Academic and Professional Writing in an Age of Accountability Shirley Wilson Logan, Wayne H. Slater, 2018-12-27 What current theoretical frameworks inform academic and professional writing What does research tell us about the effectiveness of academic and professional writing programs What do we know about existing best practices What are the current guidelines and procedures in evaluating a program s effectiveness What are the possibilities in regard to future research and changes to best practices in these programs in an age of accountability Editors Shirley Wilson Logan and Wayne H Slater bring together leading scholars in rhetoric and composition to consider the history trends and future of academic and professional writing in higher education through the lens of these five central questions

The first two essays in the book provide a history of the academic and professional writing program at the University of Maryland. Subsequent essays explore successes and challenges in the establishment and development of writing programs at four other major institutions, identify the features of language that facilitate academic and professional communication, look at the ways digital practices in academic and professional writing have shaped how writers compose and respond to texts, and examine the role of assessment in curriculum and pedagogy. An afterword by distinguished rhetoric and composition scholars Jessica Enoch and Scott Wible offers perspectives on the future of academic and professional writing. This collection takes stock of the historical, rhetorical, linguistic, digital, and evaluative aspects of the teaching of writing in higher education. Among the critical issues addressed are how university writing programs were first established and what early challenges they faced, where writing programs were housed and who administered them, how the language backgrounds of composition students inform the way writing is taught, the ways in which current writing technologies create new digital environments, and how student learning and programmatic outcomes should be assessed.

Natura Urbana Matthew Gandy, 2022-03-08 A study of urban nature that draws together different strands of urban ecology as well as insights derived from feminist, posthuman, and postcolonial thought. Postindustrial transitions and changing cultures of nature have produced an unprecedented degree of fascination with urban biodiversity. The other nature that flourishes in marginal urban spaces, at one remove from the controlled contours of metropolitan nature, is not the poor relation of rural flora and fauna. Indeed, these islands of biodiversity underline the porosity of the distinction between urban and rural. In *Natura Urbana*, Matthew Gandy explores urban nature as a multilayered material and symbolic entity through the lens of urban ecology and the parallel study of diverse cultures of nature at a global scale. Gandy examines the articulation of alternative and, in some cases, counterhegemonic sources of knowledge about urban nature produced by artists, writers, scientists, as well as curious citizens, including voices seldom heard in environmental discourse. The book is driven by Gandy's fascination with spontaneous forms of urban nature, ranging from postindustrial wastelands brimming with life to the return of such predators as wolves and leopards on the urban fringe. Gandy develops a critical synthesis between different strands of urban ecology and considers whether urban political ecology, broadly defined, might be imaginatively extended to take fuller account of both the historiography of the ecological sciences and recent insights derived from feminist, posthuman, and postcolonial thought.

Beauty and the Gods Hugo Shakeshaft, 2025-03-25 How ideas and experiences of beauty informed human relationships with the divine in ancient Greece. Beginning with the earliest Greek literature, the epics of Homer and Hesiod, beauty was seen as having a special connection with the divine. The gods of ancient Greece were defined by their exceptional beauty; even today, to look like a Greek god is proverbial for human beauty. In *Beauty and the Gods*, Hugo Shakeshaft explores the relationship between the beautiful and the divine in ancient Greece, principally in the Archaic period (ca. 750–480 BCE). Analysing evidence that ranges from poetry, art, and philosophical texts to architecture and the natural landscape, Shakeshaft shows how

ideas and experiences of beauty shaped Greek relations with the divine With a powerful call for the place of beauty and aesthetics in the writing of history Shakeshaft uncovers the cultural dialogue between beauty and the gods in a variety of contexts in the Archaic Greek world in forms of divine worship in poetry music and dance in attitudes to the natural environment and in architecture and art This early chapter of Greek history he argues holds an unrecognised key to understanding some long running threads in the histories of religion art and aesthetics from Plato s aesthetic theories to beauty s status in contemporary discourse Beauty s deep past and divine connection in ancient Greece can help us see beauty now in sharper focus
