Trettin,W.M. Aust,Joe Wisniewski,2012-12-06 The early 1990 s marked an environmental watershed for our countly Under two federal administrations significant environmental legislative regulatOly and institutional changes took place which affected our Nation s wetland resources Injust a few years we have seen rapid evolution in the way in which we view wetlands with more emphasis on specific wetland types and the geographic provinces in which they occur This Southern Appalachian Man and the Biosphere SAMAB conference on Wetland Ecology Management and Conservation represents just one example of our desire to understand wetlands in non coastal regions of the southern United States The backdrop to this conference was one where the government universities and private sector have come together to create a broader and more sophisticated understanding of environmental stewardship for our water resources especially wetlands Although enforcement of environmental legislation by federal and state government agencies limited by manpower shortages budgetary constraints

and undermined by weak enforcement remains strong as measured by world standards the realization that environmental degradation of wetlands is likely to get much worse necessitates a greater commitment and increased resource allocation for wetland protection and management These continued pressures on the wetland resource will create substantial opportunities for the application of environmentally sound technologies and interdisciplinary modeling teams to keep abreast of the factors influencing wetland integrity and function in the last half of the 1990 s
