

Lighting

(continued)

There is a projection which may be used to lower the lamp on the left side of the lamp guard. This is good for hand sewing, threading the needle or for detail work. To change the light bulb, see the chapter "Care of the Machine".

Checking the lower thread

The picture shows you how to lift the extension plate in order to be able to open the shuttle door and make sure that there is thread on the bobbin. Until you are completely familiar with the machine, it may be simpler to remove the extension plate.

There is a small recess on the free arm to facilitate the opening of the shuttle door.

Grasp the bobbin case with the thumb and index finger so that the latch is depressed and draw out the bobbin case. The bobbin will remain in the case as long as the latch is depressed. When you release the catch, the bobbin will be released.
