iPod: The Missing Manual J.D. Biersdorfer, David Pogue, 2012-12-19 Apple's iPods continue to set the bar for media players with bold new features like the Touch's supersized screen and Siri voice control. But iPods still lack a guide to all their features. That's where this full color book comes in. It shows you how to play music, movies, and slideshows, shoot photos and videos, and navigate Apple's redesigned iTunes media management program. The important stuff you need to know. Fill it up. Load your iPod with music, photos, movies, TV shows, games, ebooks, and podcasts. Manage your stuff. Download media and apps from the iTunes and App Stores, then organize your collection. Tackle the Touch. Send email and instant messages, make FaceTime calls, and shoot photos and HD video with the Touch's 5 megapixel camera. Go wireless. Use the Touch's new iOS 6 software to sync content wirelessly. Relish the Nano. Enjoy video and photos on the Nano's new big screen, and chart your workouts with the Nike pedometer. Master the Shuffle and Classic. Get mucho music on the little Shuffle, and use the Classic's giant hard drive to tote around your audio and video collections. Pump it up. Blast iPod tunes through your home and car stereo.

Mindful Teaching with Technology Troy Hicks, 2021-11-11 Technology is integral to teaching in the English language arts, whether in person, hybrid, or remote. In this indispensable guide, Troy Hicks shows how to teach and model digital diligence, an alert, intentional stance that helps both teachers and students use technology productively, ethically, and responsibly. Resources and lesson ideas are presented to build adolescents' skills for protecting online privacy, minimizing digital distraction, breaking through filter bubbles, fostering civil conversations, evaluating information on the internet, creating meaningful digital writing, and deeply engaging with multimedia texts. Dozens of websites, apps, and other tools are reviewed, with links provided at the companion website. End of chapter teaching points and guiding questions facilitate learning and application.

Giving Voice Meryl Alper, 2017-01-20 How communication technologies meant to empower people with speech disorders to give voice to the voiceless are still subject to disempowering structural inequalities. Mobile technologies are often hailed as a way to give voice to the voiceless. Behind the praise, though, are beliefs about technology as a gateway to opportunity and voice as a metaphor for agency and self-representation. In *Giving Voice*, Meryl Alper explores these assumptions by looking closely at one such case: the use of the Apple iPad and mobile app Proloquo2Go, which converts icons and text into synthetic speech by children with disabilities, including autism and cerebral palsy, and their families. She finds that despite claims to empowerment, the hardware and software are still subject to disempowering structural inequalities. Views of technology as a great equalizer she illustrates rarely account for all the ways that culture, law, policy, and even technology itself can reinforce disparity, particularly for those with disabilities. Alper explores, among other things, alternative understandings of voice, the surprising sociotechnical importance of the iPad case, and convergences and divergences in the lives of parents across class. She shows that working-class and low-income parents understand the app and other communication technologies differently from upper- and middle-class parents, and that the institutional ecosystem

reflects a bias toward those more privileged. Handing someone a talking tablet computer does not in itself give that person a voice. Alper finds that the ability to mobilize social economic and cultural capital shapes the extent to which individuals can not only speak but be heard.

Use of Remote Sensing to Estimate Paddy Area and Production Lea Rotairo, Anna Christine Durante, Pamela Lapitan, Lakshman Nagraj Rao, 2019-04-01 A substantial portion of the world's rice is produced and consumed in the Asia and Pacific region. As much of the region's population depends on rice farming for consumption and livelihood, the demand for good quality statistics remains essential for effective policy formulation. Recent advances in remote sensing serve as a viable alternative to traditional methods of compiling agricultural statistics by responding to the emerging data requirements and overall needs of modern agriculture especially for staple commodities such as rice. This publication outlines the procedures, methods, and tools developed for generating statistics on paddy rice area and production using remote sensing and GIS techniques. It is intended to encourage and assist national statistical systems in piloting and adopting satellite-based techniques as an alternative to existing data collection methods while enabling other interested readers to comprehend whether the adoption of these methodologies can improve the quality and timeliness of agricultural statistics. The handbook also serves as a complement to a massive online open course developed by ADB for crop area estimation.
