Visible Empire Botanical Expeditions And Visual Culture In The Hispanic Enlightenment:

Visible Empire Daniela Bleichmar, 2012-10-08 Between 1777 and 1816 botanical expeditions crisscrossed the vast Spanish empire in an ambitious project to survey the flora of much of the Americas the Caribbean and the Philippines While these voyages produced written texts and compiled collections of specimens they dedicated an overwhelming proportion of their resources and energy to the creation of visual materials European and American naturalists and artists collaborated to manufacture a staggering total of more than 12 000 botanical illustrations Yet these images have remained largely overlooked until now In this lavishly illustrated volume Daniela Bleichmar gives this archive its due finding in these botanical images a window into the worlds of Enlightenment science visual culture and empire Through innovative interdisciplinary scholarship that bridges the histories of science visual culture and the Hispanic world Bleichmar uses these images to trace two related histories the little known history of scientific expeditions in the Hispanic Enlightenment and the history of visual evidence in both science and administration in the early modern Spanish empire As Bleichmar shows in the Spanish empire visual epistemology operated not only in scientific contexts but also as part of an imperial apparatus that had a long established tradition of deploying visual evidence for administrative purposes

Explorations and Entanglements

Hartmut Berghoff, Frank Biess, Ulrike Strasser, 2018-11-16 Traditionally Germany has been considered a minor player in Pacific history its presence there was more limited than that of other European nations and whereas its European rivals established themselves as imperial forces beginning in the early modern era Germany did not seriously pursue colonialism until the nineteenth century Yet thanks to recent advances in the field emphasizing transoceanic networks and cultural encounters it is now possible to develop a more nuanced understanding of the history of Germans in the Pacific The studies gathered here offer fascinating research into German missionary commercial scientific and imperial activity against the backdrop of the Pacific's overlapping cultural circuits and complex oceanic transits

Empire and Science in the Making

P. Boomgaard, 2013-10-23 Drawing on extensive new research and bringing much new scholarship before English readers for the first time this wide ranging volume examines how knowledge was created and circulated throughout the Dutch Empire and how these processes compared with those of the Imperial Britain Spain and Russia

Transatlantic Revolutionary Cultures, 1789-1861

Charlotte A. Lerg, Heléna Tóth, 2017-11-06 Transatlantic Revolutionary Cultures 1789 1861 argues that the revolutionary era constituted a coherent chapter in transatlantic history and that individual revolutions were connected to a broader transatlantic and transnational frame As a composite the essays place instances of political upheaval during the long nineteenth century in Europe and the Americas in a common narrative and offer a new interpretation on their seeming asynchrony In the age of revolutions the formation of political communities and cultural interactions were closely connected over time and space Reciprocal connections arose from discussions on the nature of history deliberations about constitutional models as well as the reception of revolutions in popular culture These various levels of cultural and

Designs Elizabeth Gansen,2023-11-14 Natural Designs chronicles the life and work of the earliest and most influential Spanish historian of the New World Gonzalo Fern ndez de Oviedo 1478 1557 Through a combination of biography and visual and textual analysis Elizabeth Gansen explores how Oviedo in his writings brought the European Renaissance to bear on his understanding of New World nature Oviedo learned much from the humanists with whom he came into contact in the courtly circles of Spain and Italy including Giovanni Battista Ramusio and Pietro Bembo and witnessed Christopher Columbus regaling Queen Isabel and King Ferdinand with news from his inaugural voyage to the Indies Fascinated by the Caribbean flora and fauna Oviedo encountered on his arrival to the Caribbean in 1514 he made them the protagonists of his writings on the Indies From his consumption of the prickly pear cactus which led him to believe his death was imminent to the behavior of the iguana which defied his efforts to determine if the lizard was fish or flesh his works reveal the challenges at the heart of Spain s encounter with the biological wonders of the Americas Natural Designs foregrounds Oviedo s role as a writer illustrator and editor of New World nature As much as Oviedo is credited as a pioneer in the literary genre of American natural history his contributions to early modern conceptions of the flora and fauna of the Indies are still not widely understood and appreciated Gansen situates us in the early sixteenth century to reappraise the works of the Spanish historian who first shaped these realities *Material Cultures of the Global Eighteenth Century* Wendy Bellion,Kristel

Chumash hats to natural history cabinets this book examines how objects embody imperialism knowledge and resistance in various ways By embracing things both elite and everyday this volume investigates physical and technological manipulations of objects while attending to the human agents who shaped them in an era of accelerating global contact and conquest Featuring ten essays the volume foregrounds diverse scholarly approaches to chart new directions for art history and cultural history Ranging from California to China Bengal to Britain *Material Cultures of the Global Eighteenth Century* illuminates the transformations within and between artistic media follows natural and human made things as they migrate across territories and reveals how objects catalyzed change in the transoceanic worlds of the early modern period *Between Encyclopedia and Chorography* Anna Boroffka, 2022-10-03 During the early modern period regional specified compendia which combine information on local moral and natural history towns and fortifications with historiography antiquarianism images series or maps gain a new agency in the production of knowledge Via literary and aesthetic practices the compilations construct a display of regional specified knowledge In some cases this display of regional knowledge is presented as a display of a local cultural identity and is linked to early modern practices of comparing and classifying civilizations At the core of the publication are compendia on the Americas which research has described as chorographies encyclopaedias or more recently cultural encyclopaedias Studies on Asian and European encyclopaedias universal histories and chorographies help to contextualize the American examples in the broader field of an early modern and transcultural knowledge production which inherits and modifies the ancient and medieval tradition **Industrial Forests and Mechanical Marvels** Teresa Cribelli, 2016-07-27 An account of modernization and technological innovation in nineteenth century Brazil that provides a distinctly Brazilian perspective Existing scholarship on the period describes the beginnings of Brazilian modernization as a European or North American import dependent on foreign capital transfers of technology and philosophical inspiration Promoters of modernization were considered few in number derivative in their thinking or thwarted by an entrenched slaveholding elite hostile to industrialization Teresa Cribelli presents a more nuanced picture Nineteenth century Brazilians selected among the transnational flow of ideas and technologies with care and attention to the specific conditions of their tropical nation Studying underutilized sources Cribelli illuminates a distinctly Brazilian vision of modernization that challenges the view that Brazil a nation dependent on slave labor for much of the nineteenth century was merely reactive in the face of the modernization models of the North Atlantic industrializing nations **Empires of Vision** Martin Jay, Sumathi Ramaswamy, 2014-03-14 Combining visual culture and postcolonial studies this reader shows that an appreciation of the role of visual experience is necessary for understanding how colonialism worked and how colonized subjects spoke to imperial rulers
