Visual Communication Georgia Aiello, Katy Parry, 2019-10-28 Visual Communication: Understanding Images in Media and Culture provides a theoretical and empirical toolkit to examine implications of mediated images. It explores a range of approaches to visual analysis while also providing a hands-on guide to applying methods to students' own work. The book illustrates a range of perspectives from content analysis and semiotics to multimodal and critical discourse analysis. It explores the centrality of images to issues of identity and representation, politics and activism, and commodities and consumption. It brings theory to life with a host of original case studies from celebrity videos on YouTube and civil unrest on Twitter to the lifestyle branding of Vice Media and Getty Images. Shows students how to combine approaches and methods to best suit their own research questions and projects. An invaluable guide to analysing contemporary media images, this is essential reading for students and researchers of visual communication and visual culture.

The Routledge Companion to Visual Journalism Nicole Dahmen, T.J. Thomson, 2025-09-02 Representing the first collection of its kind, The Routledge Companion to Visual Journalism introduces fundamental topics and ideas, delineates the diversity and complexity of this growing field, and creates a foundation for future scholarship and study. In the contemporary digital media landscape, still and moving images, interactive visualizations, and virtual reality are increasingly important to attract attention, cultivate engagement, inform, and influence opinions, and provide a more emotive and immediate viewing experience for news audiences. This Companion draws together leading voices from academia and industry to survey this dynamic and ubiquitous mode and inspire dialogue. Along with an introduction and conclusion, the volume is structured in five sections and covers people and identities, practices and processes, technologies, equipment, and forms, theories, concepts, and values, and audience interpretation and impact. Beginning by looking at the history of visual news, chapters go on to explore how visual news is created, how journalists visually represent gender, race, sexuality, disability, elites, and ordinary citizens, key ethical ideas and theories behind the creation of visual news, and how visual news is processed, drawing in research from eye tracking, media psychology, and media literacy. The book ends with a critical look at the future of the field. The Routledge Companion to Visual Journalism is a recommended resource for all advanced students and researchers of visual journalism and communication and will also be of interest to
