Structural-Functional Studies in English Grammar Mike Hannay, Gerard J. Steen, 2007-03-29 This collection presents a number of studies in the lexico grammar of English which focus on the one hand on close reading of language in context and on the other hand on current functional theoretical concerns The various contributions represent distinct functionalist models of language including Functional Grammar and Functional Discourse Grammar Systemic Functional Grammar Role and Reference Grammar Cognitive Grammar and Construction Grammar Taken together however they typify current work being conducted from the grammatical perspective within the functionalist enterprise emphasizing on the relation between structure and usage A fundamental goal of the enterprise is to identify linguistic structures which are constrained by specific features of use or which actually encode

specific features of use as many of the contributions here show Corpus Studies in Contrastive Linguistics Stefania Marzo,Kris Heylen,Gert De Sutter,2012-09-05 Contrastive Linguistics like other linguistic disciplines is becoming more and more data oriented relying increasingly on the statistical analysis of corpus data to reveal and investigate the similarities and dissimilarities between languages The volume Corpus Studies in Contrastive Linguistics illustrates this current trend with a representative sample of contrastive linguistic case studies These cover a range of linguistic phenomena syntax modality and discourse and pursue different types of research questions grammaticalization pragmatic function stylistic function typological profile Accordingly they use different types of corpora contemporary and historical texts written and spoken discourse and various text types such as academic discourse and political discourse Five different languages are represented English French Dutch Spanish and Lithuanian with English as a language of comparison in each contribution The studies all show that quantitative analyses are not at odds with insightful qualitative interpretations or functional approaches to language but rather complement each other This volume was originally published as a special issue of *International Journal of Corpus Linguistics* 15 2 2010 Multiple Perspectives in Linguistic Research on Baltic Languages Ineta Dabašinskienė,Nicole Nau,Aurelia Usoniene,2012-01-17 The ten contributions to this volume present original research on grammar and discourse in modern Lithuanian and Latvian They reflect the diversity of approaches in linguistic research on Baltic languages that has developed in recent years after a period where these languages were studied almost exclusively from the perspective of historical comparative linguistics Current research perspectives include among others perspectives from discourse analysis sociolinguistics language acquisition research corpus linguistics contrastive studies and linguistic typology The studies in this volume explore new ways of describing the system and use of Latvian or Lithuanian from a synchronic non normative point of view They focus on grammatical categories and constructions modality evidentiality case existential clauses grammatical characteristics of lexical classes reflexive verbs numerals the characteristics of certain forms of discourse academic discourse food discourse and the effects of an ideology of correct language on language users

Discourse Functions at the Left and Right Periphery Kate Beeching,Ulrich Detges,2014-08-14 A basic property of human language is that it unfolds in time the left and right margin of discourse units do not behave in a symmetrical fashion The working hypothesis of this volume is that discourse elements at the left periphery have mainly subjective and discourse structuring functions whereas at the right periphery such elements play an intersubjective or modalising role However the picture that emerges from the different contributions to this volume is far more complex While it seems clear that the working hypothesis cannot be upheld in a strong way most of the chapters especially those based on corpus data show that an asymmetry between left and right periphery does exist and that it is a matter of frequency **Cross-linguistic Semantics of Tense, Aspect, and Modality** Lotte Hogeweg,Helen de Hoop,Andrej Malchukov,2009-11-30 In recent years we have witnessed on the one hand an increased interest in cross linguistic data in formal semantic studies and on the other

hand an increased concern for semantic issues in language typology However only few studies combine semantic and typological research for a particular semantic domain such as the papers in Bach et al 1995 on quantification and Smith 1997 on aspect This book brings together formal semanticists with a cross linguistic perspective and or those working on lesser known languages and typologists interested in semantic theory to discuss semantic variation in the specific domain of Tense Aspect and Mood Modality *Diachronic Perspectives on Domain-specific English* Marina Dossena, Irma Taavitsainen, 2006 This volume reflects the results of a workshop on the investigation of specialized discourse in a diachronic perspective held within the 15th European Symposium on Language for Special Purposes New Trends in Specialized Discourse Bergamo 2005 The articles deal with developments from the late medieval period to the present day and the book encompasses studies in which the long established tradition of domain specific English is highlighted The fields of contributions range from scientific to legal to political and business discourse Special attention is given to argumentation in an attempt to assess the time depth of typical rhetorical strategies Some methodological innovations are introduced in corpus linguistics Numerous contributions bring new materials to scholarly discussion as recently released or in progress second generation corpora are used as data Recent changes in present day legal and scientific writing are also discussed as they witness fast adaptation to new requirements due to the advent and growing familiarity of new technologies international law and changes in academia

English Modality Juana I. Marín-Arrese, Marta Carretero, Jorge Arús Hita, Johan van der Auwera, 2013-12-12 The book presents new issues and areas of work in modality and evidentiality in English and in relation to other European languages French Galician Lithuanian Spanish Given the complexity of the relations among modal and evidential expressions their constant diachronic evolution and the variation found in different English speaking areas and in different genres and discourse domains the volume addresses the following issues the conceptual nature of modality the relationship between the domains of modality and evidentiality the evolution and current status of the modal auxiliaries and other modal expressions the relationship with neighbouring grammatical categories tense aspect mood and the variation in different discourse domains and genres in modelling stance and discourse identities **The Dynamics of Language Use** Christopher Butler, María A. Gómez-González, Susana María Doval Suárez, 2005-01-01 This book brings together a collection of articles characterized by two main themes the contrastive study of parallel phenomena in two or more languages and an essentially functional approach in which language is regarded first and foremost as a rich and complex communication system inextricably embedded in sociocultural and psychological contexts of use The majority of the studies reported are empirical in nature many making use of corpora or other textual materials in the language under investigation The book begins with an introductory section in which the editors provide surveys of the state of the art in both functional and contrastive linguistics The other five sections of the volume are devoted to i a cognitive perspective on form and function ii information structure iii collocations and formulaic language iv language learning and v discourse and culture *The Handbook of the History of*
