Microspheres and Regional Cancer Therapy Neville Willmott, John M. Daly, 2020-10-28 Microspheres and Regional Cancer Therapy takes an interdisciplinary approach to the subject of microspheres and regional cancer therapy. It synthesizes laboratory and clinical data to demonstrate the utility of microsphere based strategies in the treatment of localized solid tumors particularly in the liver not amenable to surgery and as a component of strategies for treatment of disseminated disease. Using the same techniques that show the deficiencies of delivery strategies involving antibodies, liposomes and synthetic polymers, clear evidence is presented describing how microspheres of appropriate size can be localized in solid tumor deposits in the liver with little exposure to other organs. To exploit this phenomenon, the extent and nature of the incorporation of active agents within microspheres is discussed in relation to release pharmacokinetics and tumor response achieved by intensification of therapy in the manner described. This book will benefit laboratory based scientists and clinicians in pharmaceuticals, pharmacology, physiology, surgical oncology and nuclear medicine. In addition, cancer clinicians interested in the value of regional therapy will be able to evaluate the underlying theory and learn the necessary methodology. *Marine Biomedicine* Bill J. Baker, 2015-11-05 Marine Biomedicine: From Beach to Bedside assesses current efforts in marine biomedicine and evaluates the implications of recent advances on the future of the field. Richly illustrated in full color to enhance reader comprehension, the book covers four sections. The first one addresses the technology that has recently been brought to bear on the subject. *Technical Abstract Bulletin* Defense Documentation Center (U.S.), 1964
