Vital Dust Life As A Cosmic Imperative:

Vital Dust Christian De Duve,1995-12-22 Is the emergence of life on Earth the result of a single chance event or combination of lucky accidents or is it the outcome of biochemical forces woven into the fabric of the universe And if inevitable what are these forces and how do they account not only for the origin of life but also for its evolution toward increasing complexity Vital Dust is a groundbreaking history of life on Earth a history that only someone of Christian de Duve's stature and erudition could have written

Vital Dust Christian De Duve,1995-01-03 A sweeping portrait covering four billion years of the possible origins and evolution of life on earth written by a Nobel Prize winning biochemist on the cutting edge of research into these issues

From Matter to Life Sara Imari Walker,Paul C. W. Davies,George F. R. Ellis,2017-02-23 Recent advances suggest that the concept of information might hold the key to unravelling the mystery of life's nature and origin Fresh insights from a broad and authoritative range of articulate and respected experts focus on the transition from matter to life and hence reconcile the deep conceptual schism between the way we describe physical and biological systems A unique cross disciplinary perspective drawing on expertise from philosophy biology chemistry physics and cognitive and social sciences provides a new way to look at the deepest questions of our existence This book addresses the role of information in life and how it can make a difference to what we know about the world Students researchers and all those interested in what life is and how it began will gain insights into the nature of life and its origins that touch on nearly every domain of science

Between Necessity and Probability: Searching for the Definition and Origin of Life Radu Popa,2004-02-20 Systematically explores the early origins and basic definition of life Investigates the major theories of the origins of life in light of modern research with the aim of distinguishing between the necessary and the optional and between deterministic and random influences in the emergence of what we call life Treats and views life as a cosmic phenomenon whose emergence and driving force should be viewed independently from its Earth bound natural history Synthesizes all the fundamental life related developments in a comprehensive scenario and makes the argument that understanding life in its broadest context requires a material independent perspective that identifies its essential fingerprints

Looking for Life, Searching the Solar System Paul Clancy,André Brack,Gerda Horneck,2005-06-23 Broad ranging book covering life its origins survival and the search for other life in the Solar System

Infrared Space Interferometry: Astrophysics & the Study of Earth-Like Planets C. Eiroa,A. Alberdi,Harley A. Thronson Jr.,T. de Graauw,C.J. Schalinski,2012-12-06 The past year has produced some of the most exciting results in the history of astronomy particularly in the area of planets outside our solar system Only a half year before our meeting in Toledo Spain the first unambiguous detection of planet sized masses orbiting main sequence stars were reported Since that time evidence for a new exo planet has been reported almost at the rate of about once per month Some of these objects are likely to turn out to be very low mass stars but something like half show characteristics Jupiter like mass and near zero orbital eccentricity which appear to be unique to planets Almost at the

same time that giant planets were being discovered regularly the two major space agencies ESA and NASA have identified searches for and detailed study of Earth like planets as a major priority for the future In ESA's Horizon 2000 Plus programme an infrared interferometer has been proposed as a possible future Cornerstone mission Similarly scientists in the US produced the Road Map for the Exploration of Neighboring Planetary Systems ExNPS which provided NASA with a long term plan which leads also to an infrared interferometer in space to study hypothetical Earth like worlds beyond our Solar System Such an observatory is designed to search for the thermal emission from a family of planets using interferometric nulling to remove the contaminating light from the central star

Planets and Life Woodruff T. Sullivan, III, John Baross, 2007-09-13 Astrobiology involves the study of the origin and history of life on Earth planets and moons where life may have arisen and the search for extraterrestrial life It combines the sciences of biology chemistry palaeontology geology planetary physics and astronomy This textbook brings together world experts in each of these disciplines to provide the most comprehensive coverage of the field currently available Topics cover the origin and evolution of life on Earth the geological physical and chemical conditions in which life might arise and the detection of extraterrestrial life on other planets and moons The book also covers the history of our ideas on extraterrestrial life and the origin of life as well as the ethical philosophical and educational issues raised by astrobiology Written to be accessible to students from diverse backgrounds this text will be welcomed by advanced undergraduates and graduates who are taking astrobiology courses

Young Sun, Early Earth and the Origins of Life Muriel Gargaud, Hervé Martin, Purificación López-García, Thierry Montmerle, Robert Pascal, 2013-01-11 How did the Sun come into existence How was the Earth formed How long has Earth been the way it is now with its combination of oceans and continents How do you define life How did the first life forms emerge What conditions made it possible for living things to evolve All these questions are answered in this colourful textbook addressing undergraduate students in Origins of Life courses and the scientifically interested public The authors take the reader on an amazing voyage through time beginning five thousand million years ago in a cloud of interstellar dust and ending five hundred million years ago when the living world that we see today was finally formed A chapter on exoplanets provides an overview of the search for planets outside the solar system especially for habitable ones The appendix closes the book with a glossary a bibliography of further readings and a summary of the Origins of the Earth and life in fourteen boxes

The Origins of Life and the Universe Paul F. Lurquin, 2003 Annotation Because his undergraduate course Origins of Life was so popular and because there is so much discussion of the matter in both religious and scientific realms biochemist Lurquin thought that the general public might be interested as well in a synopsis and synthesis of the current thinking So he revised his course notes for lay readers to demonstrate that the logic of science can be used to make deep sense of the world from the creation of the universe to the creation of life and its diversification Annotation c 2003 Book News Inc Portland OR booknews.com

Chemical Evolution: Physics of the Origin and Evolution of Life Julian Chela-Flores, François Raulin, 2012-12-06 Leading

researchers in the area of the origin and evolution of life in the universe contributed to Chemical Evolution Physics of the Origin and Evolution of Life This volume provides a review of this interdisciplinary field In 35 chapters many aspects of the origin of life are discussed by 90 authors with particular emphasis on the early paleontological record physical chemical biological and informational aspects of life s origin instrumentation in exobiology and system exploration the search for habitable planets and extraterrestrial intelligent radio signals This book contains the proceedings of the Fourth Trieste Conference on Chemical Evolution that took place in September 1995 in which scientists from a wide geographical distribution joined in a Memorial to Cyril Ponnampersuma who was a pioneer in the field of chemical evolution the origin of life and exobiology and also initiated the Trieste Conferences on Chemical Evolution and the Origin of Life This fourth Conference was therefore dedicated to his memory Audience Graduate students and researchers in the many areas of basic earth and life sciences that contribute to the study of chemical evolution and the origin of life
