Toxic Terror! Robin Twiddy, 2019-12-15 Angelina Butterworth couldn't understand why people kept polluting our planet until the day she discovered it was the diabolical plan of aliens bent on destroying Earth. In this entertaining and instructive narrative, readers will be on the edge of their seats as they find out if Angelina can escape the slimy tentacles of the evil Toxlings while learning what people can do in real life to stop our world from becoming an actual toxic wasteland. This valuable volume shows that science fiction can teach us important facts and even help save our planet. Toxic Terror Jonathan B. Tucker, 2000-02-28 In depth case studies of twelve terrorist groups and individuals who from 1946 to 1998 allegedly acquired or employed CBW agents. Policymakers, scholars, and the news media have been alarmed by the potential for chemical and biological weapons. CBW terrorism and the U.S. Congress has allocated billions of dollars for counterterrorism and consequence management programs. Driving these concerns are the global spread of scientific knowledge and technology relevant to CBW terrorism and the vulnerability of civilian populations to chemical and biological attacks. Notably lacking from the analysis, however, has been a careful assessment of the terrorists themselves. What types of terrorist groups or individuals are both capable of acquiring chemical and biological weapons and motivated to use them and for what purposes? Further, what types of toxic agents would probably be produced and how would they be delivered? Answers to these questions would enable policymakers to prepare for the most likely contingencies. To this end, **Toxic Terror** provides in depth case studies of twelve terrorist groups and individuals who from 1946 to 1998 allegedly acquired or employed CBW agents. The cases were researched from primary sources including court documents, interviews, and declassified government files. By comparing the twelve cases, the book identifies characteristic motivations and patterns of behavior associated with CBW terrorism and provides an empirical basis for prudent, cost-effective strategies of prevention and response. **Facts Vs. Fears: A Review of the Greatest Unfounded Health Scares of Recent Times**, Lone Wolf Terror and the Rise of Leaderless Resistance George Michael, 2021-04-30 On July 22, 2011, Anders Behring Breivik detonated a car bomb in downtown Oslo, Norway. He didn't stop there; traveling several hours from the city to ambush a youth camp while the rest of Norway was distracted by his earlier attack. That's where the facts end. But what motivated him? Did he have help staging the attacks? The evidence suggests a startling truth: that this was the work of one man pursuing a mission he was convinced was just. If Breivik did indeed act alone, he wouldn't be the first. Timothy McVeigh bombed a federal building in Oklahoma City based essentially on his own motivations. Eric Robert Rudolph embarked on a campaign of terror over several years, including the Centennial Park bombing at the 1996 Olympics. Ted Kaczynski was revealed to be the Unabomber that same year. And these are only the most notable examples. As George Michael demonstrates in Lone Wolf Terror and the Rise of Leaderless Resistance, they are not isolated cases. Rather, they represent the new way warfare will be conducted in the twenty-first

century Lone Wolf Terror investigates the motivations of numerous political and ideological elements such as right wing individuals ecoextremists foreign jihadists and even quasi governmental entities In all these cases those carrying out destructive acts operate as lone wolves and small cells with little or no connection to formal organizations Ultimately Michael suggests that leaderless resistance has become the most common tactical approach of political terrorists in the West and elsewhere **Action Man - Toxic Terror** Egmont Books, Limited,2000-10 **Teaching Terror** James JF
