Installing the front brake linings

**Warning**

Danger of accidents Reduced braking due to oil or grease on the brake discs.

- Always keep the brake discs free of oil and grease, and clean them with brake cleaner when necessary.

**Warning**

Danger of accidents Reduced braking due to use of non-approved brake linings.

- Brake linings available from accessory suppliers are often not tested and approved for use on KTM vehicles. The construction and friction factor of the brake linings and therefore the brake power can differ considerably from the original KTM brake linings. If brake linings are used that differ from the originals, there is no guarantee that they comply with the original license. The vehicle no longer corresponds to the condition at delivery, and the warranty is no longer valid.

- Check the brake discs.
- Check parts for damage and wear. Replace damaged or worn parts.
- Check that leaf spring ❶ in the brake caliper and sliding plate ❷ in the brake caliper support are seated correctly.

**Info**

The arrow on the leaf spring points in the rotation direction of the brake disc.

- Fit the brake linings, insert bolt ❶, and mount locking split pins ❷.
- Position brake caliper, mount and tighten screws ❸.

- Fit cable clip ❹.
