Toward A Composition Made Whole:

Toward a Composition Made Whole Jody L. Shipka, 2011-04-30 To many academics composition still represents typewritten texts on 8 5 x 11 pages that follow rote argumentative guidelines In *Toward a Composition Made Whole* Jody Shipka views composition as an act of communication that can be expressed through any number of media and as a path to meaning making Her study offers an in depth examination of multimodality via the processes values structures and semiotic practices people employ every day to compose and communicate their thoughts Shipka counters current associations that equate multimodality only with computer digitized or screen mediated texts which are often self limiting She stretches the boundaries of composition to include a hybridization of aural visual and written forms Shipka analyzes the work of current scholars in multimodality and combines this with recent writing theory to create her own teaching framework Among her methods Shipka employs process oriented reflection and a statement of goals and choices to prepare students to compose using various media in ways that spur their rhetorical and material awareness They are encouraged to produce unusual text forms while also learning to understand the composition process as a whole Shipka presents several case studies of students working in multimodal composition and explains the strategies tools and spaces they employ She then offers methods to critically assess multimodal writing projects *Toward a Composition Made Whole* challenges theorists and compositionists to further investigate communication practices and broaden the scope of writing to include all composing methods While Shipka views writing as crucial to discourse she challenges us to always consider the various purposes that writing serves *The Routledge Handbook of Digital Writing and Rhetoric* Jonathan Alexander, Jacqueline Rhodes, 2018-04-27 This handbook brings together scholars from around the globe who here contribute to our understanding of how digital rhetoric is changing the landscape of writing Increasingly all of us must navigate networks of information compose not just with computers but an array of mobile devices increase our technological literacy and understand the changing dynamics of authoring writing reading and publishing in a world of rich and complex texts Given such changes and given the diverse ways in which younger generations of college students are writing communicating and designing texts in multimediated electronic environments we need to consider how the very act of writing itself is undergoing potentially fundamental changes These changes are being addressed increasingly by the emerging field of digital rhetoric a field that attempts to understand the rhetorical possibilities and affordances of writing broadly defined in a wide array of digital environments Of interest to both researchers and students this volume provides insights about the fields of rhetoric writing composition digital media literature and multimodal studies *Making Progress* Logan Bearden, 2022-04-01 *Making Progress* is an empirical investigation into the strategies and processes first year composition programs can use to center multimodal work in their curricula Logan Bearden makes a unique contribution to the field presenting a series of flexible strategies evolving considerations and best practices that can be taken up adapted and implemented by programs and directors that want to achieve what Bearden

brands multimodal curricular transformation or MCT at their own institutions MCT can be achieved at the intersection of program documents and practices Bearden details ten composition programs that have undergone MCT offering interview data from the directors who oversaw and or participated within the processes He analyzes a corpus of outcomes statements to discover ways we can make space for multimodality and gives instructors and programs a broader understanding of the programmatic values for which they should strive if they wish to make space for multimodal composition in curricula Making Progress also presents how other program documents like syllabi and program websites can bring those outcomes to life and make multimodal composing a meaningful part of first year composition curricula First year composition programs that do not help their students learn to compose multimodal texts are limiting their rhetorical possibilities The strategies in Making Progress will assist writing program directors and faculty who are interested in using multimodality to align programs with current trends in disciplinary scholarship and deal with resistance to curricular revision to ultimately help students become more effective communicators in a digital global age
