and thoughtful guide to supporting women in labour looking at a range of techniques and approaches that promote a safe and positive experience of birth for women and their families Across the world support in labour has been shown to reduce obstetric interventions and improve outcomes for women and babies Written by two highly experienced midwifery authors this text draws on a wide range of cutting edge research on this topic identifying how the evidence can be applied to everyday practice Narratives from women and practitioners including midwives doulas childbirth educators and students are used to illustrate a range of situations where the quality of support is central to the quality of the experience and outcome Supporting Women for Labour and Birth encourages readers to reflect on their experiences and examine the evidence provided by both research and experiences of women and practitioners in order to explore how this could be incorporated into their practice The only book to deal directly with the practical and emotional issues associated with labour support this is an ideal text for student midwives and an important reference for practising midwives doulas and other childbirth practitioners

The Oxford Handbook of Cognitive Analytic Therapy Laura Brummer, Marisol Cavieres, Ranil Tan, 2024-02-28 The Oxford Handbook of Cognitive Analytic Therapy presents a comprehensive guide to the cognitive analytic therapy CAT model It balances established theory and practice alongside a focus on innovation in both direct work with clients and the application of CAT more broadly within teams organizations and training and as a model for leadership The volume includes a range of innovations in doing and using CAT which are directly applicable for those studying and working in health social care and private services across many specialties encompassing the entire lifespan This includes child and adolescent services working age through to older adults individuals engaged with mental health services and within forensic and prison populations and those experiencing physical health and neurological difficulties both in community and inpatient settings Given the social and dialogic origins of CAT the book acknowledges the importance of the wider social cultural and political factors that can shape an individual's understanding of self and other with chapters that both apply a CAT understanding to key issues such as racism and social context and provide a critique to the extent in which CAT engages with these issues in practice This volume also has a focus on professional standards and governance encompassing training supervision and a competency framework and throughout the book the editors have endeavoured to include clients voices including personal reflections extracts from actual CATs and co produced chapters to ensure the book holds true to the collaborative nature of CAT

Providing Compassionate Healthcare Sue Shea, Robin Wynyard, Christos Lionis, 2014-07-17 Despite the scope and sophistication of contemporary health care there is increasing international concern about the perceived lack of compassion in its delivery Citing evidence that when the basic needs of patients are attended to with kindness and understanding recovery often takes place at a faster level patients cope more effectively with the self management of chronic disorders and can more easily overcome anxiety associated with various disorders this book looks at how good care can be put back into the process of caring Beginning with an introduction to the historical values associated

with the concept of compassion the text goes on to provide a bio psycho social theoretical framework within which the concept might be further explained The third part presents thought provoking case studies and explores the implementation and impact of compassion in a range of healthcare settings The fourth part investigates the role that organizations and their structures can play in promoting or hindering the provision of compassion The book concludes by discussing how compassion may be taught and evaluated and suggesting ways for increasing the attention paid to compassion in health care Developing a multi disciplinary theory of compassionate care and underpinned by empirical examples of good practice this volume is a valuable resource for all those interesting in understanding and supporting compassion in health care including advanced students academics and practitioners within medicine nursing psychology allied health sociology and philosophy

Handbook of Social Justice in Loss and Grief Darcy L. Harris,Tashel C. Bordere,2016-02-05 The Handbook of Social Justice in Loss and Grief is a scholarly work of social criticism richly grounded in personal experience evocative case studies and current multicultural and sociocultural theories and research It is also consistently practical and reflective challenging readers to think through responses to ethically complex scenarios in which social justice is undermined by radically uneven opportunity structures hierarchies of voice and privilege personal and professional power and unconscious assumptions at the very junctures when people are most vulnerable at points of serious illness confrontation with end of life decision making and in the throes of grief and bereavement Harris and Bordere give the reader an active and engaged take on the field enticing readers to interrogate their own assumptions and practices while increasing chapter after chapter their cultural literacy regarding important groups and contexts The Handbook of Social Justice in Loss and Grief deeply and uniquely addresses a hot topic in the helping professions and social sciences and does so with uncommon readability

Re-humanizing Medicine David R. Kopacz,2014-11-28 What starts as personal dissatisfaction in the workplace can become personal transformation that changes clinical practice and ultimately changes the culture of medicine Physicians and professionals train extensively to relieve suffering Yet the systems they train and practice in create suffering for both themselves and their clients through the neglect of basic human needs True healthcare reform requires addressing dehumanization in medicine by caring for the whole person of the professional and the patient Re humanizing Medicine provides a holistic framework to support human connection and the expression of full human being of doctors professionals and patients A clinician needs to be a whole person to treat a whole person thus the work of transformation begins with clinicians As professionals work to transform themselves this will in turn transform their clinical practices and healthcare institutions *The Oxford Handbook of Compassion Science* Emma Seppala,Emiliana Simon-Thomas,Stephanie L. Brown,Monica C. Worline,C. Daryl Cameron,James Robert Doty,2017 With contributions from well established scholars as well as young rising stars in the field this Handbook bridges a wide variety of diverse perspectives research methodologies and theory and provides a foundation for this new and rapidly growing field
