regulatory obligations and that policy makers should not readily make assumptions regarding their effectiveness or their alignment with public interest or social good

Financial Institutions in Distress Ronald

Davis,Stephan Madaus,Monica Marcucci,Irit Mevorach,Riz Mokal,Barbara Romaine,Janis Sarra,Ignacio Tirado,2023-08-10

Political boundaries are often porous to finance financial intermediation and financial distress Yet they are highly impervious to financial regulation When inhabitants of a country suffering a deficit of purchasing power are able to access and deploy funds flowing in from a country with a surfeit of such power the inhabitants of both countries may benefit They may also benefit when institutions undertaking such cross border financial intermediation experience economies of scale and are able to innovate and to offer funds and services at lower costs Inevitably however at least some such institutions will sometimes act imprudently some of the projects in which such funds are deployed may be unwise and other such projects can suffer from unforeseen circumstances As a result of such factors a financial institution may suffer distress in one country and may then transmit such distress to other countries in which it operates The efficacy of any response to such cross border transmission of distress may turn on the response being given due effect in both or all the territories in which the distressed financial institution operates This situation creates a conundrum for policymakers legislators and regulators who wish to enable those subject to their jurisdiction to access the benefits of cross border financial intermediation yet cannot make rules and regulations that would have effect outside that jurisdiction This book explores this conundrum and offers a response It does so by drawing on and adding to the literatures on financial intermediation regulation and distress and on existing hard and soft laws and regulations The book advocates for the creation of a model law that would address the full range of financial institutions including insurance companies and that would enable relevant authorities to cooperate with

counterparts in advance of the onset of distress and to give appropriate effect in their jurisdiction to measures taken by counterpart authorities in other jurisdictions in which the distressed institution also operates

World Investment and Political Risk 2013 Multilateral Investment Guarantee Agency, 2014 Breach of contract is a hot topic in risk management especially in the context of Public Private Partnerships for large utility infrastructure or mineral resource exploitation projects around the world Some claims are related to economic crisis but more often disputes arise from political change privatisation reviews environmental regulations and governance corruption issues Some recent high profile cases involving government tariff renegotiations and award settlements underline the importance of this topic for international investors Claims of breach of contract often bring about an abrupt termination of activities or force contract renegotiations that substantially alter the original terms of the deal and projected financial validity This study offers significant new data and analysis to allow an informed assessment of current developments and underlying trends in a new collaboration between the World Bank Group IBRD MIGA and ICSID and Washington University in St Louis

EU Supervision of Credit Rating Agencies ,2015 The 2008 financial crisis focused attention on the credit rating agencies and their impact on financial markets At the time there was very little regulation of the agencies in Europe In 2011 the European Securities and Markets Authority ESMA was created to register monitor and supervise them This report examines whether ESMA has successfully established itself as the credit rating agencies watchdog for the EU We conclude that while ESMA has laid down good foundations its rules and guidelines are not yet complete and significant risks remain to be addressed in the future Publisher s description
