Legumes under Environmental Stress Parvaiz Ahmad, 2015-02-16

Legumes under Environmental Stress Legumes under Environmental Stress Yield Improvement and Adaptations Leguminous crops have been found to contribute almost 27% of the world's primary crop production However due to environmental fluctuations legumes are often exposed to different environmental stresses leading to problems with growth and development and ultimately decreased yield This timely review explains the transcriptomics proteomics genomics metabolomics transgenomics functional genomics and phenomics of a wide range of different leguminous crops under biotic and abiotic

stresses and their genetic and molecular responses Amongst others the text describes the effect of nutrient deficiency pesticides salt and temperature stress on legumes Importantly the book explores the physiobiochemical molecular and omics approaches that are used to overcome biotic and abiotic constraints in legumes It looks at the exogenous application of phytoprotectants the role of nutrients in the alleviation of abiotic stress and the microbial strategy for the improvement of legume production under hostile environments Key features demonstrates how to mitigate the negative effect of stress on leguminous crops and how to improve the yield under stress the most up to date research in the field written by an international team of active researchers and practitioners across academia industry and non profit organisations This volume is a valuable and much needed resource for scientists professionals and researchers working in plant science breeding food security crop improvement and agriculture worldwide In universities it will educate postgraduate and graduate students in plant science and agriculture it will also benefit those in scientific institutions and in biotech and agribusiness companies who deal with agronomy and environment

Soil pollution: a hidden reality Food and Agriculture Organization of the United Nations,2018-04-30 This document presents key messages and the state of the art of soil pollution its implications on food safety and human health It aims to set the basis for further discussion during the forthcoming Global Symposium on Soil Pollution GSOP18 to be held at FAO HQ from May 2nd to 4th 2018 The publication has been reviewed by the Intergovernmental Technical Panel on Soil ITPS and contributing authors It addresses scientific evidences on soil pollution and highlights the need to assess the extent of soil pollution globally in order to achieve food safety and sustainable development This is linked to FAO s strategic objectives especially SO1 SO2 SO4 and SO5 because of the crucial role of soils to ensure effective nutrient cycling to produce nutritious and safe food reduce atmospheric CO₂ and N₂O concentrations and thus mitigate climate change develop sustainable soil management practices that enhance agricultural resilience to extreme climate events by reducing soil degradation processes This document will be a reference material for those interested in learning more about sources and effects of soil pollution

Microbial Mitigation of Stress Response of Food Legumes N. Amaresan,Senthilkumar Murugesan,Krishna Kumar,A. Sankaranarayanan,2020-03-31 Microbial Mitigation of Stress Responses of Food Legumes provides knowledge on the impact of abiotic and biotic stress on the agriculture of grain legumes especially pulses and it critically reviews the cutting edge research in exploring plant microbe interactions to mitigate the stress It helps in understanding the fundamentals of microbial mediated management of abiotic and biotic stress in grain legumes Salient features Describes the usefulness of microbiome of plant insects for enhancing the production of grain legumes Focuses on recent advances in microbial methods for mitigating the stress and their application in sustainability of legume production Provides a unique collection of microbial data for the improvement of legume productivity Details microbial metabolites at the gene and molecule levels for plant stress management The reader will get all essential and updated information on various stress factors crop responses and microbial mediated stress management for

better food legume production
