

VISUAL IMPAIRMENT IN CHILDREN DUE TO DAMAGE TO THE BRAIN

Edited by Gordon N. Dutton and Martin Bax

Visual Impairment In Children Due To Damage To The Brain

Creig S. Hoyt, David Taylor

Visual Impairment In Children Due To Damage To The Brain:

Visual Impairment in Children due to Damage to the Brain Gordon Dutton, Martin Bax, 2010-09-14 Clinics in Developmental Medicine No 186 The increased awareness of cerebral visual impairment in children combined with improved recognition of its wide ranging manifestations has led to its recognition as the most common cause of visual impairment in children in the developed world Yet the subject is in its infancy with very little published to date Information on this complex topic has been needed by all disciplines working with disabled children for many years This ambitious book links the work of authors from many of the major research teams in this field who have made significant contributions to the literature on the subject of cerebral visual impairment and provide a structured amalgam of the viewpoints of different specialists The book contains some very novel concepts which will be of great practical value to those who care for children with visual impairment due to brain injury Summaries of the more specialist chapters as well as clear diagrams and a glossary have been provided to increase the book s accessibility to a broader readership This is an exciting and important field to which this book makes a major contribution

Visual Impairment in Children Due to Damage to the Brain Gordon Dutton, Martin Bax, 2014-05-14 Clinics in Developmental Medicine No 186 The increased awareness of cerebral visual impairment in children combined with improved recognition of its wide ranging manifestations has led to its recognition as the most common cause of visual impairment in children in the developed world Yet the subject is in its infancy with very little published to date Information on this complex topic has been needed by all disciplines working with disabled children for many years This ambitious book links the work of authors from many of the major research teams in this field who have made significant contributions to the literature on the subject of cerebral visual impairment and provide a structured amalgam of the viewpoints of different specialists The book contains some very novel concepts which will be of great practical value to those who care for children with visual impairment due to brain injury Summaries of the more specialist chapters as well as clear diagrams and a glossary have been provided to increase the book s accessibility to a broader readership This is an exciting and important field to which this book makes a major contribution

Cerebral Visual Impairment in Children Josef Zihl, Gordon N. Dutton, 2014-10-24 Cerebral visual disorders have far reaching consequences for child development These have profound adverse effects on children s education and success in school and also in later life but unfortunately cerebral visual disorders often remain undiagnosed and untreated in the pediatric population This book provides a state of the art account of what is known about the development and disorders of visual perception in children It covers the development and disorders of visual perception in children their assessment early intervention and management in an interdisciplinary context both from a scientific as well as clinical perspective Case studies illustrate the recommended assessment and rehabilitation procedures synopses boxes and check lists complement the presentation of our recommendations for clinical practice

Cerebral Visual Impairment, Visual Development, Diagnosis and Rehabilitation

Frouke Nienke Boonstra, Richard John Craig Bowman, Corinna M. Bauer, Arlette Van Sorge, 2022-12-06 **Visual**

Perception in Children and Adolescents with Visual Impairments Jeff C. Rabin, Corinna M. Bauer, Karen

Harpster, Raelyn Ottenbreit, 2025-10-16 Visual perception plays a fundamental role in our understanding of the world around us. However, for children and adolescents with visual impairments, this ability is significantly compromised. Understanding the visual perception processes in this population is crucial for their development and overall well-being. The main goal of this Research Topic is to address the gaps in our understanding of visual perception in children and adolescents with visual impairments. We aim to explore the unique challenges they face, identify the specific visual processing deficits that may be present, and propose innovative approaches to support their visual development. By investigating this domain, we can enhance our knowledge of how the visual system adapts and develops in the absence of visual input, ultimately leading to improved support and intervention strategies for these individuals.

Visual Diagnosis and Care of the Patient with Special

Needs Marc B. Taub, Mary Bartuccio, Dominick Maino, 2012-09-26 Visual Diagnosis and Care of the Patient with Special

Needs provides a thorough review of the eye and vision care needs of patients with special needs. This book gives you a better understanding of the most frequently encountered developmental and acquired disabilities seen in the eye care practitioner's office. These disabilities include patients with autism, brain injury, Fragile X syndrome, and Down syndrome, as well as those with psychiatric illness, dual diagnosis, and more. The text discusses in great detail the visual issues inherent in these populations and their possible treatment. A group of authors with approximately 500 years of experience in the field of eye care and special populations have been brought together to develop this comprehensive reference. It may appear that this book is written primarily for eye care practitioners such as optometrists and ophthalmologists, while vision is the overriding topic, this book serves as an excellent resource for a multitude of professions including those engaged in occupational therapy, physical therapy, speech and language therapy, psychiatry, social work, pediatric medicine, and special education.

Pediatric

Neuro-Ophthalmology Michael C. Brodsky, 2010-03-23 Due to the generous representation of the afferent visual system

within the brain, neurological disease may disrupt vision as a presenting symptom or as a secondary effect of the disease. Conversely, early developmental disturbances of vision often disrupt ocular motor control systems, giving rise to complex disorders such as nystagmus, strabismus, and torticollis. The signs and symptoms of neurological disease are elusive by their very nature, presenting a confounding diagnostic challenge. Neurological medications and neurosurgical treatments can produce neuro-ophthalmological dysfunction that can be difficult to distinguish from disease progression. Affected patients may experience substantial delays in diagnosis and are often subjected to extensive and expensive diagnostic testing. Scientific articles pertaining to specific disorders are scattered throughout medical subspecialty journals. These children continue to fall through the cracks of our medical education system. The increasing recognition that pediatric neuro-ophthalmology comprises a distinct set of diseases from those seen in adults has led to its emergence as a dedicated field of

study Since the original publication of Pediatric Neuro Ophthalmology nearly fourteen years ago interest in the field has burgeoned Pediatric ophthalmology and pediatric neurology subspecialty conferences often include symposia dedicated to recent advances in pediatric neuro ophthalmology Technical advances in neuroimaging have given rise to a more integrated mechanistic classification of neuro ophthalmological disease in children Our understanding of neurodevelopmental disorders of the visual system has expanded longstanding monoliths have been disassembled into component parts basic molecular mechanisms have taken center stage and genetic underpinnings have become definitional Evolutionary alterations can now be observed at the level of the gene adding a new dimension to our understanding of disease pathogenesis New classifications now encompass clinically disparate conditions Descriptive definitions have been supplanted by mechanistic ones and clinical definitions superseded by genetic ones Our concept of disease pathogenesis has been revised and in some cases overturned Bearing witness to these remarkable advancements has compelled me to enhance and expand the first edition of Pediatric Neuro Ophthalmology into this new and revised one In the first edition of this book our goal was to present the clinical characteristics diagnostic evaluation and therapeutic options for the common neuro ophthalmologic disorders of childhood In so doing we designed the book to provide a narrative journey through the thought processes involved in the clinical management of these disorders In this edition I have retained the basic narrative format of original book while expanding the exploration of these complex visual disorders in the context of the many new scientific advancements and discoveries that have come to light These conditions are fun to diagnose fascinating to understand and gratifying to manage from the Preface to the 2nd Edition

Essential Elements in Early Intervention: Visual Impairment and Multiple Disabilities, Second Edition
