I. Purpose and Scope

The purpose of this Memorandum of Understanding (MOU) is to clearly identify the roles and responsibilities of each party as they relate to providing outreach for improved access to the Supplemental Nutrition Assistance Program (SNAP), also known as the CalFresh Program in California.¹ California's CalFresh program is funded federally by the United States Department of Agriculture (USDA) and administered at the state level by the California Department of Social Services (CDSS).

The CalFresh Program is intended to help inform low-income households about the availability, eligibility requirements, application procedures and benefits of the CalFresh Program. To support this goal, **Party A** and **Party B** will conduct CalFresh outreach to eligible families as described in their respective Scopes of Work. Allowable services are outlined in the USDA SNAP State Outreach Plan Guidance located at the following link:

<http://www.fns.usda.gov/snap/outreach/guidance/stateplan.htm>

Both **Party A** and **Party B** should ensure that program activities are conducted in compliance with all applicable federal laws, rules, and regulations including Civil Rights and Office of Management and Budget (OMB) circulars governing cost issues.

¹ On October 1, 2008, the Food Stamp Program's federal name became the Supplemental Nutrition Assistance Program (SNAP). States are allowed to call the program by different names and in California, SNAP is now known as CalFresh.

the climate of debate policies and institutional arrangements arising from the state's regulation and administration of culture in Ireland from 1800 to 2010. It traces the influence of precedent and practice developed under British rule in the nineteenth century on government in the 26 county Free State established in 1922, subsequently declared the Republic of Ireland in 1949. It demonstrates the enduring influence of the liberal principle of minimal intervention in cultural life on the approach of successive Irish governments to the formulation of cultural policy right up to the 1970s. From 1973 onwards, however, the state began to take a more interventionist and welfarist approach to culture. This was marked by increasing professionalization of the arts and heritage and a decline in state support for amateur and voluntary cultural bodies. That the state had a more expansive role to play in regulating and funding culture became a norm of cultural discourse. **Nordic**

Perspectives on the Responsible Development of the Arctic: Pathways to Action Douglas C. Nord, 2020-10-30. This book investigates the multifaceted nature of change in today's Nordic Arctic and the necessary research and policy development required to address the challenges and opportunities currently faced by this region. It focuses its attention on the recent efforts of the Nordic community to create specialized Centers of Excellence in Arctic Research in order to facilitate this process of scientific inquiry and policy articulation. The volume seeks to describe both the steps that lead to this decision and the manner in which this undertaking has evolved. The work highlights the research efforts of the four Centers and their investigations of a variety of issues including those related to ecosystem and wildlife management, the revitalization of resource-dependent communities, the emergence of new climate-born diseases, and the development of adequate modeling techniques to assist northern communities in their efforts at adaptation and resilience building. Major discoveries and insights arising from these and other efforts are detailed, and possible policy implications considered. The book also focuses attention on the challenges of creating and supporting multidisciplinary teams of researchers to investigate such concerns and the methods and means for facilitating their collaboration and the integration of their findings to form new and useful perspectives on the nature of change in the contemporary Arctic. It also provides helpful consideration and examples of how local and indigenous communities can be engaged in the co-production of knowledge regarding the region. The volume discusses how such research findings can be best communicated and shared between scientists, policymakers, and northern residents. It considers the challenges of building common concern not just among different research disciplines but also between bureaucracies and the public. Only when this bridge-building effort is undertaken can true pathways to action be established. **Higher Education Challenges in South-East Asia** Kahl, Christian, 2020-10-23.
