Virtual War Kosovo And Beyond:

Virtual War Michael Ignatieff, 2001-06-02 Virtual War describes the latest phase in modern combat war fought by remote control Kosovo was such a virtual war a war in which US and NATO forces did the fighting but only Kosovars and Serbs did the dying Ignatieff raises the troubling possibility that virtual wars so much easier to fight could become the way superpowers impose their will in the century ahead **Millennium Lecture I - Virtual War**, 1999 *War and Virtual War*, 2021-10-25 If the practice of war is as old as human history so too is the need to reflect upon war to understand its meaning and implications The Pre Socratic philosopher Heraclitus asserted in 600BC that War polemos is justice thus inaugurating a long philosophical tradition of consideration of the morality of war In recent times the increased specialisation of academic disciplines has led to a fragmentation of the thematic of war within the academy the topic of war is as likely to be addressed by sociologists cultural theorists psychologists and even computer scientists as it is by historians philosophers or political scientists This diversity of disciplinary approaches to war is undoubtedly fruitful in itself but can lead to an isolation of respective disciplinary analyses of war from each other In July 2002 at Mansfield College Oxford an inter disciplinary conference on war entitled War and Virtual War was held so as to redress some of this disciplinary isolationism and to forge an integrative dialogue on war in all its facets The papers in this volume were nominated by delegates as the most paradigmatic of the ethos of the original project and the most successful in achieving its aims of inter disciplinaryity and critical dialogue **Military Law Review**, 2001 **War And Peace In The 20th Century And Beyond, The Nobel Centennial Symposium** Geir Lundestad, Olav Njolstad, 2003-03-21 At the turn of the 21st Century the world was immediately gripped by the War on Terrorism followed by the Iraq War In reflection the 20th Century was a period marked by tremendous technological and economic progress but it was also the most violent century in human history It witnessed two horrendous world wars as well as the conflicts during the Cold War Why do wars persistently erupt among nations particularly the Great Powers What are the primary factors that drive nations to violence power prestige ideology or territory Or is it motivated by pure fear and mistrust Peering nervously at the 21st Century we wonder whether American supremacy and globalization will help ensure peace and stability Or will shifts in power with the emergence of new economic super nations lead to further tensions and conflicts in this century Together with 29 Peace Nobel laureates an outstanding group of scholars gathered in Oslo Norway on December 6 2001 for the three day Nobel Centennial Symposium to discuss The Conflicts of the 20th Century and the Solutions for the 21st Century Read this book for the scholars candid insights and analyses as well as their thought provoking views on the factors that led to conflicts in the 20th Century and whether the 21st Century will be a more peaceful one This is a rare and possibly the best and only book compilation of the highly intellectual analyses by world experts and Nobel Peace laureates on the perennial issues of War Peace [Documentary Across Platforms](#) Patricia R. Zimmermann, 2019-10-01 Essays capturing media ecologies as varied as museum installations

film festival showings photography and multiple varieties of internet sharing Jump Cut In Documentary Across Platforms noted scholar of film and experimental media Patricia R Zimmermann offers a glimpse into the ever evolving constellation of practices known as documentary and the way in which they investigate engage with and interrogate the world Collected here for the first time are her celebrated essays and speculations about documentary experimental and new media published outside of traditional scholarly venues These essays envision documentary as a complex ecology composed of different technologies sets of practices and specific relationships to communities engagement politics and social struggles Through the lens of reverse engineering the concept that ideas just like objects can be disassembled to learn how they work and then rebuilt into something new and better Zimmermann explores how numerous small scale documentary works present strategies of intervention into existing power structures Adaptive to their context modular and unfixed the documentary practices she explores exploit both sophisticated high end professional and consumer grade amateur technologies moving through different political terrains different platforms and different exhibition contexts Together these essays demonstrate documentary's role as a conceptual practice to think through how the world is organized and to imagine ways that it might be reorganized with actions communities and ideas

Genocide, Mass Atrocity, and War Crimes in Modern History James Larry Taulbee, 2017-02-06 Defining genocide as an international crime this two volume set provides a comparative study of historical cases of genocide and mass atrocity clearly identifying the factors that produced the attitudes and behaviors that led to them discusses the reasons for rules in war and examines how the five principles laid out in the Geneva Conventions and other international agreements have functioned in modern warfare Written by an expert on international politics and law Genocide Mass Atrocity and War Crimes in Modern History Blood and Conscience is an easy to understand resource that explains why genocides and other atrocities occur why humanity saw the need to create rules that apply during war and how culture rules about war and the nature of war intersect The first volume addresses the history and development of the normative regime's that define genocide and mass atrocity Through a comparative study of historical cases that pay particular attention to the factors involved in producing the attitudes and behaviors that led to the incidents of mass slaughter and mistreatment the author identifies the reasons that genocides and mass atrocities in the 20th century were largely ignored until the early 1990s and why even starting then responses were inconsistent The second book discusses why rules in war exist which factors may lead to the adoption of rules what defines a war crime and how the five fundamental principles laid out in the Geneva Conventions and other international agreements have actually functioned in modern warfare It also poses and answers the interesting question of why we should obey rules when our opponents do not The final chapter examines what actions could serve to identify future situations in which mass atrocities may occur and identifies the problems of timely humanitarian intervention in international affairs

Peace Studies Matthew Evangelista, 2005 The academic field of Peace Studies emerged during the Cold War to address the nature and sources of interstate and internal

conflict and methods to prevent it and deal with its consequences **To Kill Another** Graham McAleer,2011-12-31 Basing his argument on natural law Graham J McAleer asserts that only public authority has the right to intentionally kill He draws upon the work of Thomas Aquinas and Francisco de Vitoria defending the claim that these natural law theorists have developed the best available theory of homicide To have rule of law in any meaningful sense the author argues there must be protections for the guilty and prohibition against killing innocents Western theories of law have drifted steadily towards the privatization of homicide despite the fact that it runs counter to rule of law Public acts of homicide like capital punishment are now viewed by many as barbaric while a private act of homicide like the starvation of comatose patients is viewed by many as a caring gesture both to patient and family This subversion of the rule of law is prompted by humanitarian ethics McAleer argues that humanitarianism is a false friend to those committed to the rule of law The problem of human vulnerability makes political theology an inescapable consideration for law Readers will find much to reflect upon in this book McAleer s argument can be read as a cultural chapter in the history of moral ideas but also as a close and timely reading of a grim subject **War and the Media** Daya Kishan Thussu,Des Freedman,2003-06-02 War and the media brings together internationally known contributors It is an essential guide to understanding the institutions and technologies involved in the production and consumption of television news
