Universal Design As A Rehabilitation Strategy Design For The Ages:

Universal Design as a Rehabilitation Strategy Jon A. Sanford, 2012-03-28 A unique resource for rehabilitation engineers design and building professionals rehabilitation counselors gerontologists psychologists and other health and mental health professionals this volume covers the significance and impact of universal design as a change agent for social and health movements With a focus that is both practical and visionary it emphasizes how the use of universal design can promote increased performance and participation for the aging population and people with disabilities while mitigating the stigma and segregation that often characterize traditional rehabilitation design strategies Written by one of the few architecturally trained researchers engaged in environmental issues related to accessibility and design for aging the book stresses that universal design is not solely for people with disabilities but is about usability and inclusion for people of all levels of ability It examines key social ecological models in rehabilitation for aging and disability and sheds new light on health and disability at both the individual and population level Particular attention is paid to the medical functional and environmental implications of disability health care and disability systems and the psychosocial and cultural issues pertinent to rehabilitation counseling Key Features Examines the medical functional and environmental implications of disability Addresses health care and disability systems Discusses psychosocial and cultural issues pertinent to rehabilitation counseling Rooted in the concepts of social equity and inclusivity through participation of older adults and disabled individuals in community and societal roles Provides a visionary yet practical paradigm that transcends traditional design problem solving

Universal Design 2021: From Special to Mainstream Solutions Ira Verma, 2021-07-15 Universal Design is a process for creating an equitable and sustainable society It is a concept committed to recognizing and accepting each individual's potential and characteristics and promoting the realization of a built environment that does not stigmatize users but enables everyone to participate fully in their community This book presents 32 articles from the 5th International Conference on Universal Design UD2021 Previous Universal Design conferences have been organized biennially but the 2020 conference was postponed due to COVID 19 restrictions and eventually held online from 9 11 June 2021 UD2021 brings together a multidisciplinary group of experts from around the world to share knowledge and best practice with the common goal of shaping the way we design avoiding stereotyped or discriminatory views and solutions that could stigmatize particular groups of people The articles are organized into chapters under seven broad themes universal design and inclusive design user experience and co design access to education and learning environment web accessibility and usability of technology architecture and the built environment mobility and transport and designing for older people The current situation has highlighted not only the importance of web accessibility the user friendliness of interfaces and remote connections during the last year the importance and quality of our daily living environment access to services and green space has also become ever more obvious This book will be of particular interest to those working to enable all those with disabilities or impairments to live

independently and participate fully in all aspects of life *Urban Design and Human Flourishing* Tim G. Townshend, 2021-04-12 The built environment influences health and well being in a myriad of ways Some neighbourhoods are plagued by busy roads that are a constant source of danger noise and air pollution In some cities there is inadequate green space for children to play and socialise safely Yet this book argues it does not have to be this way With focus on human health well being and flourishing this book explores the ways in which people s lives are impacted by the built environment and how we can create adapt and design healthy and inclusive places The volume explores the relationship between urban design and human flourishing and initiates broad discussions around relevant questions such as What is a healthy place What influences our perceptions of built environment more Is it our age or our cultural background The book includes six chapters from internationally renowned authors who attempt to unpack some of the key aspects that urban designers need to consider in order to create places that enable rather than constrain individuals and communities to live rich fulfilling lives This book will be of great value to students scholars and researchers interested in urban design planning and in exploring how built environment impacts health and happiness The chapters in this book were originally published as a special issue of the Journal of Urban Design Assistive Technologies and Environmental Interventions in Healthcare Lynn Gitlow, Kathleen Flecky, 2019-08-08 Providing a holistic and client centered approach Assistive Technologies and Environmental Interventions in Healthcare explores the individual s needs within the environment examines the relationship between disability and a variety of traditional and cutting edge technologies and presents a humanistic discussion of Technology Environment Intervention TEI Written by a multidisciplinary team of authors this text introduces readers to a variety of conceptual practice models and the clinical reasoning perspectives It also provides insight into how designers go about solving human tech problems discusses best practices for both face to face and virtual teams and looks at the psychological sociocultural and cognitive factors behind the development and provision of assistive technologies Examines a wide range of technologies and environmental interventions Demonstrates how a better understanding of the complexity of human interaction with both the physical and social environment can lead to better use of technology Explores the future of technology and research in TEI Complete with a range of learning features such as keywords case studies and review questions this book is ideal for undergraduate and graduate students in occupational therapy and other related health professions as well as those undertaking certification and board examinations **Universal Access in Human-Computer Interaction.
