Representations of Art and Art Museums in Children's Picture Books Perry Nodelman, 2024-10-17 What happens when the assumptions and practices of museum curators and art educators intersect with the assumptions and practices of publishing for children This study explores how over three hundred children s picture books most of them published in the last three decades in English introduce children to art and art museums It considers how the books emerge from and relate to a range of theories and assumptions about childhood and childhood development children s literature and culture illustration visual art museology and art education As well as examining how these theories and assumptions influence what picture books teach young readers about visiting museums and about how to look at and think about art it examines which artists and artworks appear most often in picture books and offers a survey of different kinds of art related picture books ones that claim to be purely informational ones that make looking at art a game or a puzzle ones in which children visit art museums and many more Since the books all include reproductions of or allusions to museum artworks the study also considers the problems illustrators face in depicting museum artworks in illustrations in a different style

A Cultural Approach to Emotional Disorders E. Deidre Pribram, 2016-01-13 In her latest contribution to the growing field of emotion studies Deidre Pribram makes a compelling argument for why culturalist approaches to the study of emotional disorders continue to be eschewed even as the sociocultural and historical study of mental illness flourishes The author ties this phenomenon to a tension between two fundamentally different approaches to emotion an individualist approach which regards emotions as the property of the individual whether biologically or psychologically and a culturalist approach which regards emotions as collective social processes with distinctive histories and meanings that work to produce particularized subjects While she links a strong preference for the individualist construct in Western culture to the rise of the psychological and psychiatric disciplines at the turn of the twentieth century Pribram also engages with a diverse set of case studies tied to psychological and aesthetic discourses on emotions These range from Van Gogh s status as emotionally disordered to the public emotional aesthetics of 19th century melodrama to the diagnostic categories of the DSMs and the fear of globalizing emotional disorders in the 21st century This genuinely interdisciplinary approach makes for a text with potential application
