which they will gain immensely Alan Prout Professor of Sociology University of Stirling For millennia children have been valued as possessions valued by their parents as my child and valued by communities and cultures as belonging to them Recently a new way of valuing children has emerged valuing them as people in possession of themselves as people who have rights This has led to fears that rights will erode love between parents and children and separate children from their communities and cultures Childhood and Human Value explains why people feel this way and argues that they are mistaken Adults in modern societies have separation anxieties about children's rights because they are used to measuring human value against a standard of separateness The more separate you appear to be from the opinions and control of others the more valuable you seem This highly original and accessible book shows us how to resolve the conflict between love and rights in contemporary relationships between adults and children Examining a number of Twentieth Century developmental thinkers including Vygotsky Winnicott Gilligan and Deleuze and Guattari Nick Lee argues that a more flexible and realistic understanding of the sources of human value is available to us based on separability Childhood and Human Value is key reading for students in a variety of fields including sociology of childhood family studies sociology of education psychology of development and childhood studies It is also of interest to professionals who work with children for example social workers teachers and the police

Psychoanalysis and the Future of Global Politics Robert Samuels, 2023-08-31 This book offers a unique approach by using psychoanalytic theory to explain how we can resolve the most important issues facing the world today and in the future One of my main arguments is that we need to move beyond national politics in order to provide global solutions to global problems However there is a misplaced fear concerning global governance and much of this phobia is derived from a misunderstanding of history and human psychology Not only do we have to learn to give up our idealized investment in nations and nationalism but we also have to move beyond seeing the world from the perspective of a victim fantasy Since we often repress real signs of global progress we experience the global present and the future in negative ways To reverse this perspective we need to first understand the incredible progress humans have made in the last two hundred years but we also should not ignore the real threats we face **EBOOK: Approaches to Psychology** William Glassman, Marilyn
