[Writing That Makes Sense](#) David S. Hogsette, 2009-03 Description Students often face a daunting dilemma in academia when it comes to writing. In their composition courses, they are encouraged to express their emotions, find themselves, construct their own meanings, discover their voices, and own their identities through writing. But when they are asked to write lab reports, history papers, sociological studies, or to write discipline-specific documents for their majors, their professors aren't much interested in self-expression, self-esteem, identity, politics, or endlessly open-ended non-answers in search of a question. Their professors want clear writing that makes sense and that evidences critical thinking. What are students to do? *Writing That Makes Sense* takes students through the basics of the writing process and critical thinking, and it teaches them how to write various types of academic essays they are likely to encounter in their academic careers. Drawing on nearly twenty years of experience in teaching college composition and professional writing, David S. Hogsette combines relevant writing pedagogy and practical assignments with the basics of critical thinking and logical thought to provide students with step-by-step guides for successful writing in academia. *Writing That Makes Sense* includes many professional essays and articles from a variety of voices often underrepresented in academia today, thus introducing students to a wider intellectual diversity. Students will also benefit from a chapter on information literacy that provides practical tips on engaging the research process and writing research papers.

Exploring Cultural Dynamics and Tensions Within Service-Learning Trae Stewart, Nicole Webster, 2011-09-01 Service learning is an exciting pedagogy and field of study offering insight into how academic study and community engagement blend to create social change In its most traditional conceptualization servicelearning activities typically manifest within communities where outside individuals address a need Service learning is purported to have a transforming effect on individual student perspectives by providing students the opportunity to interact with people and enter into situations that allow students to test their predisposition towards others However the literature on the impact of service learning on participants acceptance of diversity and development of open mindedness reports mixed outcomes The purpose of this book is to explore cultural tensions and dynamics within the field of service learning It is not meant to be an exhaustive review of the interplay between culture and service learning but rather a starting point for an ongoing conversation about how this complex topic impacts the field In 18 chapters educators students and administrators investigate the cultural values of service learning itself and the tensions created when this is at odds with the values of others within K 12 and higher education in the United States and abroad Authors include community organization representatives researchers directors of offices of community engagement university administrators junior and senior faculty and former service learning undergraduate students Submissions reflect a range of genres including theoretical conceptual pieces position papers case studies and other traditional academic essays challenging how students and community members are affected by the cultural tensions within service learning engagement
