Toward A Minor Architecture:

Toward A Minor Architecture Jill Stoner, 2012-03-09 A major proposal for a minor architecture and for the making of spaces out of the already built Architecture can no longer limit itself to the art of making buildings it must also invent the politics of taking them apart This is Jill Stoner's premise for a minor architecture Her architect's eye tracks differently from most drawn not to the lauded and iconic but to what she calls the landscape of our constructed mistakes metropolitan hinterlands rife with failed and foreclosed developments undersubscribed office parks chain hotels and abandoned malls These graveyards of capital Stoner asserts may be stripped of their excess and become sites of strategic spatial operations But first we must dissect and dismantle prevalent architectural mythologies that brought them into being western obsessions with interiority with the autonomy of the building object with the architect's mantle of celebrity and with the idea of nature as that which is other than the built metropolis These four myths form the warp of the book Drawing on the literary theory of Gilles Deleuze and Félix Guattari Stoner suggests that minor architectures like minor literatures emerge from the bottoms of power structures and within the language of those structures Yet they too are the result of powerful and instrumental forces Provoked by collective desires directed by the instability of time and celebrating contingency minor architectures may be mobilized within buildings that are oversaturated underutilized or perceived as obsolete Stoner's provocative challenge to current discourse veers away from design through a diverse landscape of cultural theory contemporary fiction and environmental ethics Hers is an optimistic and inclusive approach to a more politicized practice of architecture

What Is a Minor Architecture?, digital original edition Jill Stoner, 2014-01-10 Jill Stoner's architect's eye tracks differently from most drawn not to the lauded and iconic but to what she calls the landscape of our constructed mistakes metropolitan hinterlands rife with failed and foreclosed developments undersubscribed office parks chain hotels and abandoned malls In this BIT Stoner introduces the idea of minor architectures that emerge from the bottoms of power structures and within the language of those structures

Architectures of Refusal Jill Stoner, Ozayr Saloojee, 2023-01-17 Guest edited by Jill Stoner and Ozayr Saloojee Over the past decade and in a more concentrated form over the past two years there has been increasing recognition of architecture's systemic complicity in constructing and upholding hierarchies of race and class and privileging colonial paradigms that perpetuate spatial and economic inequity This AD issue reveals how designers practitioners scholars and architects are participating in dismantling the major canons of Western architecture The work is both literal and figural taking buildings apart and reconstituting them and challenging mythologies that include drawing as analogue building as object architect as hero and nature as other Architecture has both potential and responsibility for political agency in the public realm The contributions to this issue foreground emancipatory spatial ideas and practices from around the world demonstrating that refusal is no longer just absence and denial but a constructive mode of resistance and

action that needs to be approached through subversive urban works design pedagogy and alliances across multiple disciplines Contributors Piper Bernbaum Carwil Bjork James Thresh Govender Lucia Jal n Oyarzun Jennifer Newsom and Tom Carruthers Cong Chi Nguyen Quilian Riano Hannah Le Roux Alberto de Salvatierra Cathy Smith Chat Travieso and Ilze Wolff

Architecture After Deleuze and Guattari Chris L. Smith, 2023-05-04 This study illuminates the complex interplay between Deleuze and Guattari's philosophy and architecture Presenting their wide ranging impact on late 20th and 21st century architecture each chapter focuses on a core Deleuzian Guattarian philosophical concept and one key work of architecture which evokes contorts or extends it Challenging the idea that a concept or theory defines and then produces the physical work and not vice versa Chris L Smith positions the relationship between Deleuze and Guattari's philosophy and the field of architecture as one that is mutually substantiating and constitutive In this framework modes of architectural production and experimentation become inextricable from the conceptual territories defined by these two key thinkers producing a rigorous discussion of theoretical practical and experimental engagements with their ideas

The Ethics of a Potential Urbanism Camillo Boano, 2016-11-25 The Ethics of a Potential Urbanism explores the possible and potential relevance of Giorgio Agamben's political thoughts and writings for the theory and the practice of architecture and urban design It sketches out the potentiality of Agamben's politics which can affect change in current architectural and design discourses The book investigates the possibility of an inoperative architecture as an ethical shift for a different practice just a little bit different but able to deactivate the sociospatial dispositive and mobilize a new theory and a new project for the urban now to come This particular reading from Agamben's oeuvre suggests a destituent mode of both thinking and practicing of architecture and urbanism that could possibly redeem them from their social emptiness cultural irrelevance economic reductionism and proto avant garde extravagance contributing to a renewed critical encounter with architecture's aesthetic political function

Transmediations Niklas Salmose, Lars Elleström, 2019-11-22 This collection offers a multi faceted exploration of transmediations the processes of transfer and transformation that occur when communicative acts in one medium are mediated again through another While previous research has explored these processes from a broader perspective Salmose and Elleström argue that a better understanding is needed of the extent to which the outcomes of communicative acts are modified when transferred across multimodal media in order to foster a better understanding of communication more generally Using this imperative as a point of departure the book details a variety of transmediations viewed through four different lenses The first part of the volume looks at narrative transmediations building on existing work done by Marie Laure Ryan on transmedia storytelling The second section focuses on the spatial dynamics involved in media transformation as well as the role of the human body as a perceptive agent and a medium in its own right The third part investigates new radical boundaries and media types in transmediality and hence shows its versatility as a method of analyzing complex and contemporary communicative discourses The fourth and final part explores the challenges involved in transmediating scientific data into the narrative format in the context of environmental issues Taken together these sections highlight a range of case studies of transmediations and in turn the complexity and variety of the process informed by the methodologies of the different disciplines to which they belong This innovative volume will be of particular interest to students and scholars in multimodality communication intermediality semiotics and adaptation studies *Pamuk's Istanbul* Pallavi

Narayan, 2022-04-28 This book reconstructs Istanbul through the prism of Orhan Pamuk's fiction It navigates the multiple selves and layers of Istanbul to present how the city has shaped the writings of Pamuk and has in turn been shaped by it Through everyday objects and architecture it shows how Pamuk transforms the city into a living museum where different objects converse along with characters to present a rich tapestry across space and time Further the monograph explores the formation of communal and literary identity within and around nation building narratives informed by capitalism and modernization The book also examines how Pamuk uses the postmodern city to move beyond its postmodern confines and utilizes the theories and universes of Bakhtin Benjamin and Foucault to open up his fiction and radically challenge the idea of the novel The volume will be of great interest to scholars and researchers of literature literary theory museum studies architecture and cultural studies and especially appeal to readers of Orhan Pamuk

This Thing Called Theory Teresa Stoppani, Giorgio Ponzio, George Themistokleous, 2016-11-10 In the age of post digital architecture and digital materiality This Thing Called Theory explores current practices of architectural theory their critical and productive role The book is organized in sections which explore theory as an open issue in architecture as it relates to and borrows from other disciplines thus opening up architecture itself and showing how architecture is inextricably connected to other social and theoretical practices The sections move gradually from the specifics of architectural thought its history theory and criticism and their ongoing relation with philosophy to the critical positions formulated through architecture's specific forms of expression and

onto more recent forms of architecture's engagement and self definition. The book's thematic sessions are concluded by and interspersed with a series of shorter critical position texts which together propose a new vision of the contemporary role of theory in architecture. What emerges overall is a critical and productive role for theory in architecture today: theory as a proposition, theory as task and as a risk of architecture.
