Facial Multi-characteristics And Applications Bob Zhang, Qijun Zhao, David Zhang, 2018-11-19 What features or information can we observe from a face and how can this information help us to understand the person concerned in terms of their well being and what can we learn about and from each given feature. This book answers these questions by first dividing a face's multiple characteristics into two main categories: original or physiological features and features that change over a lifetime. The first category: original features may be further divided into two sub-classes: features special or unique to an individual and features common to a particular group. The second: changed features can also be subdivided into two groups: features altered due to disease or features altered by other external factors. From these four sub-categories, four different applications are identified: facial identification using original and special features; beauty analysis using original common features; facial diagnosis by disease-changed features; and expression recognition through affect-changed features. The book will benefit researchers, professionals and graduate students working in the field of computer vision, pattern recognition, security, clinical practice and beauty analysis and will also be useful for interdisciplinary research. *Japanese Holistic Face Massage* Rosemary Patten, 2013-07-28 Japanese holistic face massage is based on the Chinese system of medicine and was originally used by geisha girls to maintain a youthful complexion.
