Toward a New Interior Lois Weinthal, **Toward a New Interior** Lois Weinthal, 2011-10-19 Interior design as a relatively young discipline within the academic world of design has historically been interpreted as an extension of other fine arts Narratives exist but they all too often treat interior design as a function of architecture or display rather than experience An independent interior design theory is virtually nonexistent Professor Lois Weinthal envisions a future where interior design is treated with parity to architecture and industrial design a future with a new interior A reader for architects and interior designers Weinthal has carefully curated a collection of forty eight essays that will form the foundation of interior design theory and shape future interior space Her introductory essays illuminate each source prefacing and directing discussion of the material as it relates to interior design theory Alluding to Le Corbusier's classic text she has organized this material into a framework that inspires conversation marking a break with the past and forming a new vocabulary for the discourse Contributions to the book's eight sections include essays by David Batchelor Aaron Betsky Petra Blaisse Andrew Blauvelt Beatriz Colomina Le Corbusier Robin Evans Adolf Loos Ellen Lupton Charlotte Perkins Gilman Michel Serres Henry Urbach Wim Wenders and Mark Wigley **The Interiors Theory Primer** William Mangold, 2025-07-31 In a world where life is increasingly defined by the spaces we inhabit understanding interiors is essential to understanding ourselves The Interiors Theory Primer maps the intellectual terrain of interior design and spatial experience introducing readers to key concepts that shape how people occupy interior spaces Organized into three parts this book begins with foundational concerns such as place identity materiality and atmosphere and then examines the boundaries and expertise of the discipline before turning to critical and emerging topics like biophilia virtuality and social justice Each chapter presents a focused literature review of a major theme in interiors theory supported by key design precedents and suggestions for further reading Drawing on a wide range of scholarship The Interiors Theory Primer offers a coherent framework for understanding interiors as a distinct interdisciplinary field deeply embedded in the human condition Accessible to students useful to professionals and provocative for scholars The Interiors Theory Primer argues that the designed environments in which we live work and gather deserve greater attention not only for their aesthetic and functional qualities but also for their powerful role in shaping contemporary life **Interior Design on Edge** Erica Morawski, Deborah Schneiderman, Keena Suh, Karin Tehve, Karyn Zieve, 2024-04-25 Interior Design on Edge explores ways that interiors both constitute and upset our edges whether physical conceptual or psychological imagined implied necessary or discriminatory The essays in this volume explore these questions in history theory and praxis through a focus on different periods cultures and places Interior Design on Edge showcases new scholarship that expands and contests traditional relationships between architecture interiors and the people that use and design them provoking readers to consider the interior differently moving beyond its traditional architectural definition Focusing on the concept of interiority considered in a wider sense it draws on interdisciplinary modes of

investigation and analysis and reflects the latest theoretical developments in the fields of interior design history and practice With new research from both established and emerging authors this volume will make a valuable contribution to the fields of Interior Design Architecture Art and Design History Cultural History Visual Culture Studies and Urban Studies **idea**

**journal: (extra) ordinary interiors: practising critical reflection** Julieanna Preston, 2021-09-01 Extra Ordinary Interiors features research articles and visual essays by academics research students and practitioners that demonstrate contemporary modes of criticality and reflection on specific interior environments in ways that expand upon that which is ordinary of the everyday common banal or taken for granted Design History Beyond the Canon Jennifer Kaufmann-Buhler, Victoria Rose Pass, Christopher Wilson, 2019-02-07 Design History Beyond the Canon subverts hierarchies of taste which have dominated traditional narratives of design history The book explores a diverse selection of objects spaces and media ranging from high design to mass produced and mass marketed objects as well as counter cultural and sub cultural material The authors research highlights the often marginalised role of gender and racial identity in the production and consumption of design the politics which underpins design practice and the role of designed objects as pathways of nostalgia and cultural memory While focused primarily on North American examples from the early 20th century onwards this collection also features essays examining European and Soviet design history as well as the influence of Asia and Africa on Western design practice The book is organised in three thematic sections Consumers Intermediaries and Designers The first section analyses a range of designed objects and spaces through the experiences and perspectives of users The second section considers intermediaries from both technology and cultural industries as well as the hidden labour within the design process itself The final section focuses on designers from multiple design disciplines including high fashion industrial design interior design graphic design and design history pedagogy The essays in all three sections utilise different research methods and a wide range of theoretical approaches including feminist theory critical race theory spatial theory material culture studies science and technology studies and art history Design History Beyond the Canon brings together the most recent research which stretches beyond the traditional canon and looks to interdisciplinary methodologies to better understand the practice and consumption of design **The Prefabricated Interior** Deborah Schneiderman, 2024-11-12 Though much attention has been given to the prefabrication of architecture there has been little discussion on the influence and importance of prefabrication within the interior environment This book does just that providing a comprehensive investigation into the prefab interior from the 19th century to the present and beyond Each chapter focuses on a typology of the prefabricated interior looking at the bathroom kitchen workspace furniture mobile interiors the prefab house textiles wearables and the digital realm of printed interiors Taken as a group these chapters and illustrations indicate that constructs of the interior have been pivotal in the generation of techniques and processes of prefabrication in architecture and the built environment Chapters explore a diverse range of examples of innovative prefabricated elements and assemblages within

interior environments illustrating the inherent sustainability accessibility building efficiency and affordability of prefabricated design The culmination of a decade of research by the leading expert on the topic this will be the go to resource on prefabricated interiors and an important read for all students and researchers in interior design The Interior Architecture Theory Reader Gregory Marinic,2018-01-17 The Interior Architecture Theory Reader presents a global compilation that collectively and specifically defines interior architecture Diverse views and comparative resources for interior architecture students educators scholars and practitioners are needed to develop a proper canon for this young discipline As a theoretical survey of interior architecture the book examines theory history and production to embrace a full range of interior identities in architecture interior design digital fabrication and spatial installation Authored by leading educators theorists and practitioners fifty chapters refine and expand the discourse surrounding interior architecture

here present a challenging account of the boundaries between design history and its cognate disciplines especially art history The volume comprises five sections Time Place Space Objects and Audiences that discuss environments for design and how we interact with designed objects and spaces Notable features include 24 new essays reflecting the current state of design history and theory and examining developments on a global basis Contributions by eminent scholars and practitioners from around the globe Enriched throughout with illustrations A Companion to Contemporary Design since 1945 provides a new and thought provoking revision of our conception and understanding of contemporary design that will be essential reading for students at both undergraduate and graduate levels as well as researchers and teachers working in design history theory and practice and in related fields
