[The Advent of PhyloCode](#) Michel Laurin, 2023-08-03 Biological nomenclature is an essential tool for storing and retrieving biological information. Yet traditional nomenclature poorly reflects evolutionary theory. Current biological nomenclature is one of the few fields promoting deliberately vague usage of technical terms. A new code based on evolutionary studies and phylogenetic results, the PhyloCode, will be a major milestone in biological nomenclature. Unfortunately, *The PhyloCode* and the companion volume are highly technical publications intended for practicing systematists. This book will reach a broader readership of those using nomenclature but who remain unaware of its theoretical foundations.

Key Features Responds to the biodiversity crisis and the recent implementation of the PhyloCode. Summarizes the spectacular progress of phylogenetics which makes it both increasingly easy and crucially important to define precisely taxon names. Provides a 300-year historical perspective featuring high-profile characters such as Linnaeus and Darwin. Summarizes for a broad readership a widely scattered, highly technical and underappreciated scientific literature. Documents the activities of the International Society for Phylogenetic Nomenclature, a scholarly society in which the author has played a prominent role.

Narratives of fear and safety Kaisa Kaukiainen, Kaisa Kurikka, Hanna Mäkelä, Elise Nykänen, Sanna Nyqvist, Juha Raipola, Anne Riippa, Hanna Samola, 2020-09-01 The essays in this edited volume, written in English and French, tackle the intriguing problems of fear and safety by analysing their various meanings and manifestations in literature and other narrative media. The articles bring forth new cross-cultural interpretations on fear and safety through examining what kinds of genre-specific means of world-making narratives use to express these two affectivities. The articles also show how important it is to study these themes in order to understand challenges in times of global threats such as the climate crisis. The main themes of the book are approached from various theoretical perspectives as related to their literary and cultural representations. Recent trends in research such as affect and risk theory serve as the basis for the discussion. The articles in the volume also draw from disciplines such as gender studies and trauma studies to examine the threats posed by collective fears and aggression on individuals' lives and propose ways of coping with fear. These themes are addressed also in articles analysing new adaptations of old myths that retell stories of the past. Many of the articles in the volume discuss apocalyptic and dystopian narratives that currently permeate the entire cultural landscape.

Dystopian narratives do not only deal with future threats such as totalitarianism technocracy or environmental disasters but also suggest alternative ways of being and new hopes in the form of political resistance
